FY2012 Career-Technical Education (CTE) Technical Assessment System Matrix

REQUIRED ASSESSMENTS

State CTE Technical Assessments developed by OSU-CETE and other non-industry test developers including High Schools of Business, Project Lead the Way, and Ohio Super Computer Center.

In most cases, where a State CTE assessment or other proprietary test is listed it is required for use by the related CTE program. There are several cases where new career field content standards are in place, the test no longer aligns with the new content standards and as such the test is listed as "available but not required". CTE programs operating with a course of study based on the older content standards should continue use of the "available but not required" test. All required tests are reportable in EMIS and can be used in the calculation of the state technical skill attainment indicator of performance (2S1).

ASSESSMENTS NOT AVAILABLE IN FY12

The following assessments will not be available through CETE in FY12 but will remain valid for reporting in EMIS.

03DA	Agricultural Production Core
03DB	Agricultural Production Core and Beef and Sheep Production
03DC	Agricultural Production Core and Dairy Production
03DD	Agricultural Production Core and Poultry Production
03DE	Agricultural Production Core and Swine Production
05DA	Agricultural/Industrial Mechanical Technician
08DA	Animal Management Technician
18MA	Visual Communications Art
18EA	Visual Communications Art
19DA	Commercial Photography
36MB	Marketing Technology
36EA	Marketing Technology
38MA	Graphic Communications
38EA	Graphic Communications
46DA	Meat Processor
53DA	Horticulture Core and Floriculture and Greenhouse Worker
53DB	Horticulture Core and Turf and Landscape Worker
53DC	Horticulture Core and Nursery and Garden Worker
61DA	Agriscience

Certain program areas are beginning to create specific courses that are to be offered as components of the program. Individual courses, for the most part, will have a specific test module that can be treated as an end of course test. A total test benchmark score will be created that is based on student performance across the available end of test course modules for that program. Performance on individual ODE/OSU-CETE course test modules for courses need not be reported in EMIS for technical skill attainment indicator of performance (2S1). In these programs, a combination of end of program tests will comprise the total test. Only student performance on the total test is used in reporting technical skill attainment.

Field Testing of OSU-CETE Tests

Many State CTE tests will be undergoing field testing starting January 2012. Programs are strongly encouraged to have students participate in the field tests as their performance on the tests is critical in determining the quality of test questions as well as setting appropriate benchmark scores. Note that the field tests will be administered free of charge. Because of the field test status of these tests, programs participating in the field tests will not be required to, nor will they be able to, report results in EMIS for the state technical skill attainment indicator of performance (2S1).

Industry Credential and Governmental Licensure Assessments

Among the list of required tests there are options where an industry assessment or governmental licensure assessment may be used in lieu of the State CTE assessment. In the absence of a State CTE assessment, the assessment associated with an industry certificate or governmental licensure program may be the only option available. All such exams have met minimum standards established by the CTE Office and can be reported in EMIS for the calculation of the technical skill attainment indicator of performance (2S1).

RECOMMENDED CREDENTIALS

State or Industry Recognized Certificate or Governmental License Attainment (1STP3).

Any industry certification or governmental licensure earned by a student may be used in reporting information for the "State or Industry Recognized Certificate or License Attainment" indicator of performance (1STP3). The list of credentialing opportunities is not comprehensive and is not intended to limit the credentials that students should strive to earn. Any state or industry-recognized certificate/license that a student obtains in the student's CTE program of concentration can be reported in EMIS for this indicator of performance. The reporting options are simply "Y" and "N".

FAMILY AND CONSUMER SCIENCE END OF COURSE TESTS

The series of Family and Consumer Sciences End of Course Tests have been included at the end of this document. It is highly recommended that Family and Consumer Science programs administer these tests. These valid and reliable tests are a very useful tool that can be used for continuous improvement of the courses being offered. Because these courses are not classified as workforce development, the tests are not used in calculating the state technical skill attainment indicator of performance (2S1).
