# Ohio Department of Education

# Special Education Fiscal Accountability Report

# For the Fiscal Year Ended June 30, 2007

# Prepared by the Center for School Options and Finance

## INTRODUCTION

The Ohio Department of Education (ODE) is pleased to present this annual report to the State Board of Education, Governor Strickland and the Ohio General Assembly. With the experience of producing the previous reports, ODE believes this year's report will be even more reflective of school districts' actual expenditures in special education as fiscal officers have become more familiar with the methodology used in constructing this report. ODE worked in cooperation with the Buckeye Association of School Administrators (BASA), the Ohio Association of School Business Officials (OASBO), the Ohio School Boards Association (OSBA), the Ohio Coalition for the Education of Children with Disabilities (OCECD), and the OAJVST (Ohio Association of JVS Treasurers) in development of the methodology. Again this year, each school district received the data calculations to review and correct, prior to the finalization of this report.

Ohio has developed a system for funding of special education students that is determined by the severity of the student's disability. Students are categorized into one of six special education categories and funding is provided base on an estimate of the additional cost to serve students in the category. The amount of funds is calculated as a function of the cost to educate a typical student in a typical classroom (the formula amount). Additional funding for students in the lowest category is approximately one fourth of the formula amount; additional funding for students in the highest category is approximately 4 times the formula amount. These additional funds are referred to as the special education weighted funding.

Sections 3317.16(D) and 3317.022(C)(5) of the Ohio Revised Code require each city, exempted village, local, and joint vocational school district to spend at least the amount of assumed local costs plus the state foundation and special education weighted funding provided for any special education pupil. The expenditures are to be made for approved special education and related services expenses (Funds transferred to community schools for special education students are excluded from the required spending calculation.) Note that this spending requirement is simply the state aid plus the assumed local share of basic formula aid and weighted aid

Furthermore, the law provides that beginning with FY02 for regular districts and in FY04 for JVSDs, ODE shall require school districts to report data annually to allow for monitoring of compliance with R.C. 3317.022(C)(5) and 3317.16(D) and that ODE shall annually report to the Governor and the General Assembly the amount of money spent by each school district for special education and related services. Therefore, given the required expenditure level set by the legislature, the purpose of this report is to inform the Governor and the General Assembly as to which districts did or did not meet this spending requirement and by what amount.

**Background on School Funding**

Prior to FY99 special education was funded at the state level by the allocation of classroom and supervisory units allocated to school districts. Classroom units had requirements for student enrollment based upon the disability as identified in the student's Individual Educational Plan (IEP). Students who were counted towards a school district's eligibility for a particular classroom unit were not included in the district's funded average daily membership (ADM).

Beginning with FY99, unit funding was discontinued, and all students were included in the district's funded ADM. Special education weights were then assigned to students with IEPs based upon the student's identified disability. There were three categories with different funding weights in the original foundation formula. In FY02, the number of categories was increased to six in order to more closely align actual costs with the state's funding system.

The change from a unit based funding system to a weighted funding system raised concerns among school district and special education advocates that funds assumed to be generated for special education purposes would not all be spent on those purposes. In response to this, the Governor and the General Assembly created the statutory requirement as previously noted to try to obtain data on this matter

Special education advocates were concerned that by increasing a district's basic aid by including all children in the funded ADM. the funds generated for those special education students would not be directed to special education expenditures. Based upon district annual financial reports, the Special Education Fiscal Accountability Report identifies districts which did not expend the amount in the law designated for special education. Since the state's funding levels are based on an average cost per pupil, districts that spent less than that average cost may not have expended the entire designated amount, but they may be putting forth the same effort as a higher cost per pupil district. Secondly, district accounting systems may not be recognizing the costs of special education in the manner that ODE's methodology extracted the data for this report. ODE allowed districts to adjust their data to more accurately align expenditures to the methodology. Districts are encouraged to adjust their accounting systems to align with this methodology to eliminate or reduce the need for changes in future reports.

## METHODOLOGY

To avoid imposing additional data reporting requirements on school districts, ODE has developed a process to calculate districts' special education and related services expenditures using data from already existing financial reports provided by the districts. The goal is to arrive at an expenditure figure that is comparable to the required expenditures described above. The expenditures identified from the school districts' annual financial reports fell into three major categories: 1) function codes directly related to special education and related services; 2) the estimated portion of general support services expenses for special education pupils; and 3) the portion of regular instruction expenses for special education pupils in the regular classroom. Costs identified in these areas were reduced by state revenue received in support of these areas but not included in the calculated required spending in this report. For example, the 2000 functions were reduced by transportation reimbursement, catastrophic aid payments and speech only unit allowances. These adjustments are shown on the summary spreadsheet.

The source of the expenditure data was each school district's annual financial statement filed with ODE. Expenses for city, exempted village and local districts were pulled from fund 001, the General fund; fund 016, the Emergency Levy fund; and Fund 447, the Disadvantaged Pupil Impact Aid fund, the JVSDs expenditures also included fund 028, the Special Education fund.

The following is a more detailed description of how the data in each table were compiled. There are a set of tables for regular districts and a similar set for JVSDs.

**Direct Special Education and Related Services Costs (Table A and JVS Table A)**

Table A and JVS Table A show a breakdown of the function code expenditures that were pulled to derive expenditures coded as direct special education expenses. The following function codes are included:

| | |
|---|---|
| 1220's | Special Education Instruction Services |
| 2140's | Psychological Services |
| 2150's | Speech and Audiology |
| 2180's | Support Services for Students with Disabilities |
| 2215 | Special Education Aides |
| 2216 | Special Education Attendant Services |
| 2416 | Special Education Services - Administrative/Supervisors |
| 2417 | Special Education Services - Support Staff |
| 2821 | Special Education - Pupil Transportation |

In addition to the above functions, JVS Table A also displays:

| | |
|---|---|
| 1330's | Vocational – handicapped |
| 1350's | Vocational – secondary handicapped co-op program |

The first 8 columns of figures in Table A and in JVS Table A are considered support functions and are summed and transferred to Table B and JVS Table B respectively. The final column shows the Total Direct Special Education expenditures with the state total of $1,672.7 million for regular districts and $29.2 million for JVSDs.

**Portion of General Support Services Going to Special Education Pupils (Table B and JVS Table B)**

The intent of Table B and JVS Table B is to show the data and methodology used to estimate the part of district general support services expenditures going to special education pupils.

To estimate this portion of general support services going to special education pupils, ODE first determined the percent of the students that are special education pupils by dividing Special Education ADM by Expenditure Flow Model (EFM) ADM. This percent is shown in the second to last column. This percentage was then multiplied by the sum of the expenditures reported in the following function codes:

| | |
|---|---|
| 2000's | Supporting Services(less 2140's, 2150's, 2180's, 2215, 2216, 2416, 2417 and 2821 which were subtracted out because they were already included in the direct cost calculation discussed above) |
| 1250's | Culturally Different |
| 1270's | Disadvantaged Youth |
| 1290's | Other Special |

This product is shown in the last columns of Table B and JVS Table B for each district with the state total for regular districts being $683.7 million and the state total on JVS Table B being $52.9 million.

**Portion of Regular Instruction Received by Special Education Pupils (Table C and JVS Table C)**

Under an instructional philosophy of maximum inclusion, many special education pupils receive regular instruction in the regular classroom. To estimate the portion of the expenditures for regular instruction received by special education pupils in Table C, ODE multiplied the expenditures reported in the 1100's and 1900's function codes (regular and other instruction) times the percent that special education pupils in the regular classroom are of the total pupils in the regular classroom. JVS Table C also includes the 1300's function codes (less 1330's and 1350's which were excluded because they were already included in the direct cost calculation). The last column of both tables displays the results of this calculation with a state total for regular districts of $657.7 million and a state total for JVSDs of $69.0 million.

**Required Special Education and Related Services Expenditures (Table D and JVS Table D)**

For both regular and JVS districts the sum of the three special education expenditure calculations described above must be compared to the minimum required special education expenditures level set by the legislature in ORC 3317.022(c) (5) and 3317.16(D). Table D and JVS Table D display how the required expenditure amount is calculated for each district. Essentially, the required expenditures is at least the state and local share of special education weighted amount plus the state and local shares of the base program cost attributable to special education pupils minus aid sent to community schools for special education pupils.

State weighted aid is calculated by applying a district's state share percentage to a total weighted amount. To obtain the assumed local weighted amount, 1 less the state share percentage is applied to this same total weighted amount. The basic program cost is defined as the foundation level times the cost of doing business factor times formula ADM with the charge off being the local part and formula aid being the state part. Therefore, the portion of the basic program cost attributable to special education pupils is the foundation level times the cost of doing business factor times the number of special education pupils. This basic program amount attributable to special education pupils is added to the state and local weighted amounts (less the amount transferred to community schools) to obtain the required special education expenditure amount shown in the last column of Table D and JVS Table D. The statewide total for regular districts in FY07 was $2,051.2 million and for JVSDs it was $76.0 million.

**Special Education Expenditure Summary (Table E and JVS Table E)**

Table E displays the expenditure amounts calculated for regular districts in Tables A, B and C with speech services state aid, catastrophic aid and special education transportation being subtracted out of the direct costs from Table A since these expenses are not a part of the spending requirement. This adjusted direct expense amount is added to the Table B and Table C prorated expenditure figures to arrive at total special education expenditures. This amount is compared to the required expenditures from Table D to arrive at the variance amount in the last column of Table E.

A positive number in this column indicates the district's special education expenditures exceeded the requirement while a negative figure indicates expenditures were less than the required amount. Note that statewide the total special education expenditures exceeded the total spending requirements by $882.2 million.

The same calculations outlined above are displayed in JVS Table E except that adjustments to direct expenditure figures to eliminate categories of expense not covered in the spending requirements consisted only of Speech Services. For JVSDs the statewide total special education expenditures exceeded the total spending requirements by $74.7 million. Each JVSD met its FY07 spending requirement.

## CONCLUSION

An analysis comparing the results of this year's report to last year's report yielded the following conclusions.

For FY07 there were 17 traditional districts that spent $2.3 million less than required. Statewide, traditional districts' special education expenditures exceeded the required spending amount by $882.2 million. These figures are compared to those for FY06 which showed 21 districts spending $2.4 million less than required and statewide, districts' special education expenditures exceeding the required spending amount by $858.7 million. The following table summarizes statewide special education expenditure data for traditional districts for the last 4 years:

| ***Annual State Totals Comparison – Traditional*** | | | | |
|---|---|---|---|---|
| | **FY04** | **FY05** | **FY06** | **FY07** |
| Special Education Expenditures | $2,573.4m | $2,690.5m | $2,852.4m | $2,933.4m |
| Required Special Education Expenditures | $1,823.3m | $1,904.2m | $1,993.6m | $2,051.2m |
| Expenditures in Excess of Requirement | $750.0m | $786.4m | $858.7m | $882.2m |
| # Districts Spending Less Than Required | 37 | 27 | 21 | 17 |
| **Shortfall of Districts Spending Less Than Required** | $6.5m | $4.4m | $2.4m | $2.3m |

Statewide, joint vocational districts' special education expenditures exceeded the required spending amount by $74.7 million in FY07. These figures are compared to those for FY06 which showed special education expenditures exceeding the required spending amount by $49.0 million. The following table summarizes statewide special education expenditure data for joint vocational districts for the last 4 years:

| ***Annual State Totals Comparison – Joint Vocational*** | | | | |
|---|---|---|---|---|
| | **FY04** | **FY05** | **FY06** | **FY07** |
| Special Education Expenditures | $110.0m | $113.1m | $122.8m | $150.7m |
| Required Special Education Expenditures | $64.2m | $69.6m | $73.8m | $76.0m |
| Expenditures in Excess of Requirement | $45.8m | $43.5m | $49.0m | $74.7m |
| # Districts Spending Less Than Required | 3 | 3 | 0 | 0 |
| **Shortfall of Districts Spending Less Than Required** | $0.5m | $0.8m | n/a | n/a |

The above two tables indicate that school districts across the state are spending more than required for special education students. It is worth noting that this amount is conceptually comprised of two components.

First, expenditures that districts may be making for special education students are simply reflective of additional expenditures spent on all students. In Ohio, the average expenditure per pupil for FY07 was in excess of $9,500, and yet the required regular expenditure for regular students as well as special education students was $5,403 in FY07. Clearly, districts, through both additional state (e.g. PBA, parity aid, etc.) and local resources may be spending more per pupil on all children, and special education students are included in this mix.

Second, expenditures that districts may be making specifically for special education services reflect choices that may result in expenditure levels that exceed those required pursuant to state law.

The nature of the data collected by the Department of Education is such that it is not possible to specifically isolate how much of these two factors makes up the $882.1 million spending in excess of required levels as reported in this report.

ODE believes that the FY07 report reflects the efforts of local school districts to better utilize the Uniform School Accounting System to track special education spending. We anticipate that next year's report will reflect continued improvement by school districts.

Specific questions concerning the data about a particular district should be directed to the Superintendent or Treasurer for that district. Questions about the report may be directed to Karla Manter, in the Center for School Options and Finance at 614-466-0070 or by email at karla.manter@ode.state.oh.us.
