Background

Career Connections is a joint initiative among the Governor's Office of Workforce Transformation, Ohio Board of Regents, and Ohio Department of Education

Governor's Office of Workforce Transformation 2014 Strategic Plan workforce.ohio.gov

Career Connections

Aligns district efforts around college and career readiness to support students' development

Embeds curriculum strategies linking classroom learning to future careers

Engages students through discovering career interests, exploring pathways and making plans

Components

Career Connections Framework

Career Connections Learning Strategies

OhioMeansJobs K-12

Framework

Career Awareness

Kindergarten through Grade 5

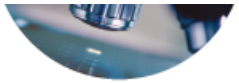
Career Exploration

Grades 6 through 8

Career Planning

Grades 9 through 12 and beyond

career connections



Career Connections is a joint initiative among the Governor's Office of Workforce Transformation, Ohio Board of Regents, OhioMeansJobs and Ohio Department of Education. Career Connections began in 2012 by providing a framework by which students develop a vision and realistic plan for their futures – during K-12 and beyond. Learning strategies are embedded into Ohio's New Learning Standards for English language arts, math, science and social studies. Career Connections aligns the many efforts around college and career readiness to support students in becoming productive and engaged citizens.

K | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12

Career Awareness

Elementary Grades (K-5)

Students become familiar with careers through learning that connects classroom instruction to future work. Career awareness strategies show students various types of careers and stimulate interest in future work.

Career Exploration

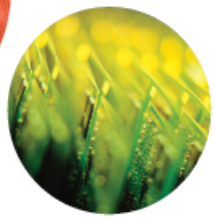
Middle Grades (6-8)

Students explore their career interests through embedded activities. Career exploration strategies are opportunities for students to discover work environments and understand the various aspects of the workplace. Strategies include tools and instruments that help students understand and appreciate their strengths and interests. Students start plans for their future with career information and postsecondary education data. Plans include course selection and planning as well as career aspirations and goals.

Career Planning

High School (9-12)

Students continue career exploration while focusing on career planning. Activities provide advanced experiences that offer hands-on opportunities in a workplace. Career planning strategies focus on making clear links between career options and educational decisions. Students develop the skills to revisit previous exploration and planning strategies as they face career changes throughout life.



Ohio | Department of Education

career connections FRAMEWORK

ELEMENTARY GRADES

Career Awareness (e.g.: describe careers, identify career information, interpret connections between school and future work)

- Workplace visits with career interviews
- Career connection learning strategies
- Classroom career speakers
- Introduction to Ohio career fields and pathways

MIDDLE GRADES

Career Exploration & Interests (e.g.: identify interests, develop self-awareness, determine personal motivations related to work and income)

- Advanced academic and technical education
- Student Success Plan
- Career connections learning strategies
- Workplace visits with career interviews
- Career development courses
- Career mentorships
- Career research
- Service learning
- Career tech student organizations
- OhioMeansJobs K–12
- Career pathways

HIGH SCHOOL

Career Planning, Decision-Making, & Transition (e.g.: understand career interests, engage in career-based learning experiences, explore and identify education and training options beyond high school aligned with career interests, learn how to adjust career plans according to shifts in the economy and interests)

- Advanced academic and technical education
- Dual enrollment earning high school and college credits
- Career academies
- Career connections learning strategies
- Career pathways
- Career tech student organizations
- Employer-recognized certification and licensure
- Student Success Plan
- Internships
- Career mentorships
- Pre-apprenticeship programs
- Part-time work
- Service learning
- Work-based learning
- OhioMeansJobs K–12

LIFELONG LEARNING

Career Preparation and Fulfillment (e.g.: pursue career interests, engage in career-based learning related to established goals, access and navigate resources that lead to continued growth and development, reflect on goals and adjust plans according to economic and interest changes)

- Advanced education and training programs
- Apprenticeships
- Career mentorships
- Cooperative education programs
- Economic viability
- Industry credentials
- Internships
- Professional development
- Reflective career evaluation and changes
- Service learning
- Successful work experiences
- OhioMeansJobs

Career Connections Learning Strategies

Model Curricula with sample strategies embedded in Ohio's New Learning Standards

Guide for Teachers with strategies to integrate in to local curriculum

A QUICK GUIDE TO career connections

Career Connection Learning Strategies help educators connect student learning to future work. Here are examples of how the model curriculum for Ohio's New Learning Standards incorporates strategies beginning in kindergarten through high school. To view the model curriculum in its entirety, visit:

http://education.ohio.gov/Topics/Academic-Content-Standards

Career Connections is a joint initiative among the Governor's Office of Workforce Transformation and Ohio Department of Education. In addition to the learning strategies embedded into the model curricula, Career Connections will align the many efforts around college and career readiness to support students' in becoming productive and engaged citizens.

Career Awareness

Elementary Grades (K-5)

Students become familiar with careers through learning that connects classroom instruction to future work. Career awareness strategies show students various types of careers and stimulate interest in future work.

Contemporary World Issues

Theme	***The dynamics of global interactions among nations and regions present issues that affect all humanity. These dynamics include competing beliefs and goals, methods of engagement, and conflict and cooperation. Contemporary issues have political, economic, social, historic and geographic components. Approaches to addressing global and regional issues reflect historical influences and multiple perspectives. Students can impact global issues through service learning and senior projects.***
Topic	**Civic Participation and Skills** Individuals and groups have the capacity to engage with others to impact global issues.
Content Statement	***4. Individuals can assess how effective communicators address diverse audiences.***

Content Elaborations

As individuals engage with others on global issues, they need to be able to communicate their beliefs and ideas with other individuals and with diverse groups.

Effective communicators, either individuals or groups, adapt communication styles to address diverse audiences by adjusting their use of communication tools, characteristics and conventions (see Content Statement 3).

Examples of communications could include examination of school-level and personal communications (e.g., memos, letters to families, texts, Web posts), as well as pieces from news programs, websites, advertisements or other media students may see in their daily life. For example, news clips may be used to illustrate how politicians use different body language when speaking to different audiences.

Opportunities should be provided for students to practice their own communication skills as they engage with others on global issues.

Expectations for Learning

Assess and practice effective communication methods.

Instructional Strategies

Have students select a person in the public spotlight and assess how effectively the person communicates. *How does this person adjust their communication style for diverse audiences? What tools, characteristics or conventions were most or least effective? Why are some people more dynamic than others when speaking?*

Ask students, *What does it take to be an effective communicator?* Students can brainstorm practices that they expect to see in an effective communicator then look for those characteristics as they observe selected video clips.

Career Connection

Students will brainstorm practices that they expect to see in an effective communicator then look for those characteristics as they observe selected video clips (e.g., Ted Talks at www.ted.com/talks). After viewing videos of three dynamic speakers, students will reflect on how communications skills are essential across all types of jobs (e.g., hospitality, IT, health). Students will apply the information related to communication in their plan for education and training through high school and beyond.

Diverse Learners

Strategies for meeting the needs of all learners including gifted students, English Language Learners (ELL) and students with disabilities can be found at this site. Resources based on the Universal Design for Learning principles are available at www.cast.org.

Instructional Resources

Museum of the Moving Image
www.livingroomcandidate.org
The Living Room Candidate offers more than 300 commercials from every presidential election since 1952, as well as lesson plans and an interactive space for students to create their own commercials.

A **career** connections GUIDE FOR TEACHERS

A **career** connections GUIDE FOR PARENTS

A **career** connections GUIDE FOR YOUR COMMUNITY

career connections

Preparing young people to succeed in the workplace requires partnering with local schools and engaging in career readiness conversations. Strengthen your partnerships by building Career Connections in your community using these examples.

GRADES K-5*

Team up with your school district to host a career day or an evening event for the community to learn more about various businesses, organizations and jobs across the community.

Offer classroom presentations that show young people how the skills and knowledge they are learning now are applied throughout the workplace.

GRADES 6-8

Team up with teachers from your local schools to create an authentic project where students apply the skills and knowledge learned in the classroom to solving a real-work problem.

Partner with your local schools to coordinate a community service project that involves several businesses and organizations. Allow students to lead the planning and organizing for the project.

GRADES 9-12

Post job openings and internship opportunities for your company or organization on OhioMeansJobs.com.

Coordinate a long-term mentorship program that offers students enrichment opportunities such as work-ready skills, career exploration and college access.

Host a student intern to build work experience and promote community partnerships.

Today, children need to see a link between what they are learning and future work. Career Connections offer practical ways for teachers and school counselors, families and community members to show students, as early as in kindergarten, the types of jobs possible for them.

Career Connections Framework

The Career Connections Framework provides an overview to school districts for developing implementation plans for career exploration. A school district Career Connections plan includes strategies across grades K-12 that support the career development of all students.

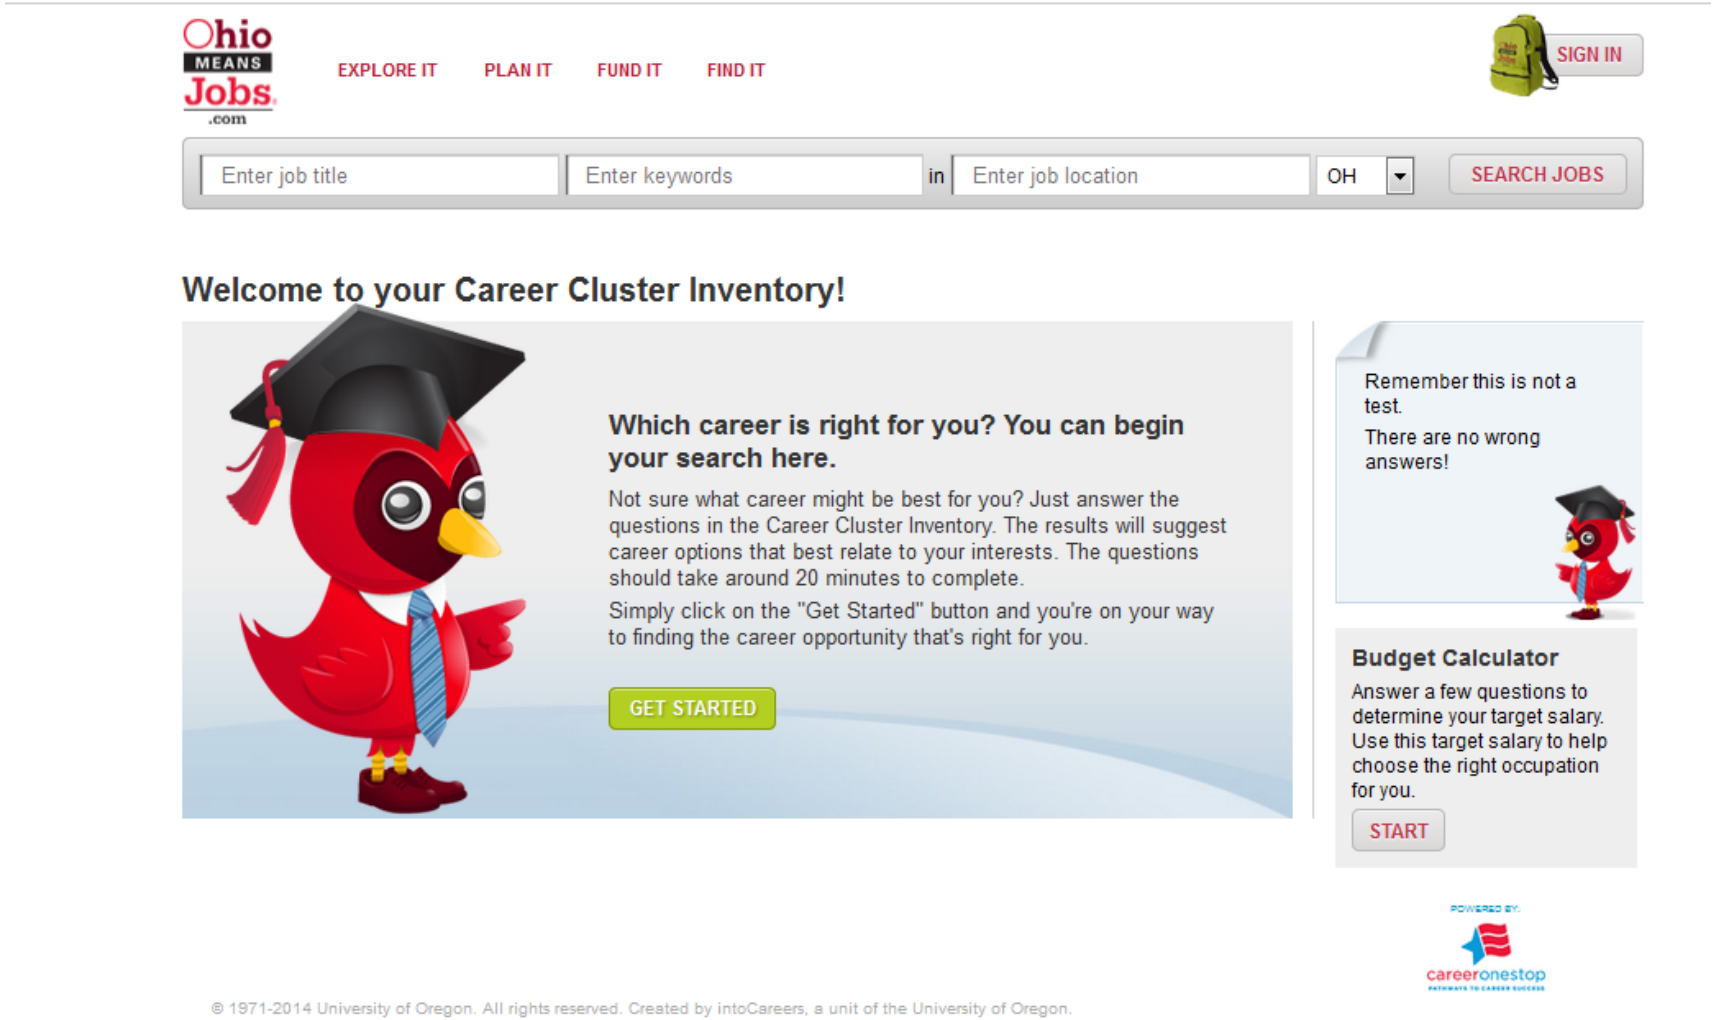
Career Cluster Inventory



Career Cluster Inventory

Career Cluster Inventory ▸ How It Works

How It Works **Question 1-20** **21-40** **41-60** **61-80** **Result**

It's easy! Here's how the Career Cluster Inventory works

Career Cluster Inventory can help you narrow down your choices. Here, you rate **80 activities** on how much you think you would enjoy doing them. Most of these activities are things you have done before. Some of the activities are things you have never done before. For each activity, take a minute to imagine doing it and then rate that item for how much you think you like it. To answer a question, simply click on the response you want.

Note:your answers are not stored or saved until you click NEXT on the bottom of each page or SAVE on the scores page.

Career Profile: Results

Career Profile ▸ Profile Results

Select Interests **Profile Results** PRINT

Congratulations!

We've got your Career Profile scores, as well as an explanation of what they mean.

People with Conventional interests like work that follows set procedures and routines. They prefer working with information and paying attention to details rather than working with ideas. They like working with clear rules and following a strong leader.

People with Artistic interests like work that deals with the artistic side of things, such as acting, music, art, and design. They like creativity in their work and work that can be done without following a set of rules.

People with Enterprising interests like work that has to do with starting up and carrying out business projects. These people like taking action rather than thinking about things. They like persuading and leading people, making decisions, and taking risks for profits.

People with Investigative interests like work that has to do with ideas and thinking rather than physical activity or leading people. They like searching for facts and figuring out problems.

People with Social interests like working with others to help them learn and grow. They like working with people more than working with objects, machines, or information. They like teaching, giving advice, and helping and being of service to people.

People with Realistic interests like work that includes practical, hands-on problems and answers. Often people with Realistic interests do not like careers that involve paperwork or working closely with others. They like working with plants and animals; real-world materials like wood, tools, and machinery; and outside work.

We found career options that match your interests. Click **View Occupations** to see them now!

Select your region

Choose your region from the drop down list:

- SELECT - GO

-OR-

Find your county

Enter your zip code below:

GO

Next Steps:

Map what your school is already doing (who, what, when, where, how)

Identify champions at your school that will expand and enhance current efforts (administrators, colleagues, and community members)

Strategize what small steps your school will take initially, that will make a big impact overtime
