

career connections

Career Connections is a joint initiative among the Governor's Office of Workforce Transformation and Ohio Department of Education. Senate Bill 316 initiated the first step toward providing a framework by which students develop a vision and realistic plan for their futures – during K-12 and beyond. In addition to the learning strategies embedded into the model curricula, Career Connections will align the many efforts around college and career readiness to support students' in becoming productive and engaged citizens.

Career Awareness

Elementary Grades (K-5)

Students become familiar with careers through learning that connects classroom instruction to future work. Career awareness strategies show students various types of careers and stimulate interest in future work.

Career Exploration

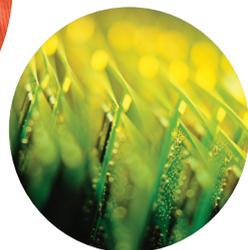

Middle Grades (6-8)

Students explore their career interests through embedded activities. Career exploration strategies are opportunities for students to discover work environments and understand the various aspects of the workplace. Strategies include tools and instruments that help students understand and appreciate their strengths and interests. Students start plans for their future with career information and postsecondary education data. Plans include course selection and planning as well as career aspirations and goals.

Career Planning

High School (9-12)

Students continue career exploration while focusing on career planning. Activities provide advanced experiences that offer hands-on opportunities in a workplace. Career planning strategies focus on making clear links between career options and educational decisions. Students develop the skills to revisit previous exploration and planning strategies as they face career changes throughout life.

career connections FRAMEWORK

ELEMENTARY GRADES

Career Awareness (e.g.: describe careers, identify career information, interpret connections between school and future work)

- Workplace visits with career interviews
- Career connection learning strategies
