Work Readiness | Entrepreneurship | Financial Literacy

Junior Achievement currently makes a positive impact on more than 4.5 million U.S. students in nearly 200,000 classrooms in America. JA's volunteer-delivered, K-12th grade programs foster work-readiness, entrepreneurship, and financial literacy skills, and apply experiential learning to inspire students to dream big and reach their full potential. With the help of more than 213,000 volunteers, JA students develop the skills they need to experience the realities and opportunities of work and entrepreneurship in the 21st century global marketplace.

Today, 115 JA Areas deliver Junior Achievement programs across the United States. Through an innovative partnership between the business community, educators, and volunteers, JA Areas help young people connect with relevant learning and the importance of staying in school. JA inspires students to develop competitive skills and confidence. Their success bolsters the local workforce and contributes to the community's economic growth.
