

### 2014 Data Appeals

Data that districts and community schools report to the Ohio Department of Education play a critical role in producing the Ohio School Report Card and Teacher Value-Added reports. The department recognizes that data reporting errors can occur during EMIS data submission period and during the Roster Verification process. Because of the potential impact of these errors on the educational opportunities available to Ohio’s students and on teachers’ value-added reports, the department has designed a formal process to ensure that all districts can appeal and correct substantive reporting errors. Based on the nature, impact and extent of approved appeals, the department will determine the most appropriate method for updating and releasing revised district data.
