

District Software and EMIS Integration

1. Please list your SIS: _____ HR software: _____ Financial software: _____
2. What do you find helpful about the way your local SIS software integrates with the EMIS system?
3. What are your biggest challenges with the way your local SIS software integrates with the EMIS system?
4. Is there functionality in your local SIS software that you would like to see added to the Data Collector and/or an EMIS report? If so, please describe.
5. Is there an issue you face within your district where changes to EMIS requirements for data reporting would encourage SIS additions/changes that would help with resolving the issue? If so, please describe
6. If you have thoughts on any of the above 4 questions as it relates to your district's HR or Finance software, please describe and discuss.

Data Collector and Level 1 Reports

1. Being as specific as possible, what do you like about the Data Collector?
2. What are the biggest challenges in using the Data Collector to collect, preview, and submit your data, and to review feedback provided by ODE in the user interface? What's missing that needs to be there?
3. Assuming logins were provided and security set at an appropriate level, are there ways you could see an enhanced Data Collector serving a data need within the district, beyond the needs of the EMIS Coordinator?
4. Are there changes to existing Level 1 reports or new Level 1 reports that could be added that would make it easier to collect/preview/submit your data? (See attached list of current Level 1 reports)
5. What longer term changes should the agency implement that would help you use the Data Collector and Level 1 reports more efficiently?
6. Any other thoughts on the Data Collector and Level 1 reports?
