2019 Federal and State Identification Data

This file contains data relevant to the updates to the federal identification lists (Priority, Focus, Warning) and the new Watch lists. LEAs will only receive data for Priority, Focus, or Warning updates if they had at least one school identified for that specific list in 2018. Districts will receive District Watch data for each subgroup they were eligible for and will also receive Building Watch data for each building under their hierarchy that was eligible for that specific subgroup's list. All tabs and data elements are listed below.
