

Collect course grades on new record type

Collect course grades on new record type

This record type will be in its own collection period. In addition to identifying the course and student, the record will include information on the grade earned (A-F, P [pass], I [incomplete], U [unknown]), term the grade represents (e.g., 1st quarter/9 weeks, 2nd semester, end of year), and status of the grade (in progress, interim term, or final end of course).

Grades are only required for courses that earn high school credit, regardless of the grade level of the student when the course is taken. Grades may be reported for non-credit courses at any grade level.

Final end of course grades are required. Interim term grades (such as quarterly grades for a year-long course) are required if the entity reporting the course is also the entity teaching the course and if the entity would normally issue a grade for the term (e.g., a report card). Interim term grades are strongly encouraged but not required for contracted courses, CCP courses, and JVSD satellite courses. In progress grades are optional.

Grades will be reported by the same LEA that reports a student course/course master record for a student (in other words, grades are reported for CCP courses, but not for courses taken elsewhere that are transferred in for credit). If a JVSD is reporting satellite courses, then the JVSD must report at least the final end of course grade.

Grades reported in EMIS will not be used to generate a transcript for a student. If a student's grade in a course is changed after the close of that FY reporting period, the grade will not be updated in the EMIS data set.
