

EMIS Release Notes- Updated Manifest

Collection Request Name: Fall DORP Assessment Collection FY16

Description of Change: Fixes SQL Prepare Error

Planned Availability Date: 7/11/2016

Version Number: 2

Updated Version Requires:

- **Starting a new/restarting the current collection of data?** No
- **Running a new prepare of the collected data?** No
- **Replacing any data already submitted to ODE with a new submission?** No

“Updated Version Requires” Additional Information: The SQL error was not stopping any data from reaching ODE- in fact, the error was such that it was allowing extra records to come to ODE that were outside the fall testing date range. If a DORP school did not submit because of the SQL error, then they need to submit now. If a school did submit, then the school is free to submit again, but it is not required, as ODE will ignore any extra records that were included due to the SQL error in version 1.

Known Issues Resolved: During the prepare a SQL error occurred when validating the test date.

This issue has been resolved.
