

State Indicators (Assessments)

<b>Statewide Indicators – Percent Proficient – (by Subject)</b>	
Definition:	The percentage of students per grade and test that were enrolled in the district for a “full academic year” that scored at or above the proficient level on the test ( <b>subject to the Alternate Assessment cap limitation</b> ). This percentage is used to determine if the district met the state minimum standard (state indicator) for that subject/grade level test.
Calculation:	$\% \text{ Proficient or Above on Test} = \frac{\text{Number of Students scoring at or above the proficient level on the standard test} + \text{Number of Students scoring at or above proficient on the alternate assessment Alternate Assessment (Required Test Type = "STR" and "ALT")}}{\text{Number of students taking the Standard or Alternate test (Required Test Type = "STR" and Scaled Score not = ***)}} \times 100$
Data elements:	<i>REQUIRED TEST TYPE</i> <i>TEST SUBJECT TYPE</i> <i>RAW/SCALED SCORE</i> <i>TEST GRADE LEVEL</i> <i>WITHDRAWAL DATE</i> <i>STATE EQUIVALENT GRADE LEVEL</i> <i>STUDENT STATUS</i> <i>ATTENDING/HOME IRN INDICATOR</i> <i>STUDENT PERCENT OF TIME</i> <i>MAJORITY OF ATTENDANCE IRN</i> <i>ACCOUNTABILITY IRN</i> <i>LEP</i>

<b>Statewide Indicators – Percent Proficient – (by Subject)</b>	
<b>Statewide Indicators – State Indicator Met – (by Subject)</b>	
Definition:	Indicates whether the state indicator is met for each grade/subject test. If the % of students scoring at or above the proficient level is $\geq$ the state minimum standard, then the district met the standard for that state indicator.
Calculation:	If the % of students scoring at or above the proficient level is $\geq$ the state minimum standard then the district met the standard for that state indicator. If the percentage of students proficient is below the state minimum standard then the district did NOT meet the standard for that state indicator.

<b>Statewide Indicators – # of students taking the Standard Test or the Alternate Assessment – (by Subject)</b>	
Definition:	Total number of students per grade and test that were enrolled in the district for a “full academic year” and that actually took the test. This includes students who took the Alternate Assessment. The grade levels included in the calculation for 2007-08 are 3 <sup>rd</sup> , 4 <sup>th</sup> , 5 <sup>th</sup> , 6 <sup>th</sup> , 7 <sup>th</sup> , 8 <sup>th</sup> , 10 <sup>th</sup> and 11 <sup>th</sup> grade. Students that have a 9 <sup>th</sup> grade proficiency test reported for them are not included in the calculation, regardless of grade level.
Calculation:	For each subject/grade level test, this is a count of students in a tested grade level that actually took the test. The testing records included are: ( <i>REQUIRED TEST TYPE</i> = “STR” and the <i>SCALED SCORE</i> is not = “****”) and ( <i>REQUIRED TEST TYPE</i> = “ALT” and the <i>RAW SCORE</i> is not = “****”).

## Graduation Rate

The graduation rate is defined as the percentage of students that received a diploma during the 2006-07 school year, (INCLUDING summer 2007 graduates) of the total number of students reported as graduates and or dropouts from this cohort of students (adjusted for returning withdrawals) combined.

Graduates: Were students reported during FY2007 Yearend N with a *DIPLOMA DATE* and a *DIPLOMA TYPE*.; OR students reported during FY2008 October K as Summer Graduates with a *DIPLOMA DATE* and a *DIPLOMA TYPE*.

- Students with Grade Level = 13 that receive a diploma during the 2006-07 school year **are not** considered "On-Time Graduates" and are not included in the numerator of the graduation rate).
- Proficiency only student who graduated in FY2007 are not included in the numerator or denominator. Proficiency-Only students are students who were not enrolled in the district, but needed to pass the 9th grade proficiency test in order to graduate.
- If the district has only one high school, the "Graduation Rate" on the Building Accountability Report may not be equal to the "Graduation Rate" On the District Accountability Report.
- Graduation rates will only be calculated for a high school that includes students in grades 9-12, inclusive. If a building does not educate the entire 9-12 grade span then a graduation rate would not be calculated for that building. A graduation rate would be calculated for the district if the district includes grades 9 through 12.
- The graduation rate formula is consistent with the National Center for Educational Statistics (NCES) recommendations for calculating graduation rates.
- The graduation rate calculation is adjusted for dropouts who return before October of the following year, and for students reported with program codes =
  - 500001 - Previously reported as a dropout in the reporting district's graduation rate.
  - 500002 - Previously reported as a dropout in another Ohio district.
