

Profile 2022-2023 New Improvement Plan Requirements for Indicator 12 Noncompliance

What is Indicator 12? Indicator 12 measures the percentage of children referred by IDEA Part C (Early Intervention) who are found eligible for Part B (Preschool Special Education Services) and who have IEPs developed and implemented by their third birthdays. IDEA requires that 100 % of the children enrolled in Part C (Early Intervention) and found eligible for Part B (Preschool Special Education), have Part B services in place and implemented by each child's third birthday.

What is required when a district is found noncompliant? When a district is found noncompliant for Indicator 12, the district must develop an improvement plan outlining activities designed to remedy the noncompliance and achieve the short-term goal(s).

 Although the district will develop their own activities, The Office of Early Learning and School Readiness is requiring that the <u>OCALI two-part Transition from C to B and Interagency</u> <u>Agreement Training</u> is listed as an activity and must be completed if the district has not already done so.

Who is involved and required to sign the Improvement Plan? The district staff responsible for implementation of the improvement plan, the district superintendent and the Early Childhood State Support Team consultant for the region are required to sign the Improvement Plan. New for the 2022-2023 Profile year, the Early Intervention Contract Manager is also a required signer.

Per Ohio Administrative Code 3301-51-11 (D)(3)(f)(i): A school district determined to be noncompliant with the transition timeline...shall develop a corrective action plan in addition to the interagency agreement. The corrective action plan must include the signature of a representative of the agency responsible for Part C Early Intervention services.

The graphic below highlights the required Improvement Plan OCALI training activity as well as the Early Intervention Contract Manager signature line addition.

Why is this important? It is important for the district as well as Early Intervention to understand the transition process between agencies and state-level requirements for collaborative and cooperative agreements to serve preschoolers with disabilities. Although the Early Intervention Contract Manager is not responsible for creating or approving any activity associated with the district's Improvement Plan, it is important for the contract manager to be aware of areas where the district and Early Intervention can strengthen their relationship and identify areas of improvement for building a more seamless transition process. This also provides an opportunity for both parties to review their Interagency Agreement and determine a need for attending the OCALI Transition and Interagency Agreement Training.
