REMOTE LEARNING PLAN

District Name:	Deer Park Community City School District
District Address:	8688 Donna Ln. Cincinnati, OH 45236
District Contact:	Dr. Stace Orso, Assistant Superintendent
District IRN:	043851
Board Approval Date:	<ul style="list-style-type: none"> Submitted for information at July 21st Board of Education meeting. Will be submitted for approval at the August 4th Board of Education meeting.

HB 164 (June 2020) indicates that "Each qualifying public school governing body may adopt a plan to provide instruction using a remote learning model for the 2020-2021 school year. An adopted plan shall not be subject to approval by the Department. Each plan shall include all of the following: (1) A description of how student instructional needs will be determined and documented; (2) The method to be used for determining competency, granting credit, and promoting students to a higher grade level; (3) The school's attendance requirements, including how the school will document participation in learning opportunities; (4) A statement describing how student progress will be monitored; (5) A description as to how equitable access to quality instruction will be ensured; (6) A description of the professional development activities that will be offered to teachers. ... The Department shall make each plan it receives under division (B) of Section 16 publicly available on its website."

As the school year proceeds and circumstances evolve, school districts are able to amend their remote learning plans to address changing needs. District superintendents are able to make amendments to the remote learning plan on behalf of the school district without additional local school board approval. Amended plans must be resubmitted to ODE by email at remotelarning@education.ohio.gov.

Remote learning should continuously support whole-child success and meaningful academic opportunities, while protecting the health and safety of students, parents, caregivers and educators. By definition, remote learning is a continuum of education delivery that can be both online and offline. Remote learning should be responsive to known equity issues. The goal of remote learning is to ensure that learning continues when the learner and educator, or source of information, are separated by time and/or distance and, therefore, cannot meet in a traditional classroom setting. Some DPCCSD families lack access to digital resources, technology and the internet. Families also might be challenged with adults working from home while trying to

deerparkcityschools.org

support students' remote learning needs at home. It is likely that our most vulnerable students will be disproportionately affected by the pandemic for a variety of reasons. Vulnerable youth, including students experiencing homelessness or in foster care, justice-involved youth, students with disabilities, military families and English learners likely will face multiple challenges. As we face these equity issues, we also must work together to be intentional about supporting students' social, emotional and behavioral health and their academic success.

When is a Remote Learning Needed?

A Remote Learning Plan is needed in two circumstances:

Standard Component of the Educational Experience:

A remote learning plan is needed when the district's plan for the educational experience of its students includes, in any way, a specific reliance on remote learning as a regular and standard component of the instructional program, for the entire district, for a particular building, for a particular school or for a particular group of students. The district will deliberately use remote learning to fulfill its obligation of educating some of its students and the remote learning academy will be structured in such a way and conducted in a manner that meets the legal instructional hour and attendance requirements.

"As-Needed" Component for Unplanned Occurrences:

A remote learning plan is needed when the district's plan for the educational experience of its students includes an "as-needed" contingency remote learning approach for periods (generally in excess of three days) during which a school building may be closed pursuant to ORC 3313.482, but for which the school desires to continue to provide educational services that count as "days in attendance." Additionally, there could be instances where a school closes for a day or two to disinfect before a weekend or break but wants to or should provide remote instruction.

Parents and families who choose remote learning as a regular and standard component for their child's instructional program will be assigned to our **DPCCSD Remote Learning Academy**. Each student in the Remote Learning Academy will be assigned a DPCCSD staff member, who will support the child in his or her learning and social and emotional skill development. These teachers will grade submitted work and will closely monitor each child's progress. Students and families selecting this educational approach for the Fall of 2020 will be required to remain in the Remote Learning Academy through at least the end of the first semester. Families who initially elect to send their child in-person may elect to transition their child into the Remote Learning Academy at any time.

Key Definitions:

- **Remote Learning:** Remote learning occurs when the learner and educator, or source of information, are separated by time and/or distance and, therefore, cannot meet in a traditional classroom setting. As used in this plan “remote learning” can include approaches that are digital or analog.
 - **Digital mode:** Digital mode describes remote learning that is delivered via computer- or internet-based means. Digital mode remote learning requires students to have technology devices and, in most cases, internet access. Successful use of digital mode remote learning is dependent upon regular interaction between the student and educator.
 - **Analog mode:** Analog mode describes remote learning that is delivered through a non-digital experience. This could include use of high-quality paper learning packets or other non-digital instructional materials that enable students to engage in learning outside of the school building or traditional classroom setting. High-quality analog learning materials are sequenced, not random and encourage student discovery and exploration apart from the school building. Successful use of analog mode remote learning is dependent upon regular interaction between the student and educator. Analog mode is often used when students lack access to technology devices and internet service.
 - **Teacher led:** Teacher led remote learning occurs when a student is not in the school building but is synchronously interacting remotely with a teacher or other educator.
 - **Self-directed:** Self-directed remote learning occurs when a student is largely responsible for the accomplishment of the learning on his or her own. This can include learning with asynchronous support from a teacher or other educator. Self-directed remote learning may be either computer/internet based, or non-computer/internet based.
 - **Online Learning:** Online learning takes place through the use of a computer or other device that allows the student to engage in a learning experience. The definition of online learning is included separately from remote learning because online learning can be either remote or site based. Also, blended learning includes only online remote learning and no other type of remote learning. The online learning experience may be participation in a content-delivery software package or internet-based service, or on a learning management system for which the content has been provided by the school or district.
 - **In-school online:** In-school online learning is learning that is done primarily through the interaction between a student and a computer using learning management software or an online or electronic content delivery system or software. Generally, in-school online learning is supervised by a teacher.
 - **Remote online:** Remote online learning is online learning that is accomplished by students away from the school building.

SECTION ONE INSTRUCTIONAL NEEDS

A description of how student instructional needs will be determined and documented

Determining Instructional Needs

How will **instructional needs** be **determined**?

- Instructional Sequencing
- Aligned Instruction to Ohio Learning Standards
- Gap Analysis for ELA, Math, Science, and Social Studies, including identification of prerequisite and essential skills
- Student-level data analysis (e.g., NWEA MAP, OST/EOC, District Common Assessments - Edulastic)
- Pre-assessment strategies (part of digital platform)
- Review of IEP for Students with Identified Disabilities (SWD)
- Review of Language Plan for students who are English Language Learners (ELL)
- Review of Written Education Plan (WEP) and students identified as gifted

Address Determining Instructional Needs Here:

The District has selected Accelerate Education as its digital platform for students in the Remote Learning Academy in grades K-5 and APEX for students in grades 6-12. Some students requiring academic accommodations may be placed on Edgenuity. Accelerate Education, APEX and Edgenuity all provide online education courses to meet the needs of all students, from at-risk students who had trouble succeeding in the traditional classroom to high achieving students seeking classes their schools cannot provide for them. Students who are attending in-person learning and potentially participating in teacher-led remote learning at times, teachers will continue to teach and instruct without interruption.

Here are links to the courses that Accelerate Education offers for students electing to participate in the Remote learning Academy.

513-891-0002

deerparkcityschools.org

Individual instructional needs for students will be identified in the following ways:

- Utilizing prerequisite skills, current objectives, and external assessments and resources, a prescriptive program will be created within our digital platform for individual students and will then be further reviewed and refined by our teachers.
- Adaptive pre-assessment within our digital platform allows for the creation of Individualized Learning Plans catered to each student's needs, skill levels, and requirements. Our teachers review and refine these plans based on student instructional needs.
- The results of district common assessments, norm-referenced local assessments, and required State assessments may also be used to identify the individual instructional needs of individual students.

Documenting Instructional Needs

How will **instructional needs** be **documented**?

- Clear instructional plans will be created
- Clear instructional plans will be communicated with staff, parents, and other stakeholders
- Digital platform reports
 - Teacher Dashboard
 - Classroom and Student Level Performance by Common Core Standard
 - Student Performance Overview
 - Enrollment Progress and Performance by School

Address Documenting Instructional Needs Here:

A staff member will monitor student progress and mastery in their online courses using available reports within our digital platform. As instructional needs are identified, the staff member will be responsible for personalizing instruction and course content for each student. This may include additional remediation and intervention or adjustments to course pacing or content extensions.

Parents will be enrolled as observers in their child's online courses. As long as a valid email is provided, observers and students will be emailed weekly progress reports. Additionally, observers may log in to our learning management system at any time to see grades, pacing, course material, and teacher feedback. Contact information is present within the course so that a parent may contact the student's online teacher.

Students who are attending in-person learning and potentially participating in teacher-led remote learning at times, teachers will continue to communicate with parents in the manner as though instruction is taking place in-person.

SECTION TWO DETERMINING COMPETENCY

The methods used for determining competency, granting credit, and promoting students to a higher grade level for students participating in remote learning will be consistent with those defined in our Board Policy and in our Grading and Reporting Handbook.

DPCCCSD Board Policy 5420

<https://go.boarddocs.com/oh/dpccs/Board.nsf/Public?open&id=policies#>

DPCCCSD Grading and Reporting Administrative Guidelines

<https://go.boarddocs.com/oh/dpccs/Board.nsf/Public?open&id=policies#>

Determine Competency	<p>What method(s) will be used to determine competency for remote learning?</p> <ul style="list-style-type: none">• Student work will be graded based on mastery of content as defined by the Ohio State Standards and the District Grading and Reporting policies and guidelines.• Students in the Remote Learning Academy will be graded using the same grading scale adopted for all students in the DPCCCSD.• Regular assessments, both formative and summative, will be included as part of online courses.• The DPCCCSD staff member assigned to the Remote Learning Academy will provide regular feedback to students and families.• The DPCCCSD staff member assigned to the Remote Learning Academy will hold virtual conferences with students and families to review progress.
Granting Credit	<p>What method(s) will be used for granting credit for remote learning?</p> <ul style="list-style-type: none">• Students must earn a grade of 60% or higher in each high school course for which credit is granted.• Course grades are to be made up primarily of assessments and activities designed to allow demonstrated mastery of content.
Promoting Students	<p>What method(s) will be used for promoting students to a higher grade level with remote learning?</p> <ul style="list-style-type: none">• Develop and communicate a plan for promoting students to the next higher grade level that is based on mastery of course content and work completion.

SECTION THREE ATTENDANCE AND PARTICIPATION

The school's attendance requirements, including how the school will document participation in learning opportunities

Attendance and Participation Requirements

What are your school district's **attendance requirements** for remote learning?

- Our remote learning plan shall include **self-directed** learning experiences that are online and offline.
- Students in grades K-6 will be required to log a minimum of 27.5 hours per week of work completion and online virtual instruction. Students in grades K-6 will complete a minimum of 910 hours for the school year. Students in grades 7-12 will be required to log a minimum of 28.75 hours per week of work completion and online virtual instruction. Students in grades 7-12 will complete a minimum of 1001 hours for the school year. These hours may be accumulated through a combination of remote and in-person school building attendance and participation.
 - The total number of documented hours per week while participating in remote learning will be monitored weekly and will include the sum of digital time logged through Accelerate Education, APEX or Edgenuity, time spent with the assigned staff member on Google Classroom, and documentation of analog or off-line activities and time spent from the parent or guardian.
 - For students in grades K-5, parent/guardian documentation will be gathered in the form of a weekly log (i.e., worksheets, activities, assignments/projects added by the assigned staff member, assessments, and independent reading).
- For students who are attending in-person learning and potentially participating in teacher-led remote learning at times, teachers will monitor student participation and work completion to satisfy attendance requirements. Teachers will report absences to administration, who will follow up with truancy when appropriate.
- Activities and expectations will be developmentally appropriate based on each child's age and skill level and a recommended daily schedule will be established collaboratively by our

Deer Park Community City Schools

8688 Donna Ln. Cincinnati, OH 45236

513-891-0002

deerparkcityschools.org

Remote Learning Academy staff members, parents/guardians, and students (where appropriate).

- The following reports from our digital platform will be used to document and monitor student attendance and participation:
 - Enrollment Progress and Performance by School
 - Time Based Performance Report
 - Activity Reporting - Time on Task

Deer Park Community City Schools

8688 Donna Ln. Cincinnati, OH 45236

513-891-0002

SECTION FOUR PROGRESS MONITORING

A statement describing how student progress will be monitored

Progress Monitoring

How will your school district **progress monitor** student progress with remote learning?

- The Remote Learning Academy will have a variety of progress monitoring tools that teachers, administrators and parents can utilize to monitor progress and determine if a student is making adequate progress.
- Reports will be reviewed frequently by the Remote Learning Academy staff and students regarding student progress and activities and lessons may be adjusted as needed.

Address Monitoring Student Progress Here:

The following reports from our digital platform will be used to monitor student progress:

- Classroom and Student Level Performance by Common Core Standard
- Student Performance Overview
- Enrollment Progress and Performance by School

Students in the Remote Learning Academy will be required to participate in regularly scheduled norm-referenced local assessments and required state assessments.

Parents will be enrolled as observers in their child's online courses. As long as a valid email is provided, observers and students will be emailed weekly progress reports. Additionally, observers may log in to our learning management system at any time to see grades, pacing, course material, and teacher feedback. Contact information is present within the course so that a parent may contact the student's teacher.

For students who are attending in-person learning and potentially participating in teacher-led remote learning at times, teachers will monitor student participation and work completion.

SECTION FIVE EQUITABLE ACCESS

A description as to how equitable access to quality instruction will be ensured

Equitable Access

What is your school district's plan to ensure **equitable access** to quality instruction through remote learning?

Our goal is to ensure that every child has access to a device and to make accommodations for families who do not have internet/wifi access so that they can fully participate in remote learning.

Possible/Optional item(s) to consider:

- Parent/Student surveys have been reviewed.
- Technology plan created to ensure equitable access.
- Each student will receive a district device which should be used for completing school work and participating in virtual instruction.
- Multiple surveys have been sent out and phone calls have been made to families to determine if they have reliable access to wi-fi/internet in the home. We continue to advocate for universal internet access for all of our students.
- Students and families electing to participate in the Remote Learning Academy who have individual learning plans (IEPs, 504 Plans, WEPs) will receive the support and accommodations indicated in their plans.
- Analog solutions (i.e., packets) will be available for families on a case-by-case basis but will be a last resort.

Deer Park Community City Schools

513-891-0002

deerparkcityschools.org

SECTION SIX PROFESSIONAL LEARNING

A description of the professional development activities that will be offered to teachers

Resource Link(s): <https://edgeubadges.com>

Professional Learning

What **professional development** activities will be offered to your school district's teachers to ensure remote learning is successful?

- Teachers choose professional learning courses during in-service conference style learning.
- Self directed professional learning courses throughout the year via our Edge-U program.
- Remote Learning Academy staff members will participate in Accelerate Education, APEX and Edgenuity training prior to the start of the school year.

Address Professional Learning/Development Here:

Teachers will engage in sessions during the pre school in-service days where they will choose sessions to meet their needs for instruction in an online environment. Remote Learning Academy teachers will participate in Accelerate Education, APEX and Edgenuity professional development prior to the start of school and throughout the school year. During the school year all teachers will continue learning with a selection of online courses through the Deer Park EdgeU Badging program. District administration, district curriculum coaches and building principals will evaluate all staff members in the Remote Learning Academy and will provide ongoing coaching, mentoring, and feedback.
