

**Lakewood City Schools 20-21 Remote Learning Plan  
Submitted to ODE 7/17/20**

### **Instructional Needs-Determined and Documented**

Diagnostic assessments will play a more important role than ever during the 2020-21 school year, so teachers can clearly understand students' strengths and weaknesses before instruction begins. Screeners and diagnostics will be given as needed at specific grade levels as required. The district is exploring the use of iReady Reading and Math for use in grades K-8. Documentation of student strengths and weaknesses will be housed within the iReady system. In grade 9-12 teachers will be encouraged to use formative assessments and our common summatives to obtain data regarding student instructional needs.

### **Competency, Credit and Promotion**

The district will continue to use our common assessments and our grade level report cards (K-12) to determine progress on the Ohio Learning Standards and letter grades on report cards (grades 3-12) in order to determine promotion to the next grade level.

### **Attendance Requirements**

In remote learning students will be required to participate in a daily Zoom homeroom session (except on Friday) and will be expected to attend Zoom sessions and complete and submit assignments via the learning management system of SeeSaw K-2 or Google Classroom 3-12.

### **Progress Monitoring**

Progress will be monitored via formative and summative assessments as well as using iReady in some grade levels.

### **Equitable Access to Instruction**

#### **A. Devices**

- The district will follow the 1-to-1 device plan and provide district owned devices to all students PreK-12
- For tech support parents can:
  - Complete this [form](#)
  - Or call 216.529.4088

#### **B. WiFi**

- The district will do its best to help families establish WiFi services. Families who do not have WiFi should reach out to their building principal.
- Parents interested in using Cox Communications for low cost internet can obtain more information [here](#).
- Parents unable to obtain low cost internet from Cox will work through their principal to obtain a hot spot. Proof of denial may be required.
