

**Remote Learning Plan - Madison Avenue School of Arts -1511 Madison Ave.
Toledo, Ohio 43604
6-30-2020
IRN#- 009955**

Each scenario highlighted below as Plan A, B, & C will be addressed below in the remote learning plan for Imagine Madison Avenue School of Arts.

Plan A- All students and staff return to school as normal without any modifications to the normal school day.

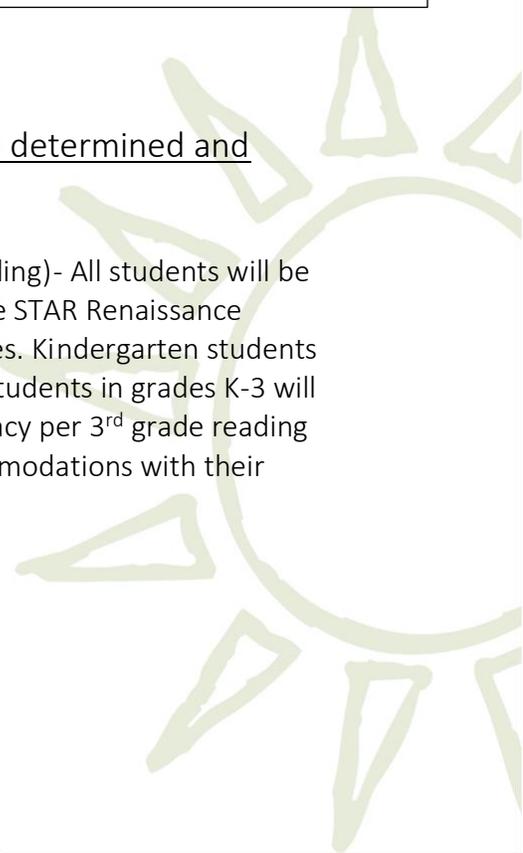

Plan B (Hybrid model)-All staff returns to school M-F and students return to school based on the following schedule in an effort to limit the number of students in the building to ensure the proper social distancing per CDC recommendations within the classrooms. Students will complete 60% of instruction remotely and 40% of instruction on site.

Cohort A of students – (½ the student population) will attend school on-site Monday and Tuesday and complete online assignments/instruction on Wednesday and Thursday. (Cohort B) (½ the student population) will attend school on-site Wednesday and Thursday and complete online assignments/instruction on Monday and Tuesday. On Friday, all students in cohort A and B will stay home and complete their online assignments. The teaching staff would report to work on Fridays to attend lesson planning team meetings with their grade level and vertical planning meetings, TBT meetings, and CSLT meetings lead by the Principal and the Academic Coach.

Plan C (100% Remote Learning)- All students will receive instruction via a daily remote learning platform. Teachers will attend lesson planning team meetings with their grade level and vertical planning meetings, TBT meetings, and CSLT meetings remotely led by the Principal and the Academic Coach.

A description of how student instructional needs will be determined and documented

Plan A (customary return with all students and staff present in the building)- All students will be assessed as normal the first 2 weeks of the academic calendar using the STAR Renaissance Platform to determine their current academic strengths and weaknesses. Kindergarten students will complete the KRA assessments by the November 1st deadline. All students in grades K-3 will be assessed using the Ohio Diagnostic screeners to determine K-3 literacy per 3rd grade reading guarantee mandates. Students with disabilities will receive their accommodations with their assigned intervention specialist.

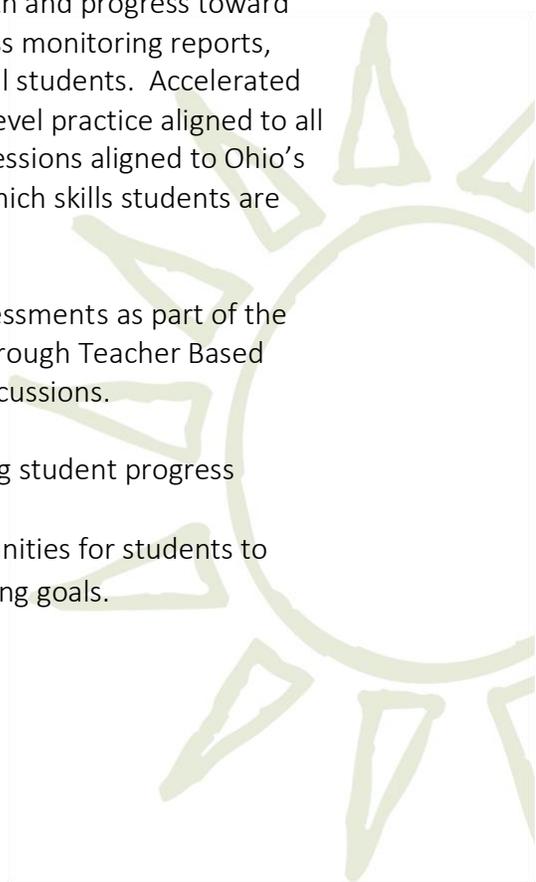

Plan B (hybrid model return)- Student mastery will be assessed in the days that they are on-site with their classroom teacher. Instructional activities to enhance the onsite instruction will take place during the 3 days that the students are off site. Pre and post assessments will be utilized to determine the needs of each student. The data will be documented and collected during our Friday TBT meetings. At the end of each quarter of learning, the students will receive a standards-based report card highlighting their areas of strength and weakness based on their growth from the documented pre and post assessments. Students with disabilities will work with their assigned intervention specialist during their on-site days in addition to receiving additional assistance during their assigned online remote learning days during the week. Students with disabilities will receive work to meet their instructional needs and access to teletherapy or equivalent virtual services to provide access to other related services.

Plan C (100% remote learning)- The following is a brief description of the screening diagnostic, formative and summative assessments used to evaluate student knowledge and skills. The school will continue to participate in all necessary diagnostic, formative and summative assessments to determine and document student instructional needs. The school also participates in STAR Renaissance (STAR Reading, STAR Early Literacy, and STAR Math) **quarterly** to monitor student academic progress and school-wide trends. In addition to quarterly benchmark assessments, the school more frequently assesses students within Tier II and Tier III of the MTSS process.

STAR Renaissance has adapted all programs including Accelerated Reading, Freckle Math and Freckle Reading to support **both on-site and remote administration and student use**. Within a remote setting, the school will continue to use STAR Renaissance (Star Reading, Star Math, Star Early Literacy) to support comprehensive benchmark and formative assessments for screening, monitoring student mastery of standards and individual student growth and progress toward personalized learning goals. The school also uses Renaissance progress monitoring reports, instructional planning reports and Individual student goal setting for all students. Accelerated Reader and Freckle Math and Reading provide adaptive and mastery level practice aligned to all Ohio standards. All Renaissance programs incorporate learning progressions aligned to Ohio's standards to show skills and standards students have mastered and which skills students are ready to learn next.

Teachers will continue to utilize regular formative and summative assessments as part of the instructional cycle and/or as part of the Ohio Improvement Process through Teacher Based Teams (TBTs) and regular collaborative planning and targeted data discussions.

As presented above, the following considerations will support on-going student progress monitoring and individual growth within a remote setting.

- Establish regular check-ins (student conferencing) and opportunities for students to share work, collaborate, ask questions and set individual learning goals.
- 

- Provide different modes and tools to provide ongoing, targeted and meaningful feedback.
- Support student's ability to self-asses their own growth within established learning activities. (e.g. use of exemplars, videos of demonstrations, self-assessment rubrics or peer evaluation)
- Adapt formative assessment methods, and the ways in which evidence of student learning is collected (e.g. this may include using digitally based strategies to formatively assess and gauge student progress).

In the absence of online opportunities, using phone calls or emails to measure student's achievement and progress.

The method to be used for determining competency, granting credit, and promoting students to a higher-grade level

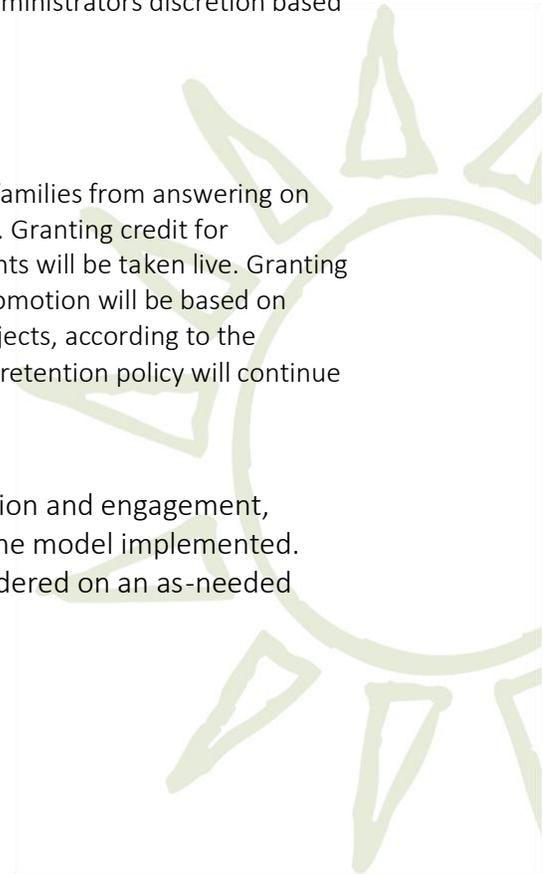

Plan A In-Person/Traditional Brick and Mortar: Competency is determined through in-class work and assessments. Granting credit for assessments and in-class work will be based on the school's current grading system. The school's current board approved promotion and retention policy will continue to guide decisions.

Plan B Hybrid Model: Competency is determined through in-person assessments. Granting credit for assessments and in-class work will be based on the school's current grading system. Granting credit for online practice (example: Freckle) will be a participation grade. Promotion will be based on completing **70%*** of online work as well as being proficient in **3** or more subjects, according to the student's report card. The school's current board approved promotion and retention policy will continue to guide decisions. Individual decisions or promotion or retention can be made at administrators discretion based on student individual needs.

Plan C 100% Virtual (or Online) Academy

Competency is determined through live zoom discussions to deter parents/families from answering on behalf of students and to get a true understanding of what they understand. Granting credit for assessments will be based on the schools current grading system, assessments will be taken live. Granting credit for online practice (example: Freckle) will be a participation grade. Promotion will be based on completing **70%*** of online work as well as being proficient in 3 or more subjects, according to the students report card. The school's current board approved promotion and retention policy will continue to guide decisions.

Note: In order to maintain a high-level of rigor and student participation and engagement, schools will expect 100% completion and participation regardless of the model implemented. However individual student circumstances will be reviewed and considered on an as-needed basis.

Additional considerations for determining competency and individual student growth includes the following:

- Establish regular check-ins (student conferencing) and opportunities for students to share work, collaborate, ask questions and set individual learning goals.
- Provide different modes and tools to provide ongoing, targeted and meaningful feedback.
- Support students' ability to self-asses their own growth within established learning activities. (e.g. use of exemplars, videos of demonstrations, self-assessment rubrics or peer evaluation)
- Adapt formative assessment methods, and the ways in which evidence of student learning is collected (e.g. this may include using digitally based strategies to formatively assess and gauge student progress).
- In the absence of online opportunities, using phone calls or emails to measure student's achievement and progress.

The school's attendance requirements, including how the school will document participation in learning opportunities

Plan A (customary return with all students and staff present in the building)- Attendance will be documented using the compulsory attendance legislation as a guide. Each teacher will keep track of the student's attendance daily.

Plan B (hybrid model return)- Classroom teachers will document attendance during the scheduled days that the students are required to attend school on-site and off-site. If a student is not present or participating in the on-line learning opportunities, the teacher will make the administrators aware and a parent meeting will be scheduled to identify the barriers and or supports needed to ensure participation during the online learning opportunities. Teachers and intervention specialist will utilize an attendance tracking sheet for all students. If a student has missed a considerable amount of time, on site or off site, we will contact the parent/guardian immediately.

Special Education Support Services:

- Continue to contact parents
- Document all interventions
- Maintain all paperwork and meet deadlines
- Participate in weekly team meetings with the grade level teams during TBT and planning meetings

Plan C (100% remote learning)-Classroom teachers will document all student participation in online learning activities. We will fully implement the 3-day rule and the students will be reported to the administrators if they are not in attendance for 3 consecutive online instructional activities. If a student misses 3 consecutive remote learning activities, our parent liaison will set up a meeting with the student's parents to determine the root cause linked to the lack of participation in the remote learning opportunities. Student attendance will be tracked and reported weekly using the attendance tracker. Teachers and intervention specialist will utilize an attendance tracking sheet for all students. If a student has missed 3 consecutive days, on site or off site, and the parent has failed to meet with the truancy officer the School Leader and the Parent Liaison will perform a well check at the students documented address. If they are unable to make contact, they will enlist the help of the local authorities to perform well checks.

Special Education Support Services:

- Continue to contact parents
- Document all interventions
- Maintain all paperwork and meet deadlines
- Participate in weekly team meetings with the grade level teams during TBT and planning meetings

ATTENDANCE REQUIREMENTS AND DOCUMENTATION OF LEARNING OPPORTUNITIES

The school will document evidence of student attendance and participation. Classroom teachers will be responsible for assigning and tracking student participation in a set number of hours per week and taking such attendance daily. Attendance and participation will be "reported" in EMIS as actual time (i.e., hours). In other words, the method of tracking time will need to be converted into estimated hours of participation when students are engaged in individual learning.

Each day, students will participate in both synchronous lessons (Live online and conducted in real-time) and asynchronous lessons (pre-built instruction and course components, allowing students to complete them at the time and pace of their choosing) during both on-site and virtual days. The school will communicate daily and weekly expectations for student participation and emphasize that multiple approaches will be used to ensure student engagement.

During synchronous learning time, student attendance will be track similar to in-person learning based on the number of hours the student is participating in such learning.

During asynchronous learning time, evidence of participation (or lack thereof) will be monitored.

For students in the building, standard attendance taking procedures should be applied daily as in the past. For students working remotely on any given day, their attendance will be tracked and monitored using one or more of the following processes:

- Engagement with online learning as evidenced by logging in to online classes, curriculum, work activities, or similar.
- Attendance in Classes and Tutoring sessions
- Attendance in online classes
- Attendance in online collaborative learning groups

- Participation in projects assigned by the school
- Participation in tutoring and/or academic guidance via phone, or by teacher/student correspondence via email, text, or other communication tools available to both students and teachers.

The School will continue to follow the requirements regarding automatic withdrawal of students who fail to participate in 72 consecutive hours of learning opportunities.

A statement describing how student progress will be monitored

Plan A (customary return with all students and staff present in the building)-Student progress will be monitored using the quarterly benchmark assessments via the STAR Renaissance Learning Assessment Platform. In addition, formative and informative classroom assessments will be utilized to monitor student progress. Pre/post assessments will also be analyzed during weekly TBT meetings following the 5-step process protocol to determine student mastery of the Ohio Learning Standards. Parents will be able to contact teachers via the class dojo app, email, and phone if they need to contact the teachers. Parents will receive quarterly interim reports half way through each quarter of learning and report cards at the end of each quarter of learning.

Plan B (hybrid model return)-Classroom teachers will assess students for mastery of the Ohio Learning Standards during the designated on-site learning days for each student via pre/post assessments as a measure of growth. Students will complete benchmark assessments quarterly to determine growth and mastery of the grade level common core standards. Remote learning opportunities will be monitored and tracked immediately following the completion of on-line assignments. Parents will be able to contact teachers daily during their office hours. In addition, virtual appointments can be set up with classroom teachers if the parents need to set up to times that are more accommodating to their schedules.

Plan C (100% remote learning)- Classroom teachers will schedule weekly pre/post assessments with the students every Friday to determine mastery of the Ohio Learning Standards. Teachers will meet with students throughout the week to provide instruction to the students in an effort to prepare them for the scheduled Friday assessments to determine mastery/ non-mastery of the Ohio Learning Standards.

A description as to how equitable access to quality education will be ensured

Within a remote learning environment, ensuring equitable access to students will require considerations and discussions focused on the following: student access of technology, home learning environment and setting, student learning and engagement, attendance, modality of communications and assessment of student growth and achievement:

The school will conduct regular and ongoing family surveys to gauge accessibility needs and family experiences in a remote setting. The school will analyze survey data to adjust remote learning plans as needed to ensure equitable access within the school community. The school will focus on the following areas to support equitable access within the school community.

1. Technology access (hardware and connectivity) Do they have access to the internet? Do they have access to a device or what alternatives exist for them to access a device? How familiar are students with the device and necessary support to ensure they are familiar with navigating its features?
2. Capacity of families to support students' educational needs and provide a learning environment conducive to student growth and achievement in a remote setting.
3. Transportation, meals and child care concerns
4. Individual family health concerns and fears related to the COVID-19 pandemic

Student support teams and additional services may need to be developed to support non-engaged students and families.

Plan A (customary return with all students and staff present in the building)- Every student will receive access to the learning opportunities at Imagine Madison Monday-Friday. Every student is provided with free transportation and access to attend Imagine Madison.

Plan B (hybrid model return)-As the students complete their remote learning assignments, they will have the option to borrow a device if they are without the proper computer hardware to access their lessons via our remote learning platform. In addition, we have partnered with Buckeye Broadband Cable to provide free internet to any of the students at Imagine Madison that are without internet in their homes. We will also provide breakfast and lunch on the days that the students are scheduled to complete their remote learning assignments off site. The staff can be contacted for communication through emails, phone calls, Class Dojo, Monday-Friday during their evening office hours. Parents may set up an appointment at another time if they require another time outside of normal office hours if needed.

Plan C (100% remote learning)- Every student will be provided with the option to borrow a device in an effort to ensure that they are able to access the remote learning opportunities that we are providing. In addition, Buckeye Broadband will offer our students free internet if they are without internet service in their homes. Students will be provided with access to breakfast and lunch at designated stops throughout our area to ensure food security during the remote learning opportunities.

A description of the professional development activities that will be offered to teachers

- Google classroom training
- Helping teachers develop remote learning PD
- Online digital learning platforms
- Distant Learning instructional resources
- Equity workshops
- Weekly Job Embedded PD – TBT utilizing the 5-step process
- Monthly building leadership job Embedded PD- CSLT
- PD based on the current needs and observations within the building
