

Mississinawa Valley Local Schools

Remote Learning Plan

2020-2021

Administrative Plan and Policies

In the future, Mississinawa Valley Local Schools may need to offer an online/remote learning program for all or some students depending on need, especially in light of the COVID-19 pandemic that occurred during the last 11 weeks of the 2019-2020 school year where students and teachers transitioned to online/remote learning.

The following guidelines and procedures outline the district's remote learning program.

Individualization of Student-Centered Learning Models:

Each student is assigned a Google email account that allows access to tools and programs that can be differentiated and monitored for each child. Teachers can share printed text, video clips, instructional displays, etc., via *Google Classroom*, *Google Forms*, and *Google Docs*. The teacher and student can interact live using Google Hangouts and sessions can also be recorded and shared for later reference. Written documents can be shared through these means as well.

The district may utilize existing programs that it has obtained software licensure for such as Study Island or iReady. The district may also contract with an outside vendor such as Edgenuity to provide online/remote learning opportunities to our students.

Quality of Online Curriculum:

The district will strive to implement the same high quality instruction for those students learning in an online/remote learning environment as those students who are being instructed in the physical classrooms of the district.

Assessment of Student Progress:

For online programs like Study Island or iReady, the teacher or teacher-based teams will work with the administration to set up proficiency standards.

For other courses common assessments will be developed by the teacher or teacher-based teams.

Student/Teacher Ratios:

The district will adhere to the guidelines set forth by the Ohio Department of Education on ratios. Typically per subject/per grade the ratio is less than 1:25.

Student Access to Digital Learning Tools:

All enrolled Mississinawa Valley students have access to the software programs and online learning platforms using their email account and student ID information. Each student will have access to a mobile device, such as a Chromebook.

Online Security:

Each student login is tracked and device use is monitored by the Securly program.

Teacher Training:

Teachers are offered training in the use of Google tools, best practices in remote learning, and flipped classrooms. Families may also need training on how to support their children in remote learning.
