Annual Report on
Ohio Community Schools**

**Submitted to the Governor
and Select Members of the Ohio Legislature**

**The Office of Community Schools
Columbus, Ohio
December 31, 2005**

2004-2005 Annual Report on Ohio Community Schools

The Office of Community Schools of the Ohio Department of Education is pleased to submit the third annual report on community schools operating in Ohio. This report is submitted for the 2004-2005 school year in compliance with Section 3314.015(A)(3) of the Ohio Revised Code, as amended in Substitute House Bill 364. The related passage reads:

By December thirty-first of each year, issue a report to the governor, the speaker of the house of representatives, the president of the senate, and the chairpersons of the house and senate committees principally responsible for education matters regarding the effectiveness of academic programs, operations, and legal compliance and of the financial condition of all community schools established under this chapter.

Ohio Community School Overview

Community schools (often called "charter schools" in other states) are public, nonprofit, nonsectarian schools that operate independently of any school district but under a contract with a sponsoring entity that is established in statute or approved by the Ohio Department of Education. Community schools are public schools of choice and are state and federally funded. These schools are designed by statute to trade higher levels of accountability for greater flexibility in programs and often serve a limited number of grades or target a specific student population. There are two types of community schools. Conversion community schools, those in which part or all of an existing traditional public school is transformed into a community school, may be sponsored by any public school district in the state, with the exception of Joint Vocational School Districts. The second category, new start-up community schools, may be located only in "challenged school districts," presently defined as the big eight urban public school districts (Akron, Canton, Cincinnati, Cleveland, Columbus, Dayton, Toledo, and Youngstown), and districts designated as being in academic emergency or academic watch.

Enactment of Legislation

Early Legislation

In June of 1997, with the enactment of Amended Substitute House Bill 215, a "pilot" community school program was established in Lucas County. The Lucas County Educational Service Center and the University of Toledo were authorized as community school sponsors. The bill allowed for the creation of new start-up and conversion community schools. New start-up community schools were allowed only in the Lucas County pilot study area. Conversion community schools were allowed statewide by this bill.

Amended Substitute Senate Bill 55, enacted in August of 1997, expanded the community school program beyond the Lucas County pilot study area, including the State Board of Education as a sponsor and allowing for the creation of new start-up community schools within the big eight urban public school districts of Ohio. House Bill 282, enacted in June of 1999, allowed for the expansion of start-up community schools to within the 21 largest urban public school districts (all big eight districts plus Cleveland Heights, East Cleveland, Elyria, Euclid,

Hamilton, Lima, Lorain, Mansfield, Middletown, Parma, South-Western, Springfield, and Warren) and, beginning in the year 2000, to any school district determined to be in “academic emergency.”

Substitute House Bill 364

Substitute House Bill 364, which became effective on April 8, 2003, shifted the role of the State Board of Education from sponsor of community schools to authorizer of community school sponsors. However, the bill did permit the State Board of Education to continue as sponsor for those community schools it had previously approved for up to two school years (until June 30, 2005) to allow the schools time to seek new sponsors. After June 2005, the State Board of Education may only sponsor community schools in specified exigent circumstances (e.g. if a sponsor’s authority to sponsor community schools is revoked). Substitute House Bill 364 also redefined sponsorship eligibility for start-up community schools to include any of the following public entities: (1) Public School Districts; (2) Educational Service Centers; (3) the thirteen State Universities offering four year programs; (4) qualified tax-exempt entities under section 501(c)(3) of the Internal Revenue Code as long as they have: (a) been in operation for at least five years prior to applying to be a community school sponsor; (b) assets of at least five hundred thousand dollars; and (c) been determined by the Ohio Department of Education to be an education oriented entity under division (B)(3) of section 3314.015 of the Revised Code. Any eligible entity may seek approval from the Ohio Department of Education to become a sponsor of start-up community schools. Any entity that had already sponsored a community school on or before April 8, 2003 was “grandfathered” as an approved sponsor of start-up community schools.

Substitute House Bill 364 expanded the location of new start-up community schools with the inclusion of “academic watch” districts to the definition of “challenged school districts.” Under Substitute House Bill 364, challenged school districts included any: (1) school district that is part of the Lucas County pilot study area; (2) school district that is in either a state of academic emergency or a state of academic watch under section 3302.03 of the Revised Code; (3) big eight school district (Akron, Canton, Cincinnati, Cleveland, Columbus, Dayton, Toledo, and Youngstown); and/or (4) urban 21 school district (all big eight districts plus Cleveland Heights, East Cleveland, Elyria, Euclid, Hamilton, Lima, Lorain, Mansfield, Middletown, Parma, South-Western, Springfield, and Warren). Substitute House Bill 364 limited the total number of new non-district sponsored start-up community schools to 225 until July 1, 2005.

Amended Substitute House Bill 95

House Bill 95, which became effective on June 26, 2003, allowed Educational Service Centers to sponsor community schools in any challenged school district including those challenged school districts that are not located within the Educational Service Center’s territory.

Amended Substitute House Bill 3

House Bill 3, which became effective on August 15, 2003, redefined “challenged school districts” to include only: (1) school districts that are part of the Lucas County Pilot Study Area; (2) school districts that are in either a state of academic emergency or a state of academic watch; and (3) big eight school districts (Akron, Canton, Cincinnati, Cleveland, Columbus, Dayton, Toledo, and Youngstown). Thus, this bill eliminated urban 21 school districts that are

not also big eight school districts or in academic emergency or academic watch from the definition of challenged school districts. However, the bill permits existing start-up community schools established in urban 21 school districts, not otherwise meeting the definition of a challenged school district, to continue operation. House Bill 3 also required the State Board of Education to recommend standards governing the operation of virtual community schools to the General Assembly no later than September 30, 2003. The department developed these recommendations which were approved by the State Board of Education and given to the General Assembly in September 2003.

House Bill 66

House Bill 66, the biennial budget bill, was passed in July of 2005 and is effect until July of 2007.

Accountability for Community Schools

House Bill 66 expanded accountability for community schools. The legislation requires all community schools to report on their special education and related services as well as their expenditures for those services. Internet- or computer-based schools are also required to submit a separate report detailing their plans for the provision of special education and related services.

House Bill 66 requires additional assessments for certain community schools starting in the 2006-2007 school year. Additionally, it requires the establishment of reasonable standards for expected gains in achievement for community schools taking the additional assessments and for those community schools' graduation rates.

The legislation requires internet- or computer-based schools to provide testing locations within 50 miles of each enrolled student's residence. Internet- or computer-based schools are required to withdraw students who fail to participate in state mandated assessments. Additionally, under House Bill 66, internet- or computer-based schools may not receive state funding for students who have failed to participate in state mandated testing for 2 consecutive years. However, the parents of such a student may elect to enroll their child in an internet- or computer-based school if the parent pays tuition to the school equal to the amount of state funds the school would have received for the student.

Prior law provided that conversion school data be rolled up into the sponsoring district's data for the purpose of creating the sponsoring district's Local Report Card. Under House Bill 66, this provision no longer applies to conversion community schools that enroll students between ages 16-22 who have either dropped out, or are at risk of dropping out, of school.

Community School Growth

This bill placed two caps on the growth of community schools in Ohio such that only 30 new start-up community schools sponsored by non-Local Education Agencies (LEAs) and 30 new start-up community schools sponsored by LEAs, over and above the number of such community schools open as of May 1, 2005, could open until July 1, 2007. The bill required that a lottery be held to determine the order in which schools would be able to open. Schools eligible for the lottery were those that intended to open in the 2005-2006 school year. A moratorium on internet based community schools was also introduced and will

remain in effect until the enactment of internet- or computer-based school standards by the general assembly. Community school contracts for internet based community schools that were not open for instruction as of May 1, 2005 are void as a result of House Bill 66.

Operator Provision

House Bill 66 introduced an operator provision which currently applies to district and non-district sponsored start-up community schools and will apply to conversion internet- or computer-based community schools when the moratorium on internet -based schools ends. The operator provision permits a governing authority to open a new community school over the before mentioned community school cap in partnership with an operator--an organization that manages the daily operations of a community school pursuant to a contract with the school's governing authority--that has operated an academically successful community school based on the most recent Local Report Card rating. The number of such schools that an operator may open under this provision may not exceed the number of community schools, excluding site-based conversions, managed by the operator, which are rated as excellent, effective or continuous improvement. The successful school used to justify opening a new school may be used as such only one time.

Sponsorship Limits

Prior to House Bill 66, law did not limit the number of community schools that could be sponsored by an individual community school sponsor. House Bill 66 allows sponsors that sponsored 50 or fewer schools, open as of May 1, 2005, to continue sponsoring up to 50 schools. Sponsors that sponsored more than 50, but less than 75 schools, open as of May 1, 2005, are permitted to continue sponsoring those schools. However, those sponsors are not eligible to sponsor any additional schools and their approved number of schools will decrease by one for every school that permanently closes until the number of schools sponsored is 50. Sponsors that had more than 75 schools, open as of May 1st, 2005, are permitted to continue sponsoring those schools until June 30, 2006. After June 30th 2006, the sponsor is capped at 75 schools. And the approved number of schools shall decrease by one for every school that permanently closes until the number of schools sponsored is 50.

New Sponsor Requirements

New sponsor requirements were established such that any sponsor approved by Ohio Department of Education after July 1, 2005, must have a record of financial responsibility and demonstrate successful implementation of educational programs. Additionally, if the sponsor applicant operates or sponsors community schools in another state, at least one of those out of state schools must be performing as well as or better than Ohio schools in academic watch, as determined by Ohio Department of Education

Community School Contracts

House Bill 66 made several changes to community school contracts. New community school contracts for both new start-up and conversion community schools shall be adopted no later than the March 15th prior to the school year in which the community school intends to open. Beginning in the 2006-2007 school year, community schools must open for operations no later than September 30th, unless the school's mission is solely to serve dropouts. Unopened community school contracts expire within one year.

Map of Community School Locations in Ohio

Figure 1 indicates the locations of the 269 community schools operating in Ohio during the 2004-2005 school year.

Figure 1. Map of Ohio's Community School Locations during school year 2004-2005.

Operations and Funding

Tables 1 through 3 present information concerning the operations of community schools in Ohio. Table 1 presents the enrollment history for community schools from the 1998-1999 through the 2004-2005 school years. Enrollment at community schools is counted differently than enrollment at traditional public schools. In traditional public schools, the enrollment is reported at a single point in time, usually the first full week in October. Community school enrollment is reported monthly, through a web-based program called the CS-ADM.

Funding for traditional public schools and for community schools is also calculated differently. For traditional districts, funding for the entire year is based upon the number of students enrolled in the district at the time the count is taken. For community schools, funding is calculated for the year and adjusted monthly, based on changes in student enrollment.

Originally, community school funding was calculated based upon manual reporting of enrollment using a paper-based process. Community school funding is now calculated based upon the number of Full Time Equivalent (FTE) students enrolled at each community school and reported through the web-based system. These monthly enrollment reports are provided online for immediate review by the public school districts of residence. Enrollment discrepancies, flagged by the traditional public districts, halt funding to the community schools for the students in question. Unlike traditional districts, which are funded based upon a head count at a point in time, community schools are funded based upon the proportion of the year that each student is enrolled.

Community schools must offer a minimum of 920 hours of learning opportunities during each school year. A full-time student, in any grade other than kindergarten, who is enrolled in and attends a community school for the entire school year, has an FTE of 1.00. A kindergartener who is enrolled in and attends a community school for the entire school year has an FTE of 0.5, regardless of whether that kindergartener is educated in a full day or half day kindergarten program. If a student attends the community school for less than the entire year, the FTE is determined by dividing the total hours/days the student is enrolled by the number of hours/days that the community school is in session, as stated in the community school's contract. The resulting number would be divided in half for kindergarten students.

Table 2 presents demographic data for community schools operating during the 2004-2005 school year. Each community school's contract defines the population of students that it will serve. During the 2004-2005 school year, 163 community schools focused their educational programs toward general student populations while 106 community schools focused on at-risk student populations. In other words, 39.40 percent of community schools educated at-risk populations. Community schools educating at-risk populations ranged from: the Life Skills schools and ISUS schools that focus on high school aged students who have previously dropped out of, or are at risk of, dropping out of school; to those that focus on special populations such as autistic children (e.g. Autism Academy of Learning and M.O.D.E.L. Community School). During the 2004-2005 school year 49 conversion community schools were in operation, representing 18.22 percent of the community schools in the state. Community schools can be either virtual or non virtual. Non virtual schools are those that educate students within a "brick and mortar" building. Virtual community schools, on the other hand, have curricular programs designed to provide distance learning opportunities to students within their own homes through the use of computers and the internet. During the 2004-2005 school year, 44 of the 269, or 16.36 percent, of community schools in operation were virtual community schools. Table 2 also notes the grade levels and number of hours or days of education provided by each community school operating during the 2004-2005 school year.

Table 3 presents aggregate student demographic data for community schools operating during the 2004-2005 school year. These data indicate the racial and ethnic characteristics of each school's student body, and note the percentage of each school's students who were economically disadvantaged, had limited English proficiency, and/or had disabilities.

Academic Programs

Tables 4 through 7 present information concerning the effectiveness of community schools' academic programs and their student discipline statistics for the 2004-2005 school year. Tables 4 and 5 provide community school results on Ohio Achievement Tests taken by

students in the 3rd, 4th, 5th, 7th, and 8th grades, Ohio Proficiency Tests taken by students in the 4th and 6th grades, and Ohio Graduation Tests taken by students in the 10th grade. During the 2004-2005 school year, 4th grade students took both Ohio Proficiency Tests (math, citizenship and science) and Ohio Achievement Tests (reading and writing). The schools' attendance and graduation rates are presented in Table 6. Student discipline data, comprised of suspension and expulsion rates for the 2004-2005 school year, is displayed in Table 7. Community schools tend, on average, to have discipline rates that are on the low and high ends of the continuum compared to the student discipline rates of traditional public schools.

Legal Compliance

Each community school sponsor was asked to provide the Office of Community Schools with a rating of its schools' legal compliance status in the areas of education, finance, governance, and academic assessment and accountability during the 2004-2005 school year.

Compliance refers to the sponsor's verification of the school's adherence to the technical requirements of operating a school. While all community schools must comply with the same operational requirements, a sponsor may employ its own method for assessing compliance. Each sponsor was asked to submit its determination of its schools' operational compliance status in terms of *overall compliance*, *partial compliance* or *noncompliance*. In the case of the Ohio Department of Education, for example, determinations respecting compliance are predicated upon the elements reviewed in the schools' site visits, along with related information from internal reviews. Schools not in full compliance may come into compliance at any point after the most recent site visit, however such changes may not be captured until the next site visit. In the case of compliance elements which are critical to student health and safety, the school must come into immediate compliance or face suspension. The compliance information provided by sponsors is presented in Table 8.

Financial Condition

Community school fiscal data for the 2004-2005 school year are presented in Table 9. The Total Foundation Payment for the 2004-2005 school year is taken from the June 2005 Community School Statement of Settlement Report. Weighted Special Education and Vocational Education Payments are components of the Total Foundation Payment. For ease of reporting, all federal title funds have been aggregated by school. Also provided is the total dollar amount from the Federal Public Charter School Grant awarded to each community school during the 2004-2005 school year.

Data Comments

To provide a common pool of information, data for this report have been compiled from various sources, including the Education Management Information System (EMIS), the Local Report Card (LRC), the interactive Local Report Card Site (iLRC), LRC and Accountability Workbooks, the Office of Community Schools' site visits, annual reports from schools and sponsors, other reports from schools and sponsors, and reports from the Auditor of State. It should be noted that the Department of Education's data systems are based on the premise of a static education program. Community schools, by nature and design, are more fluid in terms of program construction, grade level and student populations than their traditional public school

counterparts. The Department has undertaken efforts to coordinate and enhance existing systems to more clearly present community school data.

Office of Community Schools Highlights 2004-2005

Sponsorship

- Evaluated 12 Community School sponsorship applications during 2004-2005 School Year
- Approved 6 New Community School Sponsors during 2004-2005 School Year
 - Ashe Culture Center, Inc.
 - Buckeye Community Hope Foundation
 - Delaware-Union Educational Service Center
 - Educational Resource Consultants of Ohio, Inc.
 - Lima City School District
 - St. Aloysius Orphanage
- Refined the sponsorship candidacy promotion and authorization process
- Co-sponsored and participated on the governing board of the Community School Sponsorship Institute

Legislative Recommendations

- Submitted legislative recommendations to improve academic accountability in the community school program

Conference Participation

- Cosponsored the Annual Statewide Community School Conference with the Ohio Charter School Association
- Participated in the US Department of Education Federal Public Charter School Grant Conference
- Participated in the US Department of Education Distance Learning Conference
- Participated in the National Center for Education Statistics 18th Annual Management Information Systems Conference

Technical Assistance

- Conducted regional and statewide technical assistance workshops covering topics including but not limited to:
 - Web-based Recruiting System Training (7 sessions)
 - Data Systems for Community Schools Workshop (5 sessions)
 - Governing Authority Workshop (1 session)
 - Finance and Grants Technical Assistance Workshop (1 session)
 - Federal Charter School Sub Grant Workshop (1 session)
 - State Grant Workshop (1 session)
 - Sponsorship Workshop (1 session)
 - Cleveland Community School Informational Meeting (1 session)
- With Regional School Improvement Managers, provided technical assistance to community schools in School Improvement Status
- Facilitated resolution of disputes related to community schools

- Conducted monthly informational meetings for virtual community schools and sponsors
- Conducted monthly regional community school meetings in Cincinnati, Cleveland and Dayton
- Conducted sponsor information sessions for potential sponsorship organizations and other interested parties
- Held regional sponsorship informational meetings
- Worked with traditional public school districts on issues regarding community schools

Contract Review

- Refined a contract review process for non-State Board of Education sponsored schools to be current with legislation
- Developed a dual lottery process for selecting the public school district sponsored and non public school district sponsored community schools able to open under the new cap on the number of community schools allowed to be in operation per House Bill 66

Contract Assignment

- Implemented a community school contract assignment process
- Assigned a total of 84 community school contracts to new sponsors, 54 of which had been sponsored by the State Board of Education

Constituent Communications

- Served as resource center disseminating community school information on local and national levels
- Received and catalogued community school contracts
- Responded to numerous formal public records requests

Grants Management

- Administered first year (FY06) of Federal renewal grant Award in the amount of \$20,589,772 from the Federal Public Charter School Grant Program (FPCSGP)
- Continued administration of the Ohio Community School Grant program. Awarded school start-up grants totaling \$1,000,000 during the fiscal period.
- Posted the aligned grants management processes to the Office of Community School web page for public access
- Refined the Ohio Community School Grant (OCSG) application evaluation process into a true peer review format
- Developed and implemented the OCSG and FPCSG application processes into the ODE Comprehensive Continuous Improvement Plan (CCIP).
- Further refined the Federal Public Charter School Grant (FPCSG) application evaluation process, enhancing the peer review format
- Refined the previously established Federal and State grant award and distribution schedules

Fiscal Management

- Continued bi-monthly review of financial reports submitted by State Board of Education-sponsored community schools. Intervention and corrective action plans were requested of and developed by schools' Governing Authority where warranted.
- Continued the review of bi-monthly financial reports of community schools not sponsored by the State Board of Education.
- Reviewed and tracked annual five-year budget forecast updates of all community schools.
- Evaluated 104 community school financial audit reports prepared by the Ohio Auditor of State. Where warranted, corrective action plans were requested of the community schools' Governing Authorities or the Sponsors of schools not sponsored by the State Board of Education.
- Provided the Auditor of State with information essential to the preparation of financial audits for 23 community schools.
- Evaluated and recommended 67 community schools for state foundation funding. 20 Community schools and school developers were approved to receive the \$50,000 Ohio Community School Grant and 58 community schools gained eligibility to receive the \$150,000 Federal Public Charter Schools Program Grant.

Operations

- Updated the State Board of Education routinely
- Maintained a System of Regional Offices
- Enhanced Office of Community Schools' website
- Processed the opening of new community schools
- Accepted the suspension of 3 community schools
- Facilitated the closing of 2 community schools
- Participated in Legislative Office of Education Oversight study and other research projects

Tables

1. Community School Enrollment History 1998-1999 through 2004-2005
2. Community School Demographic Data 2004-2005
3. Community School Student Demographic Data 2004-2005
4. Community School Third Through Sixth Grade Achievement and Proficiency Test Results 2004-2005
5. Community School Seventh through Tenth Grade Achievement and Graduation Test Results 2004-2005
6. Community School Attendance and Graduation Rates 2004-2005
7. Community School Student Discipline Data 2004-2005
8. Community School Legal Compliance 2004-2005
9. Community School Fiscal Data 2004-2005

Total FTE By School Year:	2,244.50	9,074.52	16,784.15	23,626.49	29,939.30	47,100.85	62,980.38

Note: Unless otherwise noted, 2004 - 2005 enrollment data are based on the June Community School Statement of Settlement Report. Data from the Community School Statement of Settlement Report reflect Full Time Equivalent data rather than the total number of students enrolled. Prior year enrollment data are based on the final version of the Community School Statement of Settlement Reports for each respective year with some noted exceptions. Community schools are required to have a minimum enrollment of 25 students to begin receiving foundation payments each academic school year. However, length of the school year and changes in student enrollment during the year may result in an FTE of less than 25. An FTE of less than 25 does not indicate that a school did not have an enrollment of at least 25 students.

* 2000-2001 school year FTE data for Electronic Classroom of Tomorrow are based on the June payment report for FY 2001.

** 2002-2003 school year FTE data for Electronic Classroom of Tomorrow are not available.

*** 2003-2004 school year FTE data for Cleveland Academy of Math, Science and Technology are based on the January payment report for FY04.

**** 2004-2005 school year FTE data for Mansfield Academy for Gifted Students are based on the September payment for FY05.

***** 2004-2005 school year FTE data for Life Skills Center of Dayton are not available because school did not enter data into the CS-ADM.

***** 2004-2005 school year FTE data for Maumee Bay Academy are based on the October payment for FY05.

NA Not Applicable; the school was not open.

Note: Each community school is approved to serve students in specific grade levels. Approval to serve a certain grade level does not indicate that the school actually served students in that grade level. Additionally, a number of community schools are ungraded due to the populations of students they serve.

Notes: Graduation rates are based on finalized data for 2003-2004 graduates and are taken from iLRC download files on September 1, 2005. Data for ISUS Trade and Technology Preparatory Community School of Manufacturing pulled from iLRC power report on September 1, 2005. Schools that did not offer grade 12 during 2003-2004 will not have a graduation rate reported during the 2004-2005 school year. Applicable data may not be available for schools opening very late in the academic year.

NC Not Calculated Due to Small Population Size, less than 10 students.

-- No data reported, grade level may not be applicable for school.
