

Note 1: IEP means an individual education plan required under Federal and state special education laws and regulations.

Note 2: Any fees charged to students or parents under the auspices of credit flexibility must be carefully grounded in factual reality and have sufficient and competent evidence of the calculation and purpose of all fees charged. Districts must be extremely cautious when assessing fees for participating in credit flexibility programs. The Department reserves the authority to review instances where issues arise regarding the issuance of fees in this program.
