Career Awareness

As a result of the Innovative Strategies Grant from the Ohio Department of Education, Lockland Local Schools will plan and deliver instructional opportunities for grades 7-12 that will allow all students to learn about various careers, understand pathways aligned to their interests and to understand the connections between college and career readiness and core content knowledge through the utilization of web-based and digital resources. Lockland Local Schools will also plan and deliver instructional activities that provide all students with information relevant to the requirements, training and experiences needed to obtain a job in a chosen career path. Lastly, Lockland Local Schools will plan and implement a field experience opportunity for all students in grades 7-12 twice per year, inclusive of local colleges, universities and businesses.
