Solving your challenges. Simplifying your life.

Directions

- Go to <https://reportcard.education.ohio.gov>
- Click on the **triple bar** ≡ drop-down and **Advanced Reports**
- Click on the **Begin** box
- Need to generate and use 2 sets of reports:
 - **Enrollment** by Student Demographic (Building or District)
 - **Discipline Occurrences** (Building or District)
- Use OH PBIS Disaggregated Discipline Template with these reports to generate graphs

Advanced Reports

These reports are available for people interested in taking a deeper look at the Ohio Department of Education's data. With the advanced reports, you are able to:

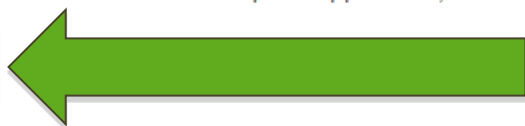

- Find data for more than one Ohio school district or building
- Find the "numbers behind the data"
- Print standard reports and graphs
- Download or save the reports on your computer

Running a report is generally a three step process:

1. **Select the type of report in which you are interested.** Reports are categorized into folders based on their content, such as "Test Results" or "Student Attendance". Clicking on a folder will show you a list of reports inside that folder.
2. **Select the report you would like to run.** Reports are typically named to indicate their content and level of detail, such as whether the data is presented at district or school level, or whether the data can be disaggregated by student demographic attributes (e.g. race or gender). Clicking on a report name will launch the report.
3. **Answer the report's prompts.** Most reports will prompt you for some qualifying information, such as the school year(s) and district(s) you want to see on the report. Answer these prompts for information by making selections from a list box. When you have made at least one selection for each required prompt, click the "Run Report" button at the bottom of the page.

Click the "Begin" button to launch the Advanced Reports application, which will open in a new browser tab or window.

Enrollment (Building)

Enrollment for a district, calculated as a yearend ADM. User can select school years, districts, and a student disaggregation.

Enrollment (State)

Enrollment for a district, calculated as the yearend ADM from the most recent EMIS yearend data. This report can be useful during the EMIS data verification process.

Enrollment By Student Demographic (District)

Enrollment for a district, calculated as a yearend ADM. User can select school years, districts, and a student disaggregation.

Enrollment (District)

Enrollment for a district, calculated as the yearend ADM from the most recent EMIS yearend data. This report can be useful during the EMIS data verification process.

Enrollment By Student Demographic (Building)

Enrollment for a district, calculated as a yearend ADM. User can select school years, districts, and a student disaggregation.

Enrollment By Student Demographic (State)

Enrollment for a district, calculated as a yearend ADM. User can select school years, districts, and a student disaggregation.

Return to Report Page

- Click Back Button once
- Run Report and Print Report of Expulsions, Suspensions, and Other Disciplinary Actions for each student demographic:
 1. Disability Flag
 2. Student Gender
 3. Student Race
 4. Economic Disadvantaged Flag
 5. English Learner Flag

Disaggregated Discipline Template

- Enter data from each report into gray boxes on *School Name* tab.
- Select Tabs on bottom for each of 6 different graphs and edit Title of each to reflect District or Building Name and School Year.
- Save file.

Disaggregated District Data Graphs

Build These Graphs By:

- Following the same series of steps, with the exception of running and printing **District** reports (see next 2 slides), and
- Using the same OH PBIS...Template, disaggregated data graphs can be built and printed for **District** Leadership Teams to use in Stage 1 and Stage 3 of the **OIP**.

Enrollment (Building)

Enrollment for a district, calculated as a yearend ADM. User can select school years, districts, and a student disaggregation.

Enrollment (State)

Enrollment for a district, calculated as the yearend ADM from the most recent EMIS yearend data. This report can be useful during the EMIS data verification process.

Enrollment By Student Demographic (District)

Enrollment for a district, calculated as a yearend ADM. User can select school years, districts, and a student disaggregation.

Enrollment (District)

Enrollment for a district, calculated as the yearend ADM from the most recent EMIS yearend data. This report can be useful during the EMIS data verification process.

Enrollment By Student Demographic (Building)

Enrollment for a district, calculated as a yearend ADM. User can select school years, districts, and a student disaggregation.

Enrollment By Student Demographic (State)

Enrollment for a district, calculated as a yearend ADM. User can select school years, districts, and a student disaggregation.

Discipline Occurrences (Attending Building <= 2017)

Discipline incident counts by type and reason for districts, calculated from the most recent EMIS yearend data. This report can be useful during the EMIS data verification process.

Discipline Occurrences (Attending Building, State Level <= 2017)

Discipline incident counts by type and reason for districts, calculated from the most recent EMIS yearend data. This report can be useful during the EMIS data verification process.

Discipline Occurrences (Incident Location, District Level >= 2018)

Discipline incident counts by type and reason for districts, calculated from the most recent EMIS yearend data. This report can be useful during the EMIS data verification process.

Discipline Occurrences (Attending Building, District Level <= 2017)

Discipline incident counts by type and reason for districts, calculated from the most recent EMIS yearend data. This report can be useful during the EMIS data verification process.

Discipline Occurrences (Incident Location, Building Level >= 2018)

Discipline incident counts by type and reason for districts, calculated from the most recent EMIS yearend data. This report can be useful during the EMIS data verification process.

Discipline Occurrences (Incident Location, State Level >= 2018)

Discipline incident counts by type and reason for districts, calculated from the most recent EMIS yearend data. This report can be useful during the EMIS data verification process.
