Members of the Ohio Standards for School Treasurers and School Business Managers Writing Team

Members of the Ohio Standards for School Treasurers and School Business Managers writing team included Ohio school treasurers and school business managers representing districts statewide – large and small, urban, suburban and rural. The writing team also included representatives from the Ohio Association of School Business Officials (OASBO), the Ohio School Boards Association (OSBA), the Ohio Educator Standards Board (ESB), the Ohio Department of Education (ODE) and the Office of the Ohio Auditor of State (AOS). In addition, other Ohio stakeholders were provided with online and face-to-face opportunities to review and provide feedback during various stages of development of the standards.

Section One: Ohio Standards for School Treasurers

The development of the *Ohio Standards for School Treasurers* was a collaborative effort that included the Ohio Educator Standards Board (ESB), the ESB Standards Committee, the ESB Subcommittee for School Treasurers and Business Managers and the Ohio Association of School Business Officials (OASBO). This cross section of Ohio school professionals worked together with the goal of defining the role and responsibilities of the school treasurer, while asserting the level of quality to be accepted as the norm in the performance of the school treasurer’s duties. This is being done with the understanding of the importance of the role of the fiscal office in the realm of education.

These *Ohio Standards for School Treasurers* will serve as:

- An overview of the expectations of leadership, management, communication, collaboration and professionalism for Ohio’s school treasurers;
- An instrument for the effective professional development of school treasurers; and
- Criteria for measurement of standard compliance.

The fiscal accountability demands of the 21st century are imposing. The financial stability of a school district is crucial in the education of Ohio’s students. An effective treasurer is an essential team member in striving for excellence in education.

Please note that the treasurer operates in different capacities from district to district and although these standards are the mainstay of the roles and responsibilities of the treasurer, he/she has a subset of unique roles in each school district. It would be unrealistic to assume that throughout Ohio each treasurer serves with identical functionality. The Ohio Revised Code (ORC) is prescriptive in the legal duties of the Chief Fiscal Officer of a school district, but operationally, treasurers serve various roles. Treasurers’ roles and responsibilities are often based on the size of the district and the number of corresponding administrators who may assume some of the duties outlined in this document.

Roles and Responsibilities of the School Treasurer

The role of an effective treasurer encompasses a multitude of responsibilities, each essential to the fiscal health of the district. Treasurers are:

- **Fiscal leaders and advisors** who provide sound financial guidance that assists the district leadership team in the decision-making process;
- **Financial managers** who clearly understand the economic resources and collaborate with district leadership in their management;
- Managers of capital and financial assets who, through their fiscal leadership, are charged with the guardianship of these assets;
• Communicators and collaborators who disseminate and articulate the financial status of the district; and
• Professionals who adhere to established ethical standards.

School treasurers are entrusted with protecting the fiscal health of the district. To perform these roles and responsibilities, they must execute their duties with the utmost conscientiousness, collaboration and ethical behavior; additionally, they must possess an extensive set of skills and knowledge. Treasurers exhibit the dispositions of effective leadership through collaboration. Treasurers lead by demonstrating and nurturing high levels of trust based on their competence, integrity, ethics and high expectations.

Introduction to the Standards

Ohio Standards for School Treasurers delineate the knowledge and skills of effective school treasurers. These standards are not minimal expectations, but a framework upon which treasurers are to construct additional knowledge and practical skills for their district. Treasurers who work within the framework of these standards should expect to see higher performance for themselves and their districts.

These standards convey the expectations, practices and roles that the State Board of Education believes school treasurers play in contributing to an effective and collaborative district and state education culture. Particularly within the district system of education, administration and leaders serve as stewards of the funds, capital and financial assets entrusted to them to achieve the district’s strategic plan, including high achievement for all students.

Who is the Audience for this Document?

The purpose for articulating clear, statewide standards is to assist school treasurers in guiding their own professional learning. Along with this document, other companion guides and technical manuals have been developed and released to assist Local Professional Development Committees (LPDCs), districts and professional organizations with creating and implementing professional development plans and programs for treasurers. Additionally, this document is intended to assist individual treasurers in self-assessing their performance, collaboratively discussing self-assessment results with peers and using these data points to develop Individual Professional Development Plans (IPDP).
Introduction

Organization and Structure of the Standards:

Each standard is organized as follows:

- **Standard**: The Standard expresses a definable goal or area of responsibility of school treasurers.
- **Narrative Summary**: The Narrative Summary more fully describes the content of and rationale for each Standard.
- **Elements**: The Elements are the statements of the skills or characteristics that define effectiveness in the Standard.
- **Indicators**: The Indicators show the knowledge and skills of each Element in practice. The Indicators are observable or measurable statements that serve as tools in discussions of effective school treasurers.

This organization by Standard, Narrative Summary, Element and Indicator is shown in the graphic below:

- **Standards**: Overarching goals and themes that provide a framework for effective practices
- **Narrative Summaries**: Statements that describe key understandings, assumptions and beliefs related to the Standards
- **Elements**: Specific statements that define the various skills and characteristics that demonstrate effectiveness in each Standard
- **Indicators**: Observable or measurable statements that provide evidence of the Standards and Elements in action
The Standards in the Context of Ohio’s Standards-Based Reforms:

The Ohio Standards for School Treasurers was developed as a natural extension of the standards-based reforms that have taken place in Ohio over the past decade. The state has detailed academic content standards for students in grades K to 12, as well as the Ohio Standards for the Teaching Profession, the Ohio Standards for Principals, the Ohio Standards for Superintendents and the Ohio Standards for Professional Development. Together, these standards show what is known about the practices of effective district leaders, school leaders, teachers and professional development systems. Copies of these standards are available on the Ohio Educator Standards Board website: http://esb.ode.state.oh.us/

Common themes cross all of these sets of standards. These shared objectives include an emphasis on:

- Promotion of student learning and achievement;
- Shared leadership;
- Data-based decision-making;
- Communication and collaboration; and
- On-going professional development.
Section Two: Ohio Standards for School Treasurers

Standard 1: Leadership
School treasurers participate in a leadership role within the district.

Standard 2: Financial Management
School treasurers demonstrate a clear understanding of financial resources and manage those resources in collaboration with the board of education and district leadership.

Standard 3: Facilities, Property and Capital Asset Management
School treasurers provide fiscal leadership in the management of capital assets and support services.

Standard 4: Communication and Collaboration
School treasurers communicate and collaborate effectively with the board of education, district leadership and stakeholders.

Standard 5: Professionalism
School treasurers are committed to a high level of professionalism in their conduct and adhere to established ethical standards.
Standard 1: Leadership

School treasurers participate in a leadership role within the district.

**Narrative Summary:**

Effective treasurers, in collaboration with the district superintendent and the board of education, develop, implement and monitor policies and procedures based on sound fiscal practices and the analysis of financial resources that support the district’s strategic plan for achieving its goals. Treasurers are integral members of the district leadership team and value the importance of an effective working relationship with the superintendent and the board of education.

Treasurers work with stakeholders to ascertain a reasonable long-term view of the fiscal stability of the school district and use financial data to make informed decisions; when called upon, treasurers must use these same skills to propose options to respond to a changing fiscal reality in the short term.

Treasurers provide oversight of personnel under their direct supervision and monitor the fiscal resources and financial data of the district. Treasurers regularly inform the district leadership team and board of education of the district’s financial position and its sustainability and potential impact on instructional programs and personnel.

**Elements:**

1.1 Participate as an integral member of the district leadership team.

1.2 Work with the district superintendent and board of education, with input from other stakeholders, to review, develop, align and implement policies and procedures.

1.3 Participate with the district superintendent and the board of education in the development and implementation of the district strategic plan.

1.4 Establish and manage sound fiscal practices to support the educational process.

1.5 Lead and manage personnel under direct supervision of the treasurer.

1.6 Support the effective use of data.

  d. Coordinate the development and management of an appropriate personnel database to provide seamless integration with payroll and other school district functions. |
Ohio Standards for School Treasurers

Standard 2: Financial Management

School treasurers demonstrate a clear understanding of financial resources and manage those resources in collaboration with the board of education and district leadership.

Narrative Summary:

Effective treasurers must know and be able to demonstrate the principles associated with school finance, budgeting, financial planning, accounting, auditing, financial reporting, cash management, investments, debt management, grant management and the technology to maintain the efficient financial operations of the school district. Treasurers are responsible for maintaining the public trust in the financial integrity of the school district by following and complying with acceptable financial accounting, auditing and reporting procedures. Treasurers also must comply with state and federal laws governing school finances.

Another essential role of the treasurer is to assist the district leadership with future planning by forecasting income and expenditures to meet the district’s strategic plan. Therefore, the treasurer must remain current of district contracts, bargaining agreements and program changes. Treasurers are regularly and systematically collecting and analyzing the financial data of the district as conditions change by employing current technology and software.

Treasurers serve on the district records commission and must comply with applicable Ohio public records laws.

Elements:

2.1 Collect, analyze and interpret financial data for budgeting, forecasting and decision-making.

2.2 Effectively manage district financial accounts including cash, budgetary, debt service, revenue and grant management.

2.3 Demonstrate knowledge, performance and accuracy of standard accounting practices, auditing procedures and accurate financial reporting.

2.4 Demonstrate knowledge of and compliance with state and federal laws.

  e. Understand political trends and legislative processes. |
Ohio Standards for School Treasurers

Standard 3: Facilities, Property and Capital Asset Management

School treasurers provide fiscal leadership in the management of capital assets and support services.

Narrative Summary:

Effective treasurers oversee the capital assets and services of the school district including the property, buildings, materials and equipment that require a systematic purchasing and maintenance system. Facilities, property and maintenance systems and services have a direct impact on the learning process and student achievement; therefore, treasurers develop and implement an effective and efficient facilities and property plan that includes the procedures to acquire and maintain products and services needed for the district. Treasurers monitor district operations by systematically and regularly reviewing costs and reports that include, but are not limited to, labor, purchasing and inventory, government subsidies, maintenance, utilities, technology, replacement and security of assets. Treasurers also are responsible for the disposal of district property.

Treasurers participate with the leadership team on the oversight of district construction projects. Specifically, treasurers oversee compliance with the financial policies and procedures related to district construction projects. Treasurers supervise debt, bonds and other financial instruments related to construction and operations of the district facilities and services.

Treasurers regularly review insurance coverage and risk associated with district operations and services.

Elements:

3.1 Acquire and maintain building and capital assets.
3.2 Secure financing for capital projects.
3.3 Develop and monitor risk management practices to protect capital assets.
3.4 Provide financial oversight and analysis of fiscal implications to the district support services.

Ohio Standards for School Treasurers

Standard 4: Communication and Collaboration

School treasurers communicate and collaborate effectively with the board of education, district leadership and stakeholders.

_Narrative Summary:_

Effective treasurers value communication with all stakeholders. Particularly, treasurers have procedures in place to facilitate regular and direct communication and collaboration with the school superintendent and board of education. The treasurer establishes and values communication with school personnel and other engaged external stakeholders to communicate the district’s strategic plan and collaborate to achieve the district’s financial objectives and goals.

Treasurers are able to communicate financial information in multiple formats using a variety of communication technologies.

_Elements:_

4.1 Demonstrate competence in the communication of financial reports to all stakeholders.

4.2 Communicate effectively and openly while demonstrating a willingness to collaborate with internal stakeholders.

Section Three: Ohio Standards for School Business Managers

The development of the Ohio Standards for School Business Managers was a collaborative effort that included the Ohio Educator Standards Board (ESB), the ESB Standards Committee, the ESB Subcommittee for School Treasurers and Business Managers and the Ohio Association of School Business Officials (OASBO). This cross section of Ohio school professionals worked together with the goal of defining the role and responsibilities of the school business managers, while asserting the level of quality to be accepted as the norm in the performance of the school business managers’ duties. This is being done with the understanding of the importance of the business operations in the realm of education.

These Ohio Standards for School Business Managers will serve as:

- An overview of the requirements of leadership, management, communication, collaboration and professionalism for Ohio’s school business managers;
- An instrument for the effective professional development of school business managers; and
- Criteria for measurement of standard compliance.

The effective functioning of a school district’s facilities, business operations and risk management are essential components in the education of Ohio’s students. An effective business manager is an essential team member in striving for excellence in education.

Please note that the business manager operates in different capacities from district to district and although these standards are the mainstay of the duties and responsibilities of the business manager, he/she has a subset of unique duties in each school district. It would be unrealistic to assume that throughout the state of Ohio each business manager serves with identical functionality. The Ohio Revised Code (ORC) is prescriptive in the legal duties of the business manager of a school district, but operationally, they serve various roles. These roles and responsibilities are often based on the size of the district and the number of corresponding administrators who may assume some of the roles outlined in this document.

Roles and Responsibilities of the School Business Manager

The role of an effective business manager encompasses a multitude of responsibilities, each essential to the ongoing operation, maintenance and risk management of the infrastructure and services of the district. Business managers are:

- Business leaders and advisors who provide sound business guidance that assists the district leadership team in the decision-making process;
- Business focused and clearly understand the construction and maintenance of facilities, business operations and risk management of the district’s assets, personnel and services;
- Safety and security focused, assuring the leadership of a safe and secure school environment;
• Communicators and collaborators who disseminate and articulate the business status of the district; and
• Professionals who commit themselves to adhering to established ethical standards.

School business managers are entrusted with the business operations and services of the district. To perform this obligation, they must execute their duties with the utmost conscientiousness, collaboration and ethical behavior; additionally, they must possess an extensive set of skills and knowledge. Business managers lead by demonstrating and nurturing high levels of trust based on their competence, integrity, ethics and high expectations.

Introduction to the Standards

The Ohio Standards for School Business Managers delineate the knowledge and skills of effective school business managers. These standards are not minimal expectations, but a framework upon which business managers are to construct additional knowledge and practical skills for their district. Business managers who work within the framework of these standards should expect to see higher performance for themselves and their districts.

These standards convey the expectations, practices and roles that the State Board of Education believes school business managers play in contributing to an effective and collaborative district and state education culture. Particularly within the district system of education, administration and leaders serve as stewards of the funds and capital assets entrusted to them to achieve the district’s strategic plan, including high achievement for all students.

Who is the Audience for this Document?

The purpose for articulating clear, statewide standards is to assist school business managers in guiding their own professional learning. Along with this document, other companion guides and technical manuals have been developed and released to assist Local Professional Development Committees (LPDCs), districts and professional organizations with creating and implementing professional development plans and programs for business managers. Additionally, this document is intended to assist individual business managers in self-assessing their performance, collaboratively discussing self-assessment results with peers and using these data to develop Individual Professional Development Plans (IPDP).
Organization and Structure of the Standards:

Each standard is organized as follows:

- **Standard**: The Standard expresses a definable goal or area of responsibility of school business managers.
- **Narrative Summary**: The Narrative Summary more fully describes the content of and rationale for each Standard.
- **Elements**: The Elements are the statements of the skills or characteristics that define effectiveness in the Standard.
- **Indicators**: The Indicators show the knowledge and skills of each Element in practice. The Indicators are observable or measurable statements that serve as tools in discussions of effective school business managers.

This organization by Standard, Narrative Summary, Element and Indicator is shown in the graphic below:
The Standards in the Context of Ohio’s Standards-Based Reforms:

The Ohio Standards for School Business Managers was developed as a natural extension of the standards-based reforms that have taken place in Ohio over the past decade. The state has detailed academic content standards for students in grades K to 12, as well as the Ohio Standards for the Teaching Profession, the Ohio Standards for Principals, the Ohio Standards for Superintendents and the Ohio Standards for Professional Development. Together, these standards show what is known about the practices of effective district leaders, school leaders, teachers and professional development systems. Copies of these standards are available on the Ohio Educator Standards Board website: http://esb.ode.state.oh.us/

Common themes cross all of these sets of standards. These shared objectives include an emphasis on:

- Promotion of student learning and achievement;
- Shared leadership;
- Data-based decision-making;
- Communication and collaboration; and
- On-going professional development.

Standard 1: Leadership

School business managers participate in a leadership role within the district.

_Narrative Summary:_

Effective business managers, in collaboration with the district superintendent, treasurer and the board of education, implement and monitor policies and procedures that support the district’s strategic plan. Business managers are integral members of the district leadership team and value the importance of a collaborative working relationship with the superintendent, treasurer and the board of education.

Business managers regularly provide oversight of personnel under their direct supervision and monitor the operational services of the district. Business managers regularly update and inform the district leadership team of the district’s facilities and operational management issues and potential impact on instructional programs and personnel.

.Elements:

1.1 Participate as an integral member of the district leadership team.
1.2 Participate with the leadership team in the development and implementation of the district strategic plan.
1.3 Lead and manage personnel under direct supervision of the business manager.

Standard 2: Facilities Management

School business managers demonstrate a clear understanding of facilities management.

Narrative Summary:

Effective business managers lead and oversee the facilities management of the school district including the property, buildings, building construction, environmental programs, equipment and business services. In many school districts, the business manager coordinates these activities with the treasurer and often shares responsibilities. Facilities, maintenance and safety have a direct impact on the learning process and student achievement; therefore, business managers oversee the district’s purchasing, inventory and maintenance systems. Business managers monitor district operations for effectiveness and efficiency by systematically and regularly reviewing costs and reports. Business managers monitor and report energy consumption and environmental programs as outlined in the district’s strategic plan. Business managers also oversee the disposal of district property.

Business managers develop and nurture private and public partnerships that benefit the business and instructional goals of the district.

Elements:

2.1 Acquire, maintain and oversee construction and/or renovations on buildings and other capital assets.

2.2 Manage energy and environmental programs.

2.3 Develop and manage partnerships with private and public sectors to enhance resources related to the facilities and equipment.

2.4 Develop plans for maintenance expenditures.

Section Five: Understanding and Using the Standards

The Ohio Standards for School Treasurers and School Business Managers defines expectations for Ohio’s school treasurers and business managers based on what is known about the skills and practices of effective treasurers and business managers. The standards will not change the process of licensure or performance evaluation for Ohio’s treasurers and business managers immediately. While the standards were not written as an evaluation tool, they can and should be used as a guide for treasurers and business managers as they self-assess their professional effectiveness, to identify their strengths and areas for additional professional growth.

Standards-Based Guiding Questions

One way for treasurers and business managers to self-assess is to respond to focused, guiding questions related to best practice. The tool that follows was created using the standards as its base. Any questions to which a treasurer or business manager responds at levels 1, 2, or 3 may be areas for growth and further professional development. It may be useful to answer the questions with a trusted peer, mentor or colleague to allow for additional discussion and reflection. Remember that this is a confidential self-administered tool and is not intended as an external evaluation tool.

Please note that school treasurers and business managers operate in different capacities from district-to-district and although these standards are the mainstay of their roles and responsibilities, they have a subset of unique roles in each school district. It would be unrealistic to assume that throughout Ohio each treasurer and business manager serves with identical functionality. While the Ohio Revised Code (ORC) is prescriptive in the legal duties of the Chief Fiscal Officer of a school district, school treasurers and business managers serve various roles, which are often based on the size of the district and the number of corresponding administrators who may assume some of the duties outlined in this document.

Using the Ohio Standards for Treasurers and Business Managers for Professional Development

The Ohio Standards for Professional Development suggest a general process for professional development that can be used by treasurers and business managers in personal professional development planning based on the Ohio Standards for School Treasurers and Business Managers.

The Professional Development standards suggest a five-step process for professional development planning by individuals. The steps in the standards-based planning cycle are explained in further detail on the following pages and include:

**Step 1: Examine Data**
Treasurers and business managers should self-assess (using the rubric on the previous pages) and evaluate available data to determine the specific needs in their districts related to their work.

**Step 2: Determine Learning Priorities**
Treasurers and business managers should analyze the data collected in Step 1 to identify specific goals for professional learning.

**Step 3: Align Initiatives**
Treasurers and business managers should use the information gained from Steps 1 and 2 to identify specific actions and available activities that will allow for their professional learning and growth.

**Step 4: Develop Implementation Strategies**
Given the results of the work done in Steps 1 through 3, treasurers and business managers should develop specific implementation strategies and plans for evaluation.

**Step 5: Monitor, Assess and Reflect**
Treasurers and business managers should plan the ways in which they will evaluate the effectiveness of their personal professional development efforts.

These five steps describe a continuous cycle of professional learning. Educational administrators at all levels of responsibility realize that high quality professional development requires a career-long cycle of improvement.
Step 1: Examine Data

Treasurers and business managers should conduct a self-assessment using the guidelines and rubrics on the previous pages. Questions such as the following can help focus this self-assessment:

- What are my strengths and weaknesses?
- To what extent do I meet the Ohio Standards for School Treasurers and Business Managers?
- What does my self-assessment suggest as areas for growth or updating in my performance?

Treasurers and business managers also should review and evaluate other available and pertinent data and reports that impact their work. Some data and reports should have been collected already by the district and leadership team. It may be helpful to review other data sources and reports as a leadership team activity. Some guiding questions to use to analyze the data include the following:

- What patterns emerge from the data?
- Do the reports on the work under my leadership suggest commendations, updating or areas for improvement?
- How are the roles and responsibilities under my leadership connected to the district’s strategic plan and goals?

List other data sources:

</tr>
<tr>

</tr>
</tbody>
</table>
Step 2: Determine Learning Priorities

Treasurers and business managers should analyze the data collected in Step 1 to identify specific priorities for their continued professional learning. To determine professional learning priorities and to focus professional development, establish two or three goals or learning outcomes. Again, the learning priorities and goals established in Step 2 should be based on the Ohio School Treasurers and Business Managers Standards and the district’s strategic plan and goals. It may be helpful to determine professional learning goals as a leadership team activity.

Some guiding questions to use when establishing learning priorities include the following:

- What additional knowledge and skills can I obtain that would help me address the Ohio School Treasurers and Business Managers Standards, elements or indicators that are of concerns or in need of updating?
- Given the data for the district’s strategic plan and goals analyzed in Step 1, what additional knowledge areas or skills/practices could I improve upon that would help me be a more effective leader in meeting the district’s strategic plan and goals?
- What has the state of Ohio and my professional organization identified as best practices for Ohio treasurers and business managers that may be applicable to my professional learning?

List Professional Learning Priorities:

<table>
<thead>
<tr>
<th>My Learning Priorities</th>
</tr>
</thead>
<tbody>
<tr>
<td>Goal 1:</td>
</tr>
<tr>
<td></td>
</tr>
<tr>
<td>Goal 2:</td>
</tr>
<tr>
<td></td>
</tr>
<tr>
<td>Goal 3:</td>
</tr>
</tbody>
</table>
Step 3: **Align Initiatives**

In Step 3, treasurers and business managers should list their learning priority goals from Step 2. The district leadership team, colleagues and professional organizations may be available to assist with suggested actions and learning activities that would address the learning priority goals. While “knowledge” and “skills” related goals may be addressed best through workshops and higher education courses, professional development should not be limited to these two types of learning activities. Professional development can be aligned with a variety of learning initiatives that should be considered. The following is only a partial list of different types of activities that could address your learning priority goals:

- A college course;
- A workshop;
- A specialized training program;
- Peer mentoring/coaching;
- Informal peer observations;
- Collaborative planning;
- Action research;
- Off-site visitations;
- A shadowing program;
- Researching best practices.

Align and list your learning priorities and goals with several possible learning initiatives and activities. Keep in mind the importance of including a variety of learning experiences (see Ohio PD Standard 4.2) and planning a logical sequence of learning experiences by order or date (see PD Standard 4.3):

Using the Ohio Standards for Professional Development

**Step 4: Develop Implementation Strategies**

Given the results of the work done in Steps 1 through 3, treasurers and business managers should develop specific implementation plans for their proposed learning initiatives/activities, the proposed dates and duration of each activity, and how they will evaluate the effectiveness of the proposed professional development.

The evaluation of your learning initiatives/activities should consider how you will evaluate the short- and long-term impact of the proposed professional development on your leadership and work.

</tr>
<tr>
<td></td>

<tr>

<td></td>
<td></td>
<td>• How will my district strategic plan and goals be affected?</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>• What evidence will document these changes?</td>
</tr>
</tbody>
</table>

Goal 2:  

Goal 3:
Step 5: Monitor, Assess and Reflect

Continuous monitoring, assessment and reflection of professional development and professional learning activities are essential to assure continuous improvement and growth. Identifying, collecting and organizing evidence to support individual improvement and professional development efforts is the responsibility of each treasurer and business manager. Different types of evidence will illustrate the work that you are doing and the positive outcomes of your professional development upon your leadership and work; evidence may include artifacts, products, documents and data. The Ohio Standards for Professional Development suggests that professional development be assessed and evidence gathered on multiple levels:

- Participant satisfaction and learning (see Standard 5.1)
- Application of new knowledge and skills (see Standard 5.2)
- Organizational change (see Standards 5.3)
- Student achievement (see Standard 5.4)
