3

1 for everyone that is here today.

2 Before we get started and to the

3 agenda this morning, I do want everybody to go

4 around and introduce themselves. Especially with

5 the small group here.

6 MS. FRANKE: Noel Franke, Scioto

7 Technical Center.

8 MR. SHOEMAKER: Josh Shoemaker,

9 Scioto Technical Center.

10 MR. HILEMAN: Ed Hileman, Portsmouth

11 West. Former employee of this fine place right

12 here.

13 MR. MILLIKEN: JJ Milliken, Vinton

14 County High School.

15 MR. WARD: Jeremy Ward, Vinton

16 County.

17 MS. SALYER: Leslie Salyer, Vinton

18 County.

19 MR. WOOD: My name is Grant Wood.

20 I'm with the Ohio Department of Education, program

21 administrator.

22 MS. GEARHART: I'm Krista Gearhart,

23 Director of South Stark Career Academy.

24 MR. RISOR: Fritz Risor, Program

25 Specialist, Department of Education.

2

1 P R O C E E D I N G S

2 - - -

3 MS. AMSTUTZ: Good morning. We are

4 going to go ahead and get started. From that

5 standpoint, good morning. My name is Leah Amstutz,

6 and I am the Director of the Office of Higher

7 Education at the Ohio Department of Education. And

8 we have here today with us Tony.

9 MR. LANDIS: I'm Tony Landis, Senior

10 Director, College & Career Access & Success at Ohio

11 Department of Higher Education.

12 And just wanted to say that we're

13 excited you are all here today to present this

14 plan. We bring you from our office, the

15 Chancellor, as well as all of the staff there. I

16 want to say that Perkins is one grant within the

17 state that gives us an opportunity between

18 secondary and post-secondary to really collaborate

19 on initiatives around technical education. And

20 program study is one of those mainstays within our

21 state, connections we have been able to make with

22 our secondary departments around credit transfer.

23 Just excited to be here, and we have

24 a few things to talk to you about.

25 MS. AMSTUTZ: Again, we are thankful

4

1 MR. KORNACK: Robert Kornack,

2 Assistant Director of Trade and Industrial

3 Programs, Ohio Department of Education.

4 MS. GROFF: Amy Groff, Chillicothe

5 City School District.

6 MR. GOVE: Jeff Gove, Department of

7 Education, Higher Education Reporting and

8 Compliance.

9 MS. BRYANT: Theresa Bryant, program

10 analyst with the Department of Higher Ed.

11 MS. AMSTUTZ: Thank you, Everyone,

12 for being here. We do have a court reporter here

13 today. So with the acoustics in this room, I

14 thought this room was fitting for what we are

15 talking about today, career education, getting

16 right to the heart of building and trade programs.

17 The acoustics in this area is a little bit

18 challenging to a volume standpoint. As everyone --

19 as we get into the part of the agenda where each of

20 you have an opportunity to provide public

21 testimony, make sure we speak up so we can record

22 that from that standpoint.

23 And so just to give a little bit of

24 agenda, kind of what the morning will consist of,

25 first thing we will do, we will just provide a

1 short, kind of overview of the Perkins V Plan. We
2 won't dive really deep into it, just some
3 highlights from that standpoint. Then we will go
4 into the opportunity of why you are here to provide
5 public testimony. I do want to call everyone's
6 attention to the smart board.

7 If you have not had an opportunity
8 to access the draft plan of Ohio Perkins grant, you
9 can go to the Ohio Education web page and find the
10 page. In this gray box where my cursor is, is the
11 draft of the state plan. And as well, if you leave
12 here today and want to continue to provide more
13 feedback on the plan, the survey is right
14 underneath the link of the survey to the public
15 comment period.

16 We also had that launched yesterday,
17 the survey you had an opportunity to provide public
18 comments through. We also have another public
19 hearing scheduled on January 8th. And we will be
20 in Stark County for that one, in the northern part
21 of the state. You are more than welcome to attend
22 that one as well.

23 From that standpoint, I do want to
24 thank Pike County Career Center for allowing us to
25 be here today, and hospitality they have shown us

1 this morning.

2 So just to share a little bit about
3 some of -- I think when we talk about the
4 educational system in the State of Ohio, as Tony
5 kind of alluded to, Perkins is really an
6 opportunity where we allow secondary education and
7 post-secondary to work very collaboratively. And I
8 think one of the greatest strengths happened in
9 Ohio over the last few years is when the Department
10 of Higher Education actually moved into the
11 building the Department of Ed is in. Now we can
12 just go between floors and the collaboration, I
13 think, is stronger than it's ever been.

14 This product of the Perkins plan has
15 been a collaborative effort. We have held meetings
16 where it's secondary and post-secondary departments
17 together. We do think it's so important in terms
18 of the career education students that are currently
19 in the secondary system as we transition them into
20 our post-secondary advanced training, if they
21 choose to go into that training, that kind of
22 thing.

23 I think, you know, when we dive into
24 the major themes of the Perkins legislation that
25 came from the federal government. When you look at

1 the site, this is sort of a summary, the one-pager
2 that is used a lot by our agency. And when we talk
3 about the strategic plan in the State of Ohio in
4 regards to the goals that have been set by our
5 state board of education and state superintendent,
6 and when you really look at what the vision that
7 the strategic plan for each child, the future, the
8 vision really comes back to the common goals for
9 career education already. And that is setting up
10 all students, specifically looking at each student,
11 transitioning them after graduation to something.
12 As we are looking at that transition into military,
13 post-secondary, the workforce. Setting them up for
14 success after graduation if they choose to enter
15 the workforce. That we have properly prepared them
16 for that transition, as well as additional or
17 advanced training. And so that's really what, you
18 know, is the core of what we do with career
19 technical education. And really is one of the core
20 themes that comes through the Perkins work.

21 The other thing is that a city is
22 really a topic and core of secondary education in
23 the State of Ohio. And for anyone that has
24 attended any of the regional meetings up to this
25 point on the Perkins legislation, heard

1 presentations at any of the CTE conferences in the
2 State of Ohio, equity is a major theme of the new
3 Perkins legislation as well. And looking at how do
4 we get to this equitable access and engagement. We
5 really take it down to how does it look for each
6 student. And that concept was aligned with what
7 was set for the strategic plan in the State of
8 Ohio.

9 And when you look at the strategies
10 that are identified in the CTE plan, Strategy 10 is
11 really the work that we do in career technical
12 education. And the strategy that our office and
13 higher department of education really works for.
14 That's setting up students for multiple ways to
15 transition into something after graduation.

16 Again, that transition can look
17 different for each student. Because we know each
18 student's career pathways look a little different.
19 And how do we do that and continue to use career
20 technical education as one of the vehicles to hit
21 Strategy 10 within the strategic plan of Ohio.

22 The other really important piece I
23 think that comes out of the strategic plan, as well
24 as post-secondary education is, you know, the first
25 bullet here is kind of talking about what the

1 vision of the strategic plan is, transitioning our
2 secondary students into that next step, which then
3 aligns to the post-secondary attainment goals.

4 I will let Tony speak a little bit
5 more about the attainment goal for post-secondary.

6 MR. LANDI S: So the attainment goals
7 for post-secondary in the state, 65 percent of
8 Ohioans ages 25 to 64 have post-secondary
9 credentials by 2025. And so when we say
10 credentials we are talking about anything from
11 certificate, certification, licensure to degrees,
12 applied associate degrees, applied associate degree
13 or a bachelorette degree even on into Master's and
14 Ph.D. and beyond.

15 And right now in the state, the
16 thing about Perkins is some of our performance
17 measures, and we will talk about some of those a
18 little bit later. Is that on the post-secondary
19 side, our measures are really focused on trying to
20 make sure individuals within our state can obtain
21 some type of credential. Because we know that
22 helps us all out in the long-run as a state, as
23 that strengthens our economic base and helps us in
24 many ways attracting not only talent to our state,
25 but also attracting companies and businesses to our

1 state so we can continue to grow Ohio.

2 Right now, we are about 44 percent
3 of that 65 percent. So it's a lot of work that
4 still needs to take place. A lot of work that is
5 taking place at many of our institutions to try to
6 help individuals meet this goal.

7 As, you know, in our state right
8 now, the Governor has put out the tech cred, which
9 is looking at opportunities for employers to train
10 their employees. So those employees can be in a
11 position to have more skills and also have a
12 credential to go along in tow. And so programs
13 like that are short-term certificate programs.
14 Many of those things that we are trying to do
15 within the state now to hopefully get us to that
16 mark, even beyond, so we can be attractive as a
17 state to companies.

18 MS. AMSTUTZ: Thanks, Tony.

19 So as if you look at Perkins V, and
20 dive into just a little more of the federal
21 legislation, there are two real core themes you see
22 integrated in the entire law itself. And the first
23 one is equity. And it really dives into really
24 looking at the disproportionality between our
25 subgroups and our special population. It even

1 expands the reporting for special population. And
2 really all of that is aligned to ESA.

3 ESA has expanded the special
4 populations in terms of additional subcategories of
5 potential students in these areas. And so Perkins
6 aligns with ESA and this whole idea of looking at
7 how we have equitable access to all students. Once
8 we have equitable access to those students, how we
9 are engaging them, how we are enrolling them in the
10 programs, and what is their performance.

11 And those facts really tie into the
12 next piece of the entire legislation, which is
13 quality. Maintaining that quality component of
14 career technical education. And the quality pieces
15 are kind of built off of the previous legislation
16 in Perkins IV and expanded, I think, to meet
17 today's workforce from that standpoint.

18 And that really -- when we talk
19 about it, it really -- these two themes are
20 interchangeable. If you think of secondary and
21 post-secondary, it's for all career technical
22 programs from that standpoint.

23 And if we dive down just a little
24 bit more granular to what are the major takeaways
25 of kind of these new themes with equity and quality

1 within the legislation. The very first component,
2 which is probably the most significant new piece to
3 really impact career technical education in these,
4 in relation to the work we do around Perkins, is
5 this idea that is articulated to the law, which is
6 that all local recipients of Perkins funds will
7 need to complete a comprehensive local needs
8 assessment. And just to let you know this is not
9 unique. If you look at any of the federal laws
10 on the state level -- or on the federal level that
11 have been re-authorized in past three or four
12 years, all of them in special education, all of
13 them have some type of local needs assessment or
14 some type of needs assessment that needs to be
15 completed. And what it is really getting to is
16 driven decision-making. How do we take a look at
17 what is the lay of the land in some core areas, and
18 diving into looking at where those gaps, which then
19 tie back to the equity conversation. We identify
20 the gaps through the local needs assessment, then
21 how do we tackle the gaps with federal dollars.
22 That's really, I think, the number, if you talk to
23 anyone within the technical career field, I think
24 they will tell you the local needs assessment is
25 the biggest change between Perkins IV and Perkins

1 V.
 2 The other piece is program equality.
 3 In the past, the program equality was really on the
 4 federal level just driven through one measure,
 5 which was skill attainment. And Perkins V is
 6 really an opportunity to make some decisions on how
 7 to look at program equality from that standpoint.
 8 And based on the feedback we have received over the
 9 past year and a half through the different meetings
 10 we have had, we have proposed the program equality
 11 indicator for phase learning from an equitable
 12 standpoint. And we will talk a little bit more
 13 about that in a few slides.
 14 And we talk about the expanded
 15 populations, expanded subgroups, and then really
 16 targeted of being really intentional of how you are
 17 going to spend your Perkins funds related to
 18 closing gaps.
 19 And then the last piece is really
 20 encouraging innovation. And it's really aligned to
 21 that 21st workforce. And again, through the local
 22 needs assessment, there is a requirement for local
 23 market data to be analyzed and looked at, as we are
 24 looking at the Perkins offered in a particular
 25 area, and determining if there's gaps in

1 programming. So if we have business and industry,
 2 and have a large population of jobs in healthcare,
 3 and only one healthcare program, that's potentially
 4 a market gap. Because we don't have a workforce to
 5 fill some of those job openings. So I think that
 6 the innovation piece is really coming into the
 7 parts of the local needs assessment.
 8 Just to give you an idea of how did
 9 the plan get developed that you saw, that I
 10 referenced, that was drafted and posted on the
 11 Perkins V web page. Is that there is a pretty
 12 extensive stakeholder engagement process in the
 13 State of Ohio between the two agencies. We worked
 14 collaboratively to truly develop the core pieces of
 15 legislation through work groups from that
 16 standpoint. And Perkins did require a broader set
 17 of stakeholders to be engaged at the state level.
 18 And that is also required at the local level
 19 through the local needs assessment.
 20 So just to give you an idea, we
 21 started with the four boxes on top. We started
 22 with four topical work groups, is what we called
 23 them. And those four topical work groups aligned
 24 to the areas of where we saw the greatest change in
 25 the Perkins V legislation. So we had a group that

1 was really focusing on accountability and data, we
 2 had a group that was looking at the local needs
 3 assessment and application of local recipients, we
 4 had another group that looked at how quality
 5 programs of study, and then we had a group that
 6 focused on equity. Those four topical work groups
 7 were composed of individuals that represented the
 8 career technical education, second and
 9 post-secondary educational community.
 10 We worked with the major career
 11 technical organizations in the State of Ohio. They
 12 submitted nominees that they wanted in terms of
 13 representing their associations on these work
 14 groups. And we held several meetings throughout --
 15 the equity work group actually started a year and a
 16 half ago, and went all last year and into the
 17 summer. And some of these other groups started in
 18 the summer. That Perkins web page I took you to,
 19 if you want to review all of the minutes of all of
 20 those work group meetings, those minutes are there
 21 so you can review the conversations and discussions
 22 and decision points that occurred in those work
 23 group meetings.
 24 As problems got completed or
 25 decision points got completed within those four

1 topical work groups, those then went to an internal
 2 working group between the Department of Higher
 3 Education and the Department of Education, And we
 4 kind of vetted the concepts, and some of the
 5 discussions we got out of those topical work
 6 groups.
 7 Then we took everything to what we
 8 called our stakeholder committee. Which was
 9 required by the stakeholders by the law that we had
 10 to engage in through this process. And there is
 11 some individuals in this room that sat on that
 12 committee. That's been a good piece. We have a
 13 lot of broad conversations and discussions in that
 14 group.
 15 And so as we, you know, local needs
 16 assessment was one of the very first things that
 17 that stakeholder group reviewed. They had a
 18 monthly meeting for several months that they took
 19 one of those major themes and comprehensive work
 20 group and presented information, discussions,
 21 dialogue, and took suggestions back. And so the
 22 plan that is now being presented, basically came
 23 through this work in engagement through
 24 stakeholders that started a year ago.
 25 And again, like I said, we tried to

1 be very transparent in the whole process. But you
2 can review the minutes of all of those meetings on
3 the website.

4 Any questions about stakeholder
5 engagement?

6 The other piece that we wanted to
7 share that when we dove into the plan, and there's
8 some questions in Section B that talk about the
9 collaborative agency efforts with workforce
10 development in the State of Ohio. If any of you
11 are familiar with the compliance plan, that's kind
12 of the federal legislation that really kind of
13 brings together all of the agencies that work and
14 workforce development. Whether that's through JFS,
15 Jobs and Family Services agency, the veterans
16 agency, it has a multiple prong approach in looking
17 at workforce development. And one of the key
18 pieces of the combined plan is to really start
19 looking at our workforce development programs and
20 looking at are there overlaps, where we can become
21 more efficient, is there things that we can share,
22 we can do a better job in terms of reaching more
23 students, reaching more adults.

24 So the Governor, our newly elected
25 Governor made the choice that he wanted the Perkins

1 plan to be part of the combined plan. Perkins V
2 can be part of the combined plan. That would be in
3 line with what the Kasich administration did.
4 Under the Kasich administration, Perkins was part
5 of the combined plan. So this is not a new piece
6 of what we do with Perkins.

7 The one thing we want to share is
8 that the vision articulated in our draft plan of
9 Ohio where business, training and education are
10 aligned to meet the needs of employees,
11 individuals, and their communities, that is the
12 vision that the Governor's office has on workforce
13 development in the State of Ohio.

14 The whole goal is, like I said,
15 about coordinating efforts across all of these
16 entities to truly serve Ohio citizens to the
17 highest degree when we start looking at workforce
18 development. And how can we leverage technology
19 and data to create efficiencies and improve
20 services and outcomes. And also to really drive
21 this idea of how can we have local programs that
22 are going to meet some of these workforce needs in
23 different sectors within the State of Ohio.
24 Because Ohio has a very diverse landscape. Right
25 now we are down in southeastern Ohio, it's a lot

1 different than northwestern Ohio. So what we do in
2 northwestern Ohio might look a lot different than
3 what we do in southeastern Ohio. So how do we
4 ensure the flexibility and still meet the needs of
5 the workforce and the employers.

6 Again, it's really about investing
7 in this idea of education, jobs and setting our
8 students and our adults up to be successful,
9 setting them up for the success and 21st century
10 skills. Sorry.

11 So just to dive into the local needs
12 assessment a little bit as far as Perkins V
13 requirements, the needs assessment, like I said, is
14 really looking at the strength of CTE systems
15 within a local area, and identifying the weaknesses
16 as well. So what we are doing well at and where
17 are the gaps and potential weaknesses. And then
18 how do we begin to engage our stakeholders to
19 really make data-driven decision-making on what do
20 we need to do in ramping up strengths and then how
21 do we close the gaps in our weaknesses.

22 And when you take a look at the
23 local application, which is different from Perkins
24 IV, and Perkins IV our local recipients really
25 provided us a plan of what they were going to do in

1 terms of their federal funds, from that standpoint.
2 Where now, the application is really looking at
3 what's the result of your local needs assessment.
4 And when the stakeholders engage, where are you
5 putting your priorities and closing the gaps. And
6 what are your goals in setting the targets for
7 those identified areas, and then how do you take --
8 and then what strategies are you going to use to
9 close that gap, or increase that strength. And
10 that strategy then, again, has to have Perkins
11 funding aligned to it. So that's aligning funding
12 and strategies to basically identify and to close
13 potential gaps to set a goal. That's a significant
14 change from what we have done in the past with the
15 Perkins legislation.

16 And like I said before, there are
17 areas that are described in law what the
18 comprehensive needs assessment has to cover. And
19 that is student performance in relation to our
20 Perkins indicators that we have to basically submit
21 to the USDOE every three years. So every local
22 recipient is held through those indicators as part
23 of the data that's provided to the USDOE. We have
24 targets that we have to basically hit on a yearly
25 basis. And we will talk a little bit about those

1 targets in a couple of slides.
 2 Evaluation of program quality. We
 3 really dive into the quality of the program, and
 4 that's kind of twofold. That's looking at the
 5 quality of the program, but then also the alignment
 6 labor market data, and are we aligning to what the
 7 labor market is telling us within that region or
 8 within that local area.

9 Targets for CTE programs of study.
 10 This is something that really in 2006, Perkins IV
 11 really started to create this program of study.
 12 And I think Ohio leads the nation in a lot of areas
 13 within our program of study and development.
 14 Because we have such a tight collaboration with
 15 post-secondary, that we have been able to put a lot
 16 of mechanisms in place, that students have the
 17 ability to transition very seamless, if they choose
 18 to, to go onto additional training. Whether that's
 19 a one-year certificate program, a two-year
 20 Associate's degree, or four-year degree. Those
 21 opportunities are there for the students to get.

22 And then recruitment, retention and
 23 teaching of faculty and staff, and then improving
 24 access and equity. Those are the five areas the
 25 competence local needs assessment really dives

1 into.
 2 And if you go to that Perkins page,
 3 you will see the comprehensive local needs
 4 assessment draft guidebook, along with the
 5 application. That, again, has been a product of
 6 all of those work groups and all of the feedback
 7 that we have gotten. And in there is a seven-step
 8 process of how local recipients will complete this
 9 work. And from that standpoint, and this was all
 10 developed at that local needs assessment topical
 11 work group. I think we did five or six revisions
 12 of that guidebook. And it's really a product of
 13 that collaboration. And this was one of the
 14 biggest things our stakeholders told us we want to
 15 be actionable. We want to be able to walk through
 16 and know we have to complete this step, do this
 17 step. And so that's why it's a seven-step process.
 18 I am not going through all of those background,
 19 but --

20 So basically it walks through how to
 21 begin the process, how to engage stakeholders, and
 22 then once you engage them, discuss your findings
 23 and get that input into the local application.

24 The other thing that has come out of
 25 the whole conversation, where you are not going to

1 see this necessarily within the Perkins plan
 2 itself, because the Perkins plan doesn't dive into
 3 a lot of the operational details of some of the
 4 core themes. But we wanted to share as part of the
 5 work that we did with our data and accountability
 6 topical work group, something the CTE secondary
 7 educational community has requested over the last
 8 several years is the opportunity to have some
 9 ability to offer some exploratory CTE classes at
 10 the tenth grade level. Because a lot of our
 11 programs do start at the eleventh grade; so how can
 12 we get tenth graders who maybe have full schedules,
 13 and that kind of thing into some related type --
 14 reporting type things. But we are providing -- we
 15 are providing the schools now the ability that if
 16 they want to offer some of those exploratory
 17 classes, before they could only do it up through
 18 the ninth grade, we are now allowing them to do it
 19 up through the tenth grade.

20 That is a piece of the conversation
 21 to know that we are offering this ability for
 22 schools to have more flexibility. And what they
 23 are doing in ninth and tenth grade programming
 24 aligns with the new data decisions around the
 25 accountability of Perkins. That will expand our

1 population of students that we have within our data
 2 sets.

3 As I talked, equity is a major theme
 4 throughout the entire legislation. And just to let
 5 you know what we have done up to this point and
 6 what you guys will see in the plan, where we go
 7 into some more detail is we actually just completed
 8 six piloted equity labs. We have one more on
 9 December 18th. I think 87 of 96 CTEs have signed
 10 up to attend those equity labs. So post-secondary,
 11 I know, is going to be having two equity labs yet
 12 this week. Right?

13 MR. LANDIS: Tomorrow and Friday.

14 MS. AMSTUTZ: Yep. So we have
 15 post-secondary and secondary have piloted some work
 16 with some equity labs. And that's really been
 17 looking at how do I analyze data, how do I identify
 18 a gap, how do I do a root cause analysis, and then
 19 how do I start planning based on that stuff.

20 We have also increased our secondary
 21 staff. So we have hired someone in our office just
 22 to work on equity initiatives because we understand
 23 the importance of it. We also will be putting
 24 together a tool kit of resources and continue to
 25 build on some of the foundational things we found

1 in a lot of the root causes identified in these
2 pilot labs. We also again will have webinars and
3 continue professional development through the span
4 of this legislation and building on all of the work
5 that we have started this year. So that's more
6 detailed within the plan.

7 Then the last -- one of the pieces I
8 also just want to visit a little bit about, as I
9 said before, with Perkins, which is a little
10 different than ESA, we are held to a set of
11 indicators that we have to report to the USDOE on
12 data. And that we have targets that we have to
13 hit. If we don't hit those targets, then we have
14 to go into improvement plan and that type of thing
15 from a compliance standpoint with our Perkins
16 grant.

17 And so with the secondary side, I
18 visited just a little bit and said that something
19 different in Perkins V versus Perkins IV, in
20 Perkins IV, the legislation did not define
21 concentrators. And concentrator is a student that
22 basically -- through Perkins IV, was a student who
23 took 50 percent of a career technical education
24 program, and was enrolled in the next course.

25 So to simplify it, most of our

1 programs are four courses. It's a student that had
2 completed two courses, and then enrolled in a third
3 course. So that student would be identified as a
4 concentrator on a local level. That student
5 then -- those students are who goes into our data
6 calculations. So if a student only took one CTE
7 course or only took two CTE courses, they wouldn't
8 go into our calculations under Perkins V for
9 anything that had to do with a concentrator.

10 So the states had the ability to
11 define concentrator definition on the state level
12 under Perkins IV. In Perkins V, the federal law
13 defines concentrator. So federal law says a
14 concentrator is a student that completed two
15 courses. So that's a significant difference
16 between the two laws from that standpoint.

17 So with this new definition of
18 concentrator, we are going to expect to have a
19 larger population of students fall into our data
20 and accountability matrix, from that standpoint.

21 So we have worked a lot with that
22 data accountability work group. One thing we heard
23 from that work group is alignment was very
24 important. And actually, that's a theme we have
25 heard over the last year and a half from the CTE

1 community, and both secondary and post-secondary.
2 Is whenever we can align systems, it's align
3 systems so that we are all coherent and moving in
4 the same direction. And so we really looked at
5 where can we align systems. And so where it made
6 sense and these data indicators be aligned to some
7 of the framework that's in ESA, which is for all
8 students. Because these indicators really tie into
9 graduation rates, academic performance, and then
10 when I talk to you a little bit about the quality
11 program, we said workforce, work-based learning was
12 an indicator that kind of came back through the
13 feedback we received. Because work-based learning
14 is equitable for all career technical education
15 pathways. We have 39 pathways in the State of
16 Ohio, and some industries don't put a lot of
17 emphasis on credentials from that standpoint. So
18 we heard the work-based learning was more equitable
19 and accessible from that standpoint.

20 And then also the post-program
21 placement. Which post-program placement is
22 following up with our students after six months of
23 graduation to determine are they in the workforce,
24 are they post-secondary, are they in the military.
25 And then they added a category for Perkins V for

1 Peace Corps and those type of programs.

2 And then there is a non-track
3 indicator where it's identifying basically gender
4 within a non-track program. So, for example, a
5 female student in a construction program. Because
6 that would be -- construction, majority is a
7 male-dominated field. So a female would be a
8 non-traditional gender in a non-traditional
9 program. And so that indicator we have in Perkins
10 V. We have it under Perkins V, and we have it in
11 Perkins V.

12 So I won't go into a lot of detail
13 on this data, because there is a lot of data there,
14 from that standpoint. Just to let you know, the
15 targets were aligned where we could simulate data,
16 we simulated data. Which the only one we were able
17 to simulate data on was, like, the science academic
18 measure. Everything else came from our ESA plan.

19 And then our technical skill
20 attainment, we were able to simulate data on it
21 from that standpoint. But that is a section -- is
22 there any questions?

23 That's probably the most complicated
24 section of the plan is the data component.

25 I will turn it over to Tony, and he

1 will talk about the post-secondary data, from that
2 standpoint.
3 MR. LANDIS: So from the
4 post-secondary side, it's very similar as what Leah
5 was saying, if we don't meet particular measures,
6 we have to go to performance improvement plan, and
7 all of those things.

8 I know that within our Perkins plan
9 a lot of this information is laid out so you can
10 get deeper into and gain a better understanding on
11 what the measures all entail, and who is all in the
12 measures.

13 On the post-secondary side, we are
14 looking at a couple of entities that participate
15 within the Perkins program. For us, it's 22 out of
16 our 23 community colleges participate in Perkins.
17 As well as our Ohio technical centers, which are
18 our adult career centers, non-degree institutions
19 that operate in certificates and certifications.
20 There are 40 of those institutions out of 52 that
21 we have within the State of Ohio. So there are
22 certain requirements that an institution must be
23 able to meet in order to participate within the
24 Perkins program. So roughly we have about 62
25 institutions in all on the post-secondary side that

1 are participating.

2 With the measures that we have, one,
3 I already kind of alluded to, with our attainment
4 goal, we are looking at post-program placement.
5 Those students who are able to gain employment
6 after they finish their program or continue their
7 education on into maybe another post-secondary
8 institution somewhere. As well as some of the
9 others Leah mentioned, about the Peace Corps and
10 service programs and the like.

11 The second one there is earned
12 recognized post-secondary potential. Those are the
13 individuals who complete the credentials and those
14 credentials I laid out earlier in terms of
15 certificate, certification, licensure, down to --
16 all the way into the degrees they may obtain. And
17 the last one is the non-track measure Leah just
18 mentioned.

19 So we also have that responsibility
20 on the post-secondary side to make sure that we can
21 do what is necessary in order to kind of shift the
22 culture, shift the mindset of how we look at
23 occupations, and who should be in particular
24 occupations.

25 For us, we took three years of trend

1 data from using the current Perkins V methodology
2 in order to take from the secondary -- or the
3 college side, as well as the OTC side, and combined
4 that in order to reach the baselines that we have.
5 And so we looked at that trend data, and as you can
6 see, for example, 2P1 is at 81 percent. Well, does
7 that mean that my institution, if I'm only at 70
8 percent have to hit 81 percent. No, it doesn't
9 mean your institution has to do that. But the
10 expectation is that your institution continues to
11 work to try to improve incrementally. And as you
12 can see, the various years from FY-2021 to FY-2024
13 that there's an incremental increase every year.
14 So as we got into trying to figure out how to set
15 our baseline targets, again, looking at that trend
16 data, we made sure we were looking at how often
17 institutions would more or less likely increase
18 over each year within their measurement. So really
19 that's kind of the gist of it.

20 But again, I encourage you to look
21 at the Perkins plan and go to our website, and that
22 can fill in a lot of gaps if you have questions
23 about that, or you can always contact us.

24 MS. AMSTUTZ: We did want to share
25 that for the secondary side on the work-based

1 learning this was kind of the categories that we
2 worked with the work group, identifying what would
3 qualify for work-based learning when we looked at
4 our secondary CTE students. So there is
5 traditional things we think about when we think
6 about job-based placement or internship, where
7 students are actually with the employer. It can be
8 paid or unpaid. And really the key to all six of
9 these categories that we really are looking at
10 students can do multiple of these categories, and
11 like the common themes of how the experience CTE
12 can be set up. And it's really coming down to the
13 educator, the student, and whether it is the
14 employer or a business mentor are involved in
15 putting together some type of training agreement
16 and plan that is going to really identify what the
17 student is going to learn in the experience. And
18 what the teacher may need to fill in in terms of
19 competency mastery in the classroom, and what the
20 work-based learning opportunity is going to be able
21 to assist in terms of that skill development. And
22 then the key is, and this is aligned to the
23 graduation requirements for 2023, the idea is there
24 has to be positive evaluation -- evidence of
25 positive evaluation, which is done by the educator,

1 as well as an employer or mentor that was involved
2 in that experience. And again, what our goal was
3 if our students are doing work-based learning in
4 the Perkins realm of career technical education
5 that that would also fit a requirement if they need
6 to use that for graduation. So we were purposeful
7 in how we aligned and had conversations with the
8 staff and the department of education that works
9 with work-based learning and the graduation
10 requirements so that we make sure we had that
11 alignment piece, from that standpoint.

12 Then there is the apprenticeship and
13 pre-apprenticeship, I think those are familiar with
14 everyone. Those are the opportunities for our
15 students to engage in those. This is where, as we
16 began to listen to the feedback from regional
17 meetings last year. There's challenges with
18 work-based learning, and there's barriers in terms
19 of transportation, not enough employers within a
20 particular area to be able to provide those
21 opportunities. So we really worked with that
22 community to think kind of outside of the box, what
23 are other ways those students can get the
24 work-based learning experience, but not the
25 traditional ones we think about all of the time in

1 terms of internship and apprenticeship. So one of
2 the categories that we've provided is remote or
3 virtual placement. Especially for our students
4 that are in IT fields. A lot of that work is done
5 remotely. And even in the workforce today, there
6 is a lot of work done at home anymore. So that is
7 a category where students can have a virtual
8 placement. And the key is that the criteria are in
9 place, that that training agreement, training plan,
10 and the student has a set of competencies or skills
11 that they are going to perform in that experience
12 and that someone is monitoring that. And that's
13 the key.

14 The other thing, too, is that we
15 know students are entrepreneurial. And some of
16 our students own their own businesses, and some own
17 really robust businesses. And so that's another
18 opportunity we felt was a category we needed to
19 provide in this work-based learning framework, is
20 if a student has their own business, how can they
21 use that to fulfill this requirement. And really,
22 instead of having an employer, be part of that
23 group that works with that individual, we basically
24 said if someone is in the business industry, within
25 that area, they can be a mentor to that student and

1 help monitor that student as they work in that
2 business that they own. And it's important that
3 that student is taking and doing all of the
4 business-type financials that you would do as
5 entrepreneurial. Are they tracking their expenses,
6 are they tracking their income, profit and loss,
7 those type of things. And that's where we think a
8 business mentor can be a really valuable piece,
9 learning the skills and that type of thing.

10 Again, as long as there's that
11 positive evidence of evaluation through that
12 entrepreneurship program, there's an opportunity
13 for students to have -- to be able to use hours in
14 that type of experience.

15 And then the other two really came
16 from our career technical education stakeholders
17 community, and listening, because we know, for
18 example, being here at Pike, they have a restaurant
19 here. And so how can students, you know, through
20 school-based enterprises also use that experience
21 when they are actually open to the public and
22 waiting on customers and running that restaurant as
23 a full-fledged restaurant. We felt those
24 opportunities should be able to count in the
25 work-based piece.

1 And so there is a category for
2 school-based enterprise, working at a restaurant,
3 it can be, you know, a set of students have -- a
4 school has a greenhouse and students have a co-op,
5 they own so many flowers of that greenhouse and run
6 it like a business. There is a lot of different
7 ways school-based enterprises can be used.

8 The key is, and what we put through
9 the framework in the work, for the student to count
10 these hours, the teacher should not be providing
11 instruction during that time. So it's not where
12 the teacher is teaching. The student is
13 interacting with the community, a customer, and
14 they are doing this on their own, like they need to
15 do in a regular job site. And there's definitely
16 those opportunities that present themselves through
17 an entire year within the secondary arena.

18 And then a simulated work
19 environment is another key piece. Especially for
20 some of our programs that because of age
21 requirements, and students, like our fire and EMT
22 programs, you know, our fire students probably
23 aren't going to go to a job site, not going to get
24 a job at a local fire department. But they
25 definitely, as part of their program, do live burns

1 and they work closely with the local fire
 2 departments and those type of things.
 3 So we are saying that when that
 4 simulated work environment, when those students are
 5 doing that live burn with the local fire
 6 department, that can count as part of the
 7 work-based learning experience. Again, the key is
 8 that the teacher is not providing the direct
 9 instruction of those experiences.

10 Basically, these six categories are
 11 ways that students can accumulate those hours. Our
 12 requirements that we have drafted up to this point
 13 is 250 hours of work-based learning. That aligns
 14 with what is prescribed in law with graduation
 15 requirements for the 2023 class. In terms of if a
 16 student chooses to demonstrate that confidence
 17 mastery within the career readiness, component of
 18 that 2023 requirement, one of those components is
 19 250 hours of work-based learning. So again, that's
 20 where the other alignment comes in so that students
 21 can potentially use that.

22 And then the last piece of the plan
 23 is basically the budget and financial section.
 24 Just to let you know, the budget in those sections
 25 really represent largely the same as what we have

1 done through Perkins IV, from that standpoint. The
 2 most significant change that we've made on the
 3 financial side of things is last year, during the
 4 transition -- I should say, it's this year is the
 5 transition plan year, but the transition plan was
 6 approved last April, was the first time in Ohio the
 7 two agencies are working together. And we have set
 8 aside reserved funds. This is the first time the
 9 agencies have done that. So this year we have
 10 \$1.4 million that has been set aside in a reserve
 11 fund. And what the goal is once we get through
 12 getting the plan done is we will have a competitive
 13 grant process for local recipients to submit grants
 14 around this idea of closing equity gaps in terms of
 15 programs that would align to the in-demand jobs in
 16 the State of Ohio, and that there is a strong
 17 collaboration between the secondary and the
 18 post-secondary institutions. And so again, that's
 19 the newest component of our financial section is
 20 the reserve funds.

21 So that was a quick run-through of
 22 the 80-some pages of the transition plan, from that
 23 standpoint, highlighting some of the core sections
 24 and some of the more important changes as you look
 25 at Perkins V from Perkins IV.

1 At this point, I think our plan is
 2 to transition to actually the public testimony
 3 component of the day. So I will turn it over to
 4 Graham Wood, and he's going to facilitate that
 5 component.

6 MR. WOOD: Thank you, Leah.
 7 So essentially to ensure we can
 8 capture everything, I can take a speakers list, and
 9 as people want to share, ask questions, give
 10 comments, you can feel free to raise your hand, I
 11 will call on people. If there is more than one
 12 person at a time, I will make sure we call on
 13 folks.

14 We will respond if it's something,
 15 like, right now we have an answer to a question, if
 16 it's something we can provide more context for.
 17 And if not, it's going to get recorded
 18 word-for-word, we will take it back and make sure
 19 that comment, that feedback is included and
 20 responded to in the plan.

21 At this point, anybody have anything
 22 they would like to share in terms of the plan?

23 Yes. Go for it.

24 Before you speak, just your first
 25 and last name.

1 MR. GAMERTSFELDER: Thom
 2 Gamertsfelder, C-TEC, Licking County. First, I
 3 would simply say that we very much appreciate Leah
 4 and Tony's leadership in Perkins V process, and
 5 know your leadership is very much appreciated.

6 My first question is does the Ohio
 7 V, Perkins V have components that while in
 8 compliance with federal guidelines, go beyond
 9 federal guidelines, federal requirements? Is there
 10 any aspect of the plan that is more strict than the
 11 federal guidelines?

12 MS. AMSTUTZ: I guess up to this
 13 point, based on all of the work that we've done and
 14 work we've done with the USDOE and advanced CTE, I
 15 would say there is alignment -- the alignment is
 16 there with what is expected with the law. I think
 17 there is higher expectations in Perkins V law than
 18 what was in Perkins IV. And that's where you are
 19 seeing some of those core new themes. And those
 20 themes are what is within the law.

21 MR. LANDIS: To go along with that,
 22 I think it -- we are definitely aligned to the
 23 legislation. You know, the state could be a little
 24 more, could be as strict as they want to be, right.
 25 And the legislation provides that level of

1 flexibility. But I think our approach, we are
2 definitely aligned with legislation and we haven't
3 created anything we believe is outside of that
4 goal.

5 MR. GAMERTSFELDER: One more
6 question. How is Ohio Perkins V flexible as in
7 means to address regional concerns and needs, what
8 components in the plan, in your opinion, best allow
9 for and foster flexibility?

10 MS. AMSTUTZ: I think how the
11 conference local needs assessment and local
12 application has been developed really is allowing
13 all of the institutions to make choices that will
14 best serve that local area or region, in terms of
15 we have created a lot of flexibility, and not --
16 like Tony said, not being too restrictive, saying
17 you have to do this, this, and this. We are saying
18 there is a couple core pieces of application in
19 terms of, you know, application we want to close an
20 equity lab, we want to make sure we are aligned
21 with the labor market, market piece. But outside
22 of that, I think there is a lot of flexibility and
23 choices in terms of the stakeholders, and how they
24 want to utilize strategies and funds to really
25 focus in on the local regional problem that came

1 from, through the analysis of local needs
2 assessment. And the local needs assessment allows
3 for some of those areas to dive into what's your
4 local and regional data type.

5 MR. WOODS: Anyone else?
6 Leah and/or Tony, if no one has
7 specific comments or questions, this was really the
8 opportunity we wanted to provide today for folks to
9 come in and provide specific reactions to the plan,
10 components of the plan and anything along those
11 lines. So if nobody has anything to say, we don't
12 necessarily have anything more that we are planning
13 to present today.

14 The plan is available online, if you
15 would like to take some time to look at specific
16 sections. We will be here to take any public
17 comment for the rest of the morning and the
18 afternoon. But, I guess in terms of the specific
19 program we have, I believe that does it for today.

20 If anybody would like to share more
21 comments?

22 MR. HILEMAN: I'm just saying, she
23 mentioned about the cafeteria, I encourage everyone
24 to go down to the cafeteria.

25 MR. WOOD: Thank you.

1 MR. MILLIKEN: The virtual component
2 with the -- that is -- but one of ours is
3 transportation, getting -- ours is Buckeye Hills
4 and Rio Grande, and some of those kids have to get
5 up at 4:45 in the morning to try to get to school.
6 So that's a big deal. The virtual component for
7 the work is helpful, I will say that.

8 MR. WOOD: Thank you.

9 MS. JONES: Crystal Jones. And I
10 actually had the pleasure of being a part of the
11 stakeholders meeting. And I'm here to support the
12 work being done by ODE. And they put in a lot of
13 time and make sure there is representation across
14 the state to add into things. So I want to make
15 that statement.

16 MR. WOOD: Yes.

17 MR. WARD: Jeremy Ward. One thing I
18 will add, really as a middle school advocate, the
19 connective piece with being enforced up through
20 tenth grade, we have been involved in a lot of
21 discussions with our career center and locally of
22 what we do when we introduce those courses as
23 electives in middle school, as we do, and then they
24 take a break in tenth grade before they actually
25 have the opportunity. That, for us, I think is a

1 very important piece, for sure.

2 MR. WOOD: Well, we will be here if
3 anybody else would like to comment, if you think of
4 something.

5 At this point, thank you for joining
6 us today.

7 - - -

8 Thereupon, the proceeding concluded at
9 approximately 11:02 a.m.

THE STATE OF OHIO:
 SS:
COUNTY OF FRANKLIN:

I, Angela S. Moore, a Professional Reporter and Notary Public in and for the State of Ohio, do hereby certify that the foregoing is a true, correct, and complete written transcript of the proceedings in this matter;

That the foregoing was taken by me stenographically and transcribed by me with computer-aided transcription;

That the foregoing occurred at the aforementioned time and place;

That I am not an attorney for or relative of either party and have no interest whatsoever in the event of this litigation.

IN WITNESS WHEREOF, I have hereunto set my hand and official seal of office at Columbus, Ohio, this 19th of December, 2019.

/s/Angela S. Moore _____
Notary Public, State of Ohio

My Commission Expires: February 28, 2021.
