September 13th - 2:30-3:30pm

Topic: Building your career-readiness roadmap - using data to develop and enhance your career-readiness efforts

2:30p - Introductions: Tasha & John & Tiffany (Overview Network/Group Norms, Expectations) & Opening/Introduction Activity

2:45p - Main topic: Building your career readiness road map (make sure there's a high-level timeline as a part of that)

- It starts with data. Here's some data to consider:
    - Workforce demand data
    - Student-level data on: graduation rates, industry-recognized credential data, career interest inventories
- Inventory what you're doing, use report card and workforce data to map what you should do
- Consider the Career Connections Framework to build out your roadmap.
- In addition to the work you want to do with students here are some key considerations for your roadmap:
    - How will you create communications loops with students, parents and families?
    - How will you engage or expand engagement with your business partners?
    - How can your roadmap include professional learning for teachers, counselors, and all adults in your classroom, building, district or region?
    - Consider how establishing building or department level "Career-Readiness" liaisons might be helpful throughout this work.

- **Bath Local Schools Example:**
    - **Bath Middle School Principal - Cam Staley & Bath High School Principal - Brian Jesko**

3:15p - Relevant ODE and Legislative Updates

- SB 166 Overview – tell us in the feedback form if you want a deeper discussion on any of these topics

3:25p – First In-Person Meetup!

3:30 - Closure: Survey
