

NAME _____

Exploring Medical Professions

The human body is a marvelous, complex machine. The body's systems are composed of specific organs that work together to keep the body functioning. Some of these systems are the skeletal, muscular, nervous, digestive, respiratory, circulatory, lymphatic, endocrine and reproductive systems. Millions of moving parts keep our bodies in good condition. When anything does go wrong, we are fortunate to be able to call on professional medical workers to help to correct problems and return us to good health.

To find out more about various professions in the field of medicine, write on the lines below how you think health professionals in each of these areas work to maintain good health in their patients. Be sure to include the body systems that they specialize in.
