

Career & Technical Education | Information Technology

3D Techniques

Subject Code: 145120

Outcome & Competency Descriptions

Course Description:

In this course students will learn how to implement 3D assets within interactive media and software. Students will develop programming methods and user controls that are responsive to virtual environments and user input. It is strongly recommended that students have experience with programming and hard surface modeling before taking this course.

Strand 1. Business Operations / 21st Century Skills

Learners apply principles of economics, business management, marketing and employability in an entrepreneur, manager, and employee role to the leadership, planning, developing, and analyzing of business enterprises related to the career field.

Outcome: 1.1. Employability Skills

Develop career awareness and employability skills (e.g., face-to-face, online) needed for gaining and maintaining employment in diverse business settings.

Competencies

- 1.1.1. Identify the knowledge, skills, and abilities necessary to succeed in careers.
- 1.1.2. Identify the scope of career opportunities and the requirements for education, training, certification, licensure, and experience.
- 1.1.3. Develop a career plan that reflects career interests, pathways, and secondary and postsecondary options.
- 1.1.4. Describe the role and function of professional organizations, industry associations, and organized labor and use networking techniques to develop and maintain professional relationships.
- 1.1.5. Develop strategies for self-promotion in the hiring process (e.g., filling out job applications, resumé writing, interviewing skills, portfolio development).
- 1.1.7. Apply problem-solving and critical-thinking skills to work-related issues when making decisions and formulating solutions.
- 1.1.9. Give and receive constructive feedback to improve work habits.
- 1.1.11. Recognize different cultural beliefs and practices in the workplace and demonstrate respect for them.
- 1.1.12. Identify healthy lifestyles that reduce the risk of chronic disease, unsafe habits and abusive behavior.

Outcome: 1.2. Leadership and Communications

Process, maintain, evaluate, and disseminate information in a business.
Develop leadership and team building to promote collaboration.

Competencies

- 1.2.4. Use negotiation and conflict-resolution skills to reach solutions.
- 1.2.7. Use problem-solving and consensus-building techniques to draw conclusions and determine next steps.
- 1.2.12. Use technical writing skills to complete forms and create reports.

Outcome: 1.3. Business Ethics and Law

Analyze how professional, ethical, and legal behavior contributes to continuous improvement in organizational performance and regulatory compliance.

Competencies

- 1.3.4. Identify how federal and state consumer protection laws affect products and services.
- 1.3.5. Access and implement safety compliance measures (e.g., quality assurance information, safety data sheets [SDSs], product safety data sheets [PSDSs], United States Environmental Protection Agency [EPA], United States Occupational Safety and Health Administration [OSHA]) that contribute to the continuous improvement of the organization.
- 1.3.7. Identify the labor laws that affect employment and the consequences of noncompliance for both employee and employer (e.g., harassment, labor, employment, employment interview, testing, minor labor laws, Americans with Disabilities Act, Fair Labor Standards Acts, Equal Employment Opportunity Commission [EEOC]).
- 1.3.8. Verify compliance with computer and intellectual property laws and regulations.

Outcome: 1.7. Entrepreneurship / Entrepreneurs

Analyze the environment in which a business operates, and the economic factors and opportunities associated with self-employment.

Competencies

- 1.7.13. Protect intellectual property and knowledge (e.g., copyright, patent, trademark, trade secrets, processes).

Strand 2. IT Fundamentals

Learners apply fundamental principles of IT, including the history of IT and its impact on society, common industry terms, systems theory, information storage and retrieval, database management, and computer hardware, software, and peripheral device configuration and installation. This base of knowledge and skills may be applied across the career field.

Outcome 2.3. Data Encoding

Explain and describe data encoding basics.

Competencies

- 2.3.1. Identify and explain coding information and representation of characters (e.g., American Standard Code for Information Interchange [ASCII], Extended Binary Coded Decimal Interchange Code [EBCDIC], Unicode).
- 2.3.2. Convert between numbering systems (e.g., binary, hexadecimal, decimal).

Outcome 2.4. Emerging Technologies

Identify trending technologies, their fundamental architecture, and their value in the marketplace.

Competencies

- 2.4.1. Identify emerging technologies that are applicable to the marketplace.
- 2.4.2. Describe the fundamental architectures of emerging technologies and how they are integrating into the existing systems of information technology.
- 2.4.3. Research the value of emerging technologies on the marketplace.
- 2.4.4. Describe emerging technologies (e.g., Bring your Own Device [BYOD], Services Virtualization, Mixed Reality [MR], SMART Devices, Additive Manufacturing [3D Printing], Internet of Things, Large Language Models, Machine Learning, and Artificial Intelligence).

Strand 5. Programming and Software Systems

Learners apply principles of computer programming and software development to develop code; build, test, and debug programs; create finished products; and plan, analyze, design, develop, implement, and support software applications.

Outcome: 5.3. Logical Operations and Control Structures

Develop code that uses logical operations and control structures.

Competencies

- 5.3.1. Explain Boolean logic.
- 5.3.2. Solve a truth table.
- 5.3.3. Write code that uses logical operators (e.g., and, or, not).
- 5.3.4. Write code that uses relational operators and compound conditions.
- 5.3.5. Write code that uses conditional control structures (e.g., if, if-then-else).
- 5.3.6. Write code that uses repetition control structures (e.g., while, for).
- 5.3.7. Write code that uses selection control structures (e.g., case, switch).
- 5.3.8. Write code that uses nested structures and recursion.
- 5.3.9. Write code that creates and calls functions.
- 5.3.10. Code error handling techniques.
- 5.3.11. Write code to access data repositories.
- 5.3.12. Write code to create classes, objects, and methods.

Outcome: 5.4. Integrated Development Environment

Build and test a program using an integrated development environment (IDE).

Competencies

- 5.4.1. Configure options, preferences, and tools.
- 5.4.2. Write and edit code in the integrated development environment (IDE).
- 5.4.3. Compile or interpret a working program.
- 5.4.4. Define test cases.
- 5.4.5. Test the program using defined test cases.
- 5.4.6. Correct syntax and runtime errors.
- 5.4.7. Debug logic errors.

Outcome: 5.5. Programming Conventions

Develop programs using applications security best practices according to information security policies (e.g., cross-site scripting, Structured Query Language [SQL] injection attack, bounds_-checking).

Competencies

- 5.5.2. Develop programs that use reuse libraries.
- 5.5.5. Use appropriate naming conventions and apply comments.
- 5.5.6. Format output (e.g., desktop, mobile, enterprise, reports, data files).
- 5.5.7. Read inputs (e.g., user input, data file, sensors, databases, APIs).

Outcome: 5.6. Software Development Lifecycle

Apply the software development lifecycle (SDLC).

Competencies

- 5.6.1. Determine requirements specification documentation.
- 5.6.2. Identify constraints and system processing requirements.
- 5.6.3. Develop and adhere to timelines.
- 5.6.4. Identify a programming language, framework, and an integrated development environment (IDE).
- 5.6.5. Identify input and output (I/O) requirements.
- 5.6.6. Design system inputs, outputs, and processes.
- 5.6.7. Document a design using the appropriate tools (e.g., program flowchart, dataflow diagrams, Unified Modeling Language [UML]).
- 5.6.8. Create documentation (e.g., implementation plan, contingency plan, data dictionary, user help).
- 5.6.9. Review the design (e.g., peer walkthrough).
- 5.6.10. Present the system design to stakeholders.
- 5.6.11. Develop the application.
- 5.6.12. Compare and contrast software methodologies (e.g., agile, waterfall).
- 5.6.13. Perform code reviews (e.g., peer walkthrough, static analysis).
- 5.6.14. Ensure code quality by testing and debugging the application (e.g., system testing, user acceptance testing).
- 5.6.15. Train stakeholders.
- 5.6.16. Deploy the application.
- 5.6.17. Collect application feedback and maintain the application.

Outcome: 5.7. Configuration Management

Describe configuration management activities.

Competencies

- 5.7.1. Explain version management and interface control.
- 5.7.2. Explain baseline and software lifecycle phases.
- 5.7.3. Analyze the impact of changes.

Strand 7. Digital Media

Learners apply principles of digital media to produce interactive media; develop and produce multimedia applications; integrate typography into media; create 3D models and 2D and 3D animation; and create digital video, audio, and photographs.

Outcome: 7.2. Multimedia Tools

Develop navigational structures, scripts, storyboards, and flowcharts for multimedia applications.

Competencies

- 7.2.1. Develop navigational structures, wireframes, and flowcharts for multimedia applications.
- 7.2.3. Build in interactive elements.
- 7.2.7. Select colors based on color theory and psychology.
- 7.2.8. Describe music, video, and special effects to be used.
- 7.2.9. Provide a sample layout to stakeholders for review.
- 7.2.10. Select and create visual design elements appropriate for the intended audience and use.
- 7.2.11. Develop client personas and narratives for intended project outcomes.

Outcome: 7.3. Production

Produce interactive media.

Competencies

- 7.3.1. Select the media elements to be used (e.g., sound, video, graphics, text, animation).
- 7.3.2. Generate text for multi-image presentations (e.g., title graphics, charts, graphs).
- 7.3.3. Incorporate graphics (e.g., digital, hand-drawn, photographic).
- 7.3.4. Incorporate computer animation.
- 7.3.5. Prepare and integrate photographic images and special effects with graphic images.
- 7.3.6. Incorporate video footage.
- 7.3.9. Integrate sound with visuals.

- 7.3.10. Produce, test, debug, and archive a final product.
- 7.3.11. Apply accessibility guidelines to the selection and production of interactive media.

Outcome: 7.4. Graphics

Construct and manipulate digital graphics.

Competencies

- 7.4.2. Select color, shape, size, and texture of objects.
- 7.4.3. Create or acquire graphics.
- 7.4.4. Manipulate and layer objects.
- 7.4.5. Differentiate between vector and raster images.
- 7.4.6. Select graphic software applications based on budget, technical capabilities and hardware specifications to meet intended project outcome.
- 7.4.8. Manipulate graphic objects.
- 7.4.9. Compress and decompress graphic files.
- 7.4.10. Describe and select color profiles (e.g., Red Green Blue [RGB], Cyan Magenta Yellow Key [CMYK], Pantone).

Outcome: 7.6. Animation

Create 2D and 3D animation.

Competencies

- 7.6.1. Develop a plan and storyboard for an animation.
- 7.6.2. create and import 2D assets and environments).
- 7.6.3. Create key frames and apply tweens and paths.
- 7.6.4. Create special effects and virtual navigation.
- 7.6.5. create and import 3D assets and environments.
- 7.6.6. Render and export animations.
- 7.6.7. Create and import virtual assets and environments.
- 7.6.8. Create and render materials in a 3D environment.
- 7.6.9. Create 3D shapes through box modeling.
- 7.6.10. Create 3D shapes through NURBS.

7.6.11. Describe voxels and their uses.

Strand 9. Cybersecurity

Learners apply principles of Cybersecurity to secure and defend information technology systems, selection and implementation of methods and tools to secure physical and digital assets, manage threats, deploy countermeasures, and establish strategies to protect business information using risk and incident management.

Outcome: 9.6. Cybersecurity Law

Adhere to Cybersecurity laws.

Competencies

9.6.1. Adhere to licensing and intellectual property laws (e.g., copyright, trademark, digital-rights management).
