## Report Overview

### *General Description and Significance*

These reports are Qualified Paraprofessional data verification reports for the districts. They are generated only for the districts that submitted at least one staff member who fulfills the Qualified Paraprofessional criteria during an October (K) reporting period week. This report was created to assist districts and ODE in obtaining the number of instructional paraprofessionals that meet the definition of a qualified paraprofessional.

A separate Text and CSV file is created for each of districts that meet this profile. The Text file for the district is broken down by building and there is a building-wide total and a district total on the report. The CSV file contains a data line for each staff member, but contains no total records.

The Qualified Paraprofessional Reports include a list of instructional paraprofessional staff (most of the staff members reported with a 415 in the *Position Code Element*) sorted by building within the reporting district. This report indicates, as reported by the district, the instructional paraprofessionals that meet the definition of a highly qualified paraprofessional (as per the requirements of the 2001 No Child Left Behind Act) and those who do not meet the definition.

### *Tips for Reading This Document*

## ODE Processing

### *Process Description*

The districts submit *Staff Employment* and *Staff Demographic* data that are the basis of these reports. After the aggregation process and receipt of the data by ODE, a SAS program creates a data file that is a subset of the submitted data; it contains just those records that are pertinent to these outputs. This data file, **QUAL\_PARA\_PROF\_CCYYK.DAT**, is an input file to the report generation program.

A CCIP text file, extracted from the database, is also used in the SAS program. It is created every Friday morning, putting CCIP data based on the fiscal year.

### *Data Source*

The **STAFF EMPLOYMENT** file drives this data verification report and is a major input into the SAS program. **STAFF DEMOGRAPHIC**, **OEDS**, and **CCIP** elements are also used.

### Submitted Data Used in Report

The following fields either appear on the output or are used in intermediate steps in the process.

### Derived Data Used in Report

The BUILDING TYPE OF SERVICE element is extracted from the CCIP database and merged with the appropriate data record in **QUAL\_PARA\_PROF\_CCYYK.DAT**

### Report Selection Criteria

Instructional Paraprofessionals are defined as staff members in an assignment to provide instructional assistance in one or more of the following ways:

- (1) one-on-one tutoring
- (2) classroom management
- (3) instructional assistance in a computer laboratory
- (4) instructional support in a library or media center
- (5) instructional support services under the direct supervision of a teacher

This does not include paraprofessionals hired to assist with parent involvement activities or who act as translators.

### Title I School-wide

C:\Documents and Settings\lanicka.shepherd-mas\Desktop\QUALIFIED PARAPROFESSIONAL EXP.doc  
Revision Date August 8, 2006

Staff members in a Title I School-wide building who are reported with the following are included in this report:

- POSITION CODE is reported with a “415”  
and
- POSITION STATUS is not reported with a “P” or “U”

### **Title I Targeted Assistance**

Staff members in a Title I Targeted Assistance building who are reported with the following are included in this report:

- POSITION CODE is reported with a “415”  
and
- POSITION STATUS is not reported with a “P” or “U”  
and
- Either ASSIGNMENT AREA is “999140” or FUND SOURCE is “G”

Other filters used to extract the data from the Staff Job file are as follows:

- The POSITION FTE (CK100) should be greater than 0.
- If the same staff member is reported with multiple records for the same building, determine the earliest POSITION START DATE (CK 080) by comparing all the records and take that as the staff’s POSITION START DATE.
- The BUILDING TYPE OF SERVICE is obtained from the CCIP extract provided by Database Services.

### **NOTE:**

If no **Staff Employment** Records are submitted that meet the criteria above, no report will be generated.

If a district tries to submit a **Staff Employment** Record for an individual that meets the above criteria, and the QUALIFIED PARAPROFESSIONAL element is not completed (i.e. an “\*” is reported), then a fatal error will result.

If the position start date is after 1-8-2002,

- AND the instructional paraprofessional is employed in a Title I School-wide program,
- OR employed in a Targeted Assistance (TAS) building AND
  - paid with Title I funds or
  - assigned to a Title I program,

then the instructional paraprofessional is required to meet the definition of a qualified paraprofessional.

## Report Sample, .TXT

### *Header Information*

The first area of the header describes information about the report generation. The upper left section names the program from which the report was generated and the data source. The middle information identifies the producer of the report and the report title. The upper right section states the date on which the report was generated, the page number, and the reporting period to which the report belongs.

The second area of the header pertains to the recipient of the report. It identifies the district for which the report was produced, its IRN and COUNTY, the ITC and AREA COORDINATOR of the district. It then gives BUILDING NAME whose data is contained on the page, the BUILDING IRN, and the CCIP TYPE OF SERVICE.

That is followed by column headers indicating the data described on each detail line.

### *Detail Information*

The building lines of the report contain

<b>STAFF ID</b>	Ohio Credential ID
<b>STAFF NAME</b>	Last, First, Middle Initial
<b>PAID BY TITLE I</b>	Y(es) or N(o)
<b>ASSIGNMENT AREAS</b>	Can be up to three
<b>POS START DATE</b>	If more than one assignment area, earliest is used

# Report Sample, CSV

## CSV File Format

Along with a .txt format file, EMIS reporting entities reporting Staff Employment Records during the October (K) reporting period will also be provided with a Comma Separated Value (CSV) format file that will contain all Staff Employment Records that were successfully reported to ODE that were used in the creation of this report. The file name is: CSV\_2006K\_STF\_QUAL\_PARA\_PROF. CSV files can be easily imported into Microsoft Excel in order to conduct detailed analyses of the figures contained in the txt file format report and to aid in any needed troubleshooting of this report.

In basic terms, the CSV file will contain the data element values of each Staff Employment Record, separated by a comma to denote the end of one data element, and the start of a new one. For example, if you were to take the name John Q Public, and his address, 123 Main Street, and convert it into a CSV file it would look like this:

John,Q,Public,123,Main,Street

When imported into Excel, this string of comma separated values would be split into corresponding columns:

First Names	Middle Initial	Last Name	Street Number	Street Name	Street Type
John	Q	Public	123	Main	Street

**TIP:** When importing data from a CSV file containing a numerical value that starts with a zero, like an IRN, it is important to import that type of data element as text and not a number in Excel. If imported as a numerical value, the first zero will be removed.

The following table provides a description of the data element columns that will be used by Excel to organize the comma separated values contained in the CSV file. All elements on this file will come from the Staff Employment Record, unless otherwise noted.

Element Name	Record Field Number (Source of element)	CSV file names for the elements	Definition
District IRN	CK040	District-IRN	The six-digit information retrieval number found in the Ohio Educational Directory of the EMIS reporting entity submitting the record.
District Name	OEDSR	District-Name	Name of the reporting district, as reported in the Ohio Educational Directory (OEDS).
Building IRN	CK090	Building-IRN	The six-digit information retrieval number found in the Ohio Educational Directory of the building where the staff member is assigned.
Building Name	OEDSR	Building-Name	Name of the building being reported by the district, as reported in the Ohio Educational Directory (OEDS).

e	Record Field Number (Source of element)	CSV file names for the elements	Definition
County	OEDSR	County	Designated county for the reporting district in the Ohio Educational Directory (OEDS).
Employee ID	CK050	Employee-ID	Unique code assigned to the staff member
Employee name	CI060	Employee-Name	Legal first and last name of the staff member.
Assignment Area 1 (may have up to three assignment areas reported)	CK220	Assignment-Area-1	The first code that more completely defines the position.
Assignment Area 2	CK220	Assignment-Area-2	The second code that more completely defines the position.
Assignment Area 3	CK220	Assignment-Area-3	The third code that more completely defines the position.
Position Status	CK070	Position-Status	Identifies the employee's current employment relationship with the school board in that particular position.
Position Start Date	CK080	Position-Start-Date	The date the staff member began work in this position.
Position FTE	CK100	Position-FTE	The full-time equivalency of the position to the nearest whole percent.
Position Fund Source 1 (May occur up to 3 times)	CK130	Position-Fund-Source-1	The first fund source from which the employee is paid.
Position Fund Source 2	CK130	Position-Fund-Source-2	The second fund source from which the position is paid.
Position Fund Source 3	CK130	Position-Fund-Source-3	The third fund source from which the position is paid.
