Report Overview

General Description and Significance

The data collected are used to determine the amount of Special Education Part-B IDEA and Early Childhood special education funds allocated to the state. Data submitted to the federal Office of Special Education are aggregated by disability, age, race, LEP status, gender, and poverty status. The December Childhood Count report contains detailed handicapped student counts by disability type, by ethnicity, and by age.

City, exempted village, local traditional public school districts and community schools are required to report data on the number of children with disabilities who are receiving special education and related services in accordance with an IEP on December 1, 2008. These data are to be submitted to the US Department of Education by February 1, 2009.

Header Information

The first area of the header describes information about the report generation. The upper left section names the program from which the report was generated and the data source. The middle information identifies the producer of the report and the report title. The upper right section states the page number, and the date on which the report was generated.

The second area of the header pertains to the recipient of the report. It identifies the district for which the report was produced, its IRN and COUNTY, and the phone number of the district.

That is followed by a line stating the disability type for the counts on a specific page.

That is followed by column headers that are the same for all pages except 5, 10, and the summary page:

- AGE

The data on this page count **PRESCHOOLERS WITH A DISABILITY** for **AGES 3, 4, and 5** and **OTHER 5 YEAR OLDS WITH A DISABILITY**.

The 5-year-old students are counted in two rows, those who are disabled preschoolers and other 5 year olds. Five-year-olds might be preschool or kindergarten students. Because the 5-year-olds might have either a 217XXX program code or a 210XXX program code, there is a cross-walk between the two sets of codes.
