Subject: Robotics Pathway

Public comment and CTE folks –

Looking at the proposed changes, it looks like the Robotics pathway would be under Engineering. Our current robotics teacher is going for a license under the manufacturing pathway (because that is where the robotics and industrial maintenance courses are – how will this work for him?

Subject: RE: Robotics Pathway

Thank you for your interest and public comment regarding FY23 EMIS change 23-19. Frits Rizor from the Office of Career-Technical Education provided the below response to your inquiry. Please let us know if you have additional questions or concerns.

Our courses are licensed at the course level, not the pathway and all three of the referenced courses are able to be taught by a teacher holding any of the three CW - Career Technical Workforce Development manufacturing licenses.

- 170380 - Manufacturing Operations
- 171802 - Manufacturing Engineering Technology
- 172303 - Manufacturing Occupations

Also, the robotics, industrial robotics and industrial maintenance courses all exist under the R7 – Manufacturing Operations pathway and the type of program being referred to would most likely be offered under that pathway.

Thank you,

Office of Data Quality
