Requiring a district to enter the program code 520200 should not be necessary as the information is available directly from a combination of the student admission date (FS070), student admission reason (FS080) and state equivalent grade level (FD090).

Thank you.

Hi,

Thank you for your public comment regarding EMIS change 23-31. The reason this program code is being added is because in our experience, districts do not often update a student's admission reason in situations in which a student leaves the district and comes back. The program code will allow the Department to definitively know to which students this situation applies.

Please note that districts only need to report this program code for a senior if they need the new exception for this student in the graduation requirements. The scope of students included in this population should be a very small subset of all students.

I hope this helps to clarify. Please let me know if you have any additional questions.

Thank you,

Subject: Public Comment for Change # 23-31

Good afternoon,

I'm providing a public comment regarding:

Change #23-31 "Collect Prior Year Enrollment Type for Seniors"

It appears that this change would require an additional program code reported by the school district. However, I'm wondering if this information could be derived by ODE based on Grade Level 12, Admission Date and Admission Reason (1, 2 or 3)? It seems like requiring districts to report a separate program code in this situation would be duplicate reporting, as this information is already reported via records FS070, FS080 and FD090.

Thank you,

Subject: FY23 Change 23-31

This is for public comment on the change related to a program code for prior year enrollment for seniors who were out of state, from a non-public school, or homeschooled.

Why can't this information be obtained through collecting current year grade levels, prior year reporting, and the admission reason element on the FS-Standing record?

Thanks,
