EMIS Change 26-41

This change includes updates to the CTE industry credentials for FY25. It also updates the table in Section 2.8.1 for FY26.

July 1, 2025, update: It was brought to our attention that the Department of Developmental Disabilities does not provide a credential by the name of "Direct Service Professional." Therefore, CT08 will not be added as a new credential in FY26. The update is marked in <mark>yellow</mark>.

SECTION 2.8.1: ASSESSMENT AREA CODES

Table 9. Industry Credential (GW) Assessment Area Codes and Descriptions. The fiscal years represent the year(s) in which an Industry Credential is/was valid to be earned by students by graduation cohort. Each fiscal year, a new column will be added and the oldest column—representing students who are no longer school-aged and so are no longer being reported via EMIS—will be deleted. There will always be eight fiscal years included in this table. For additional information on Industry Credentials, please see the Department's Industry-Recognized Credentials webpage.

When credentials are removed from the column for the current fiscal year, they remain active (and are therefore reportable) for students who enter grade 9 for the first time prior to the credential being removed. For example, credentials marked as not valid in FY26 are still reportable for students who were first time grade 9 students in FY25 or earlier.
