

EMIS Change 26-6

This change adds additional language to the Student Demographic (GI) Record EMIS Student ID Number Element (GI050) around not reporting an ID that matches the format of a Social Security Number.

SECTION 2.2: STUDENT DEMOGRAPHIC (GI) RECORD

☀ **EMIS Student ID Number Element**

Record Field Number	GI050
Definition	The locally determined EMIS student ID, used primarily to connect records during EMIS reporting.

Valid Options

Nine-digit ID used by the school district

Reporting Instructions. The EMIS ID is the district-determined number that is used by districts for student tracking. This number uniquely identifies each student within the district. The school district is responsible for assigning this number. The EMIS student ID number is primarily used to connect records during EMIS reporting. It is not submitted to the Department, but may be used in ODDEX as a student identifier if a Local Use Identification Code (GI610) is not reported for a student. [Numbers that match the format of a Social Security Number will not be used in ODDEX, they will be replaced by the SSID.](#)
