## Report Overview

### *General Description and Significance*

This report presents a profile of classes and head counts for Career Fields/Workforce Development Programs within a CTPD. It is prepared for each district that is a participant in that CTPD, showing courses offered in the current fiscal year and their locations.

It allows the district to see its participation in comparison with other districts in the same consortium and can be reconciled against the funded headcounts in the “CTAE Course Listing and Edit Report”.

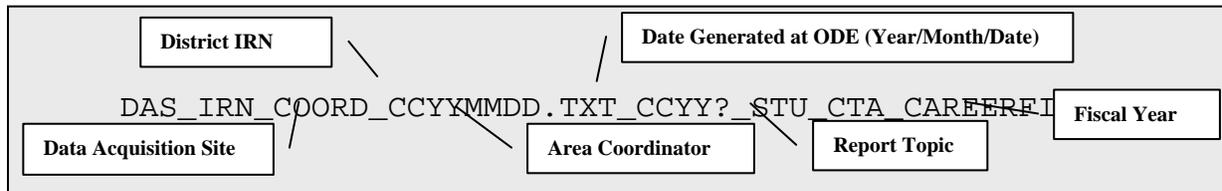

### *Tips for Reading This Document*

- EMIS data elements are written in SMALL CAPITAL LETTERS.
- Report field names are written in **BOLD SMALL CAPITAL LETTERS**.
- Options (values) for each data element are indicated in *ITALICIZED CAPITAL LETTERS* and are enclosed in quotation marks.
- Record names are displayed in *italicized bold letters*.
- File names are displayed in **CAPITALIZED BOLD LETTERS**.
- CCYYP denotes the century and year and processing period.

### *Report Name and Timing*

The file name for the report is:

**DAS\_IRN\_COORD\_CCYYMMDD.TXT\_CCYY?\_STU\_CTA\_CAREERFIELD**; its components are described below (“?” may be used to represent the current reporting period when the report is used for multiple reporting periods). This report is produced during the October (K) and February (C) reporting periods.

# ODE Processing

## *Process Description*

This report is generated every week during the October and February processing cycle and is distributed to contributing districts through their contracted ITC. Any district that submits CTAE data during a processing week should expect to receive a report.

There are a number of steps in the production of this report. The first occurs at the ITC where the student data are aggregated into the *ACVE* file, a file of CTA student counts by racial/ethnic category, gender, and grade.

After the data are incorporated into the ODE files, a CTA program builds the base file from which all of its reports are generated. From that file, selected elements are chosen and arranged to form the output for this program.

## *Data Source*

The course information comes from the *Course Master* records submitted by the district.

The student information comes from the *Student Demographic*, *Student Attendance*, *Student Course*, and *CTAE Correlated Class* records. During the aggregation process, the *ACVE* file is created from these data to provide student counts.

Other files in the CTAE system at ODE provide additional information for the reports: a *GIVE* file containing CTAE options, a *Subject* file containing short descriptions of the CTAE subjects, and an *IRN* file containing the connection between a CTPD and its districts.

### Report Selection Criteria

The BUILD program pre-selects records and writes the data to an intermediate file. The criteria for selection in the BUILD program is the same as it is for the Course Listing report:

Any one of the following excludes the record from the reports:

- EMPLOYEE ID = “999999999”
- COURSE TYPE = “S00” or “S01”
- MAPPED LCC = spaces

After this file is created the program applies the following filters. Any ONE of the following allows the record to be included:

- COURSE TYPE = “VV1”, “VV2”, “VT1”
- or
- SUBJECT CODE = “990361” “990362”

## Report Sample

### *Header Information*

The first area of the header describes information about the report generation. The upper left section names the program from which the report was generated, the data source, and the report name. The middle information identifies the producer of the report and the report title. The upper right section states the date on which the report was generated, the page number, and the reporting period to which the report belongs.

The second area of the header pertains to the recipient of the report. It identifies the district for which the report was produced, its IRN and COUNTY, and the CTPD associated with that district.

The third area of the head contains the total number of programs in Workforce Development programs (total of subject codes not expressly excluded from this count as noted on the subject area name line) and the total number of career fields (total number of subject areas not expressly excluded from this count) in the CTPD.

That is followed by section headers and column headers indicating the data described on each detail line.

### *Detail Information*

NOTE: on the sample below, some spacing was removed so that all of the data could be retained on the same page as the printed version.

- The detail listing is divided into sections. The first lists the Workforce Development (WFD) programs. Where applicable, there is a notation when the program counts as WFD but not as Career Field.

Under each section name, the listing is grouped by subject areas; each is headed by the count of the number of programs (subject codes listing under the subject area) and the total head count in those classes. The possible areas are listed below but will only be printed if the district is providing a course in that area.

- AGRICULTURAL AND ENVIRONMENTAL
- ARTS AND COMMUNICATION

## **Error Detection and Correction**

If there are any discrepancies between this report and the expected output for courses conducted by this district, district personnel should first check the aggregation reports. If there are any FATAL or WARNING errors, they should be corrected.

If there are no errors during the aggregations, cross check the numbers on this report with the “CTAE Course Listing and Edit” report. Unless a course is indicated as “FUNDED”, it will not appear under the **NUMBER OF CLASSES** count and its students will not be counted in the **OCTOBER/FEBRUARY HEAD COUNT**. If there are any errors indicated on that report, they should be corrected since both reports are derived from the same criteria.
