## Report Overview

### *General Description and Significance*

The Gifted Student Report includes data on the number of students screened, assessed, and identified in each area of giftedness for each district.

Reports are produced for all city, exempted village, local school districts, and community schools, based on Yearend (N) EMIS data.

This report was created for district/buildings to verify gifted student data, as reported to ODE by the districts via EMIS on the Gifted Student Record. The accuracy of these data is critical. Districts should report data that accurately reflect what is occurring in a building/district. These data will be used in reports to the legislature for use in policy decisions and could be used by the Ohio Department of Education during gifted audits. In addition, counts of students identified as gifted on the Student Gifted Record will be included as a subgroup on the accountability reports for each building/district.

### *Tips for Reading This Document*

- EMIS data elements are written in **SMALL CAPITAL LETTERS**.
- Report field names are written in **BOLD SMALL CAPITAL LETTERS**.
- Options (values) for each data element are indicated in *ITALICIZED CAPITAL LETTERS* and are enclosed in quotation marks.
- Record names are displayed in *italicized bold letters*.
- File names are displayed in **CAPITALIZED BOLD LETTERS**.
- CCYYP denotes the century and year and processing period.

### *Report Name and Timing*

The file name for the traditional report is:

**DAS\_IRN\_COORD\_CCYMMDD.TXT\_CCYYN\_STU\_GIFTED**; its components are described below. This report is produced during the Yearend (N) reporting period.

The file name for the CSV (comma delimited) file is: **DAS\_IRN\_COORD\_CCYYMMDD.CSV\_CCYYN\_STU\_GIFTED**; its components are described below. This report is produced during the Yearend (N) reporting period.

## ODE Processing

### Process Description

These data are submitted to ODE in the *Student Attendance*, *Student Demographic*, and *Student Gifted Education* records. The aggregation process creates the Attending Home Status code and State Equivalent Grade Level as well as calculates counts and sums. These data are sent to ODE via each district’s contracted Information Technology Center (ITC). After data have been accepted and processed by ODE, the reports are generated.

### Data Source

The primary source of the data are the *Student Attendance*, *Student Demographic*, and *Student Gifted Education* records. The first two are combined into the *YAAT (Yearend Attendance)* record during the weekly EMIS processing cycle in the Yearend (N) reporting period.

*OEDS* is used to provide header information for the report pages and to determine the output file name.

The *EMIS\_AUDIT* file is used to provide the date data were submitted to ODE.

AND;

- Are reported with *STUDENT STATUS* = “0”, “1”, “3”, “4”, “5”, “7”, “8”, “9”, “A”, “B”, “C”, “D”, “L”, “S”, “P”, “T”, “W”;

OR

- Are reported *ATTENDING/HOME IRN INDICATOR* = “2”, “3”, “4”, “5”, or “6”;

OR

- Students educated at community schools, reported with *STUDENT STATUS* = “M” are counted at the reporting community school.

## Report Sample, Traditional Report

### *Header Information*

The first area of the header describes information about the report generation. The upper left section names the program from which the report was generated and the data source. The middle information identifies the producer of the report and the report title. The upper right section states the date on which the report was generated, the page number, and the reporting period to which the report belongs.

The second area of the header pertains to the recipient of the report. It identifies the district for which the report was produced, its IRN and COUNTY, the ITC and AREA COORDINATOR of the district.

These headers appear on each page of the report. There are four pages on the traditional report and each of these pages has its own column headers indicating the data described on each detail line.

### *Detail Information*

The four sections of the district’s traditionally formatted report are:

- Unduplicated count of students screened and assessed during the current school year.
- Count of students screened and assessed during the current school year by area of giftedness.
- Unduplicated count of students identified and served.
- Count of students Identified as gifted, and gifted students served by area of giftedness.

On the first page, the **UNDUPLICATED STUDENT COUNT**, there are three columns: **GRADE**, **TOTAL SCREENED**, and **TOTAL ASSESSED**. Each row designates a student **GRADE LEVEL**. The values in each row/column are the counts for each unique student who was screened or assessed

for one or more of the gifted areas. A student is counted a single time regardless of the number of areas in which that individual student may be screened or assessed or identified. These counts reflect the screening and assessment activity for the current fiscal/reporting year. There is a total of each column at the bottom of the page.

On the second page, the counts of **STUDENTS SCREENED AND ASSESSED BY AREA OF GIFTEDNESS**, each row lists the **GRADE LEVEL** of the student. Each column lists an activity of **SCREENED** or **ASSESSED** for each of the seven gifted areas collected in the EMIS process: **MATH, SCIENCE, READING/WRITING, SOCIAL STUDIES, SUPERIOR COGNITIVE, CREATING THINKING, VISUAL/PERFORMING ARTS**. Although a student will be counted only once in a specific column of any row, that student will be included in as many columns as necessary to describe the entire picture of that student's screening and assessment. E.G., a fifth grade student who was screened in Reading/Writing and Creative Thinking will be counted as one (1) in the **READING/WRITING, SCREENED** column of the 05 grade level row. That student will also be counted as one (1) in the **CREATIVE THINKING, SCREENED** column of the 05 grade level row. There is a total of each column at the bottom of the page.

The third page contains **IDENTIFIED AND SERVED STUDENTS UNDUPLICATED COUNT**. As on the previous pages, each row lists the student grade level. The columns are unduplicated counts, each student being counted once and only once regardless of how many areas apply to the student's giftedness.

The columns are:

**TOTAL IDENTIFIED THIS YEAR:** Students who have been identified during the current fiscal year, beginning with July 1 and ending with June 30.

**GRAND TOTAL IDENTIFIED:** Students who have been identified during the current fiscal year or during prior fiscal years.

**TOTAL SERVED THIS YEAR** Students who have been served during the current fiscal year regardless of the year in which they were identified.

**% OF GRAND TOTAL IDENTIFIED SERVED THIS YEAR.** Calculated by dividing the **TOTAL SERVED** number in that row by the **GRAND TOTAL IDENTIFIED** number in the same row.

There is a total row on this page, summing the numbers in the identified and served columns and recalculating the percent based on the **TOTAL SERVED** and **GRAND TOTAL IDENTIFIED** numbers in the **TOTALS** row.

The fourth page contains numbers for **IDENTIFIED AND SERVED STUDENTS BY AREA OF GIFTEDNESS**. Students will be counted on this page if they were counted on page 3, but they will be counted once for each area of giftedness in which they were identified and served (see page 2 for the discussions of duplicated counts). The sum of this numbers on the totals row will more often than not add up to a greater number than the total of page three.

The fifth page provides headcounts by **GIFTED PROGRAM CODES**. This is an unduplicated count, including the student for each of the programs in which s/he is participating. There are no totals provided on this page.

This is the total number of students identified in the specific academic area of social students.

NOTE: 1) "IDENTIFIED TOTAL" includes all students identified in that area during this and previous school years.  
 2) If a student is identified and/or served in more than one area, the student could be counted in multiple columns.  
 3) "SERVED TOTAL" includes all students reported as served in that area during the 2003-2004 school year.

## CSV File Format

Along with a .txt format file, EMIS reporting entities reporting Student Gifted Records during the Yearend N reporting period will also be provided with a Comma Separated Value (CSV) format file that will contain all Student Gifted Records that were successfully reported to ODE. CSV files can be easily imported into Microsoft Excel in order to conduct detailed analyses of the figures contained in the txt file format report and to aid in any needed troubleshooting of this report.

In basic terms, the CSV file will contain the data element values of each Student Gifted Record separated by a comma to denote the end of one data element value, and the start of a new one. For example, if you were to take the name John Q Public, and his address, 123 Main Street, and convert it into a CSV file it would look like this:

**John,Q,Public,123,Main,Street**

When imported into Excel, this string of comma separated values would be split into corresponding columns:

First Names	Middle Initial	Last Name	Street Number	Street Name	Street Type
John	Q	Public	123	Main	Street

*TIP: When importing data from a CSV file containing a numerical value that starts with a zero, like an IRN, it is important to import that type of data element as text and not a number in Excel. If imported as a numerical value, the first zero will be removed.*

The following table provides a description of the data element columns that will be used by Excel to organize the comma separated values contained in the CSV file.

Element	Name in the EMIS Manual	Data Source	Definition
District-IRN	<b>2.4.1 District IRN</b>	<i>Student Demographic Record</i>	The school district reporting the Gifted Record.
SSID	<b>2.4.1 Statewide Student Identifier (SID)</b>	<i>Student Demographic Record</i>	The Statewide Identifier (SID) is a 9-digit alphanumeric identification code that is unique to each public school student in Ohio.
Building-IRN	<b>2.4.1 Building IRN</b>	<i>Student Demographic Record</i>	The state -assigned six-digit Information Retrieval Number (IRN - found in the Ohio Educational Directory) for the <i>school building which is reporting the student.</i> THIS IRN MUST BE A PUBLIC SCHOOL BUILDING LOCATED WITHIN THE DISTRICT WHICH IS REPORTING THE STUDENT.

Element	Name in the EMIS Manual	Data Source	Definition
Diff-Key	N/A	This is generated in the aggregations.	Indicates the number of gifted records reported for a particular SSID. Since a student should only be reported with up to 1 gifted record, if this element is greater than 1, then this means there may be more than one gifted record per student.
Attend-Home-IRN	<b>2.4.2.2 Attending/Home District IRN</b>	<i>Student Attendance Record</i>	Indicates the district to which a student is sent or a district from which a student is received. <b>IF TWO DISTRICTS ARE REPORTING A STUDENT, THIS ELEMENT ALWAYS REFERS TO THE OTHER DISTRICT.</b>
Resident-District-IRN	<b>2.4.1. Legal District of Residence</b>	<i>Student Demographic Record</i>	The six-digit IRN number for the current school district in which the parent(s) is a resident, if the parent(s) resides in-state. For students with disabilities refer to the EMIS Guide.
Majority-Attend-IRN	<b>2.4.2.4 Majority of Attendance IRN</b>	<i>Student Attendance Record</i>	Indicates the building IRN within the district (or the district IRN) where the student was enrolled for at least one hundred twenty (120) consecutive school days. If = *****, student was not in the district for 120 or more consecutive school days.
Accountability-IRN	<b>2.4.2.20 Accountability IRN</b>	<i>Student Attendance Record</i>	The Accountability IRN should only be reported for a student if Student is enrolled in multiple buildings in the district <b>OR</b> - Student participates in a special program in another building
Date-of-Birth	<b>2.4.1.6 Date of Birth</b>	<i>Student Demographic Record</i>	This is the date on which the student was born. (This data element is used in the aggregation routines to calculate age).
Grade-Level	<b>2.4.1.9 Grade Level</b>	<i>Student Demographic Record</i>	Indicates the student's current grade level during the reporting period.
Race	<b>2.4.1.5 Racial/Ethnic Category</b>	<i>Student Demographic Record</i>	Racial/ethnic group to which the student belongs or with which the student identifies.
Sex	<b>2.4.1.4 Gender</b>	<i>Student Demographic Record</i>	Indicates whether the student is male or female.
Age	N/A	Calculated in the aggregations.	This element is calculated based upon the reported date of birth for a student.

Disability	<b>2.4.1.13 Disability Condition</b>	<i>Student Demographic Record</i>	Indicates students who have a disability.
Prior Disability	<b>2.4.1.13 Disability Condition</b>	<i>Student Demographic Record</i>	Indicates students who had a disability different from the current.
Disadvantage	<b>2.4.1.14 Disadvantagemnt</b>	<i>Student Demographic Record</i>	Students with Disadvantagemnt reported with one of the following elements: * = Not applicable • 1 = Economic disadvantage • 2 = Academic disadvantage (reported for <b>career-technical education students only</b> ) • 3 = Both economic and academic disadvantage (reported for <b>career-technical education students only</b> )
LEP	<b>2.4.1.21 Limited English Proficiency (LEP)</b>	<i>Student Demographic Record</i>	Indicates whether student is Limited English Proficiency.
Homeless	<b>2.4.1.15 Homeless</b>	<i>Student Demographic Record</i>	Indicates a student who lacks a fixed regular and adequate night-time residence at any point during the year.
Migrant	<b>2.4.1.16 Migrant (Migratory Child)</b>	<i>Student Demographic Record</i>	Indicates whether or not the student is reported as a migrant or not.
State-Equiv-Grade	<b>2.4.1.26 State Equivalent Grade Level</b>	<i>Student Demographic Record</i>	Completed for students with current grade level = UG. Should = the current grade level for students NOT reported with grade level = UG.
Screened-Superior-Cog-Ability	<b>2.8.1 Screening</b>	<i>Student Gifted Record</i>	Student screened in the area of Superior- Cognitive Ability during the current school year.

## Error Detection and Correction

Districts should check their aggregation and submission reports to be sure that all submitted data were accepted and processed by ODE.

Once that is assured, district personnel should look at the data in the records for students coded as gifted.

If there are discrepancies between what is on the report, and what is actually occurring in your district, there could be a coding error. Things to check include:

- ✓ Is the *CURRENT GRADE LEVEL* reported appropriately for all students?
- ✓ Are the *ADMISSION DATE* and *WITHDRAWAL DATE* accurate for each student?
- ✓ Are both the *ATTENDING HOME IRN INDICATOR* and/or *STUDENT STATUS* reported correctly for all students?
- ✓ Have all students who were screened during the current school year been reported with *SCREENED = Y*, in the appropriate areas?
- ✓ Have all students who were assessed for giftedness this year, been reported with *Assessed = Y*, in the appropriate areas?
