FUNCTION AND PURPOSE

The FTE Daily Summary Reports are designed to help districts track FTE summarized in various ways on a number of specified days. At this time, all traditional districts, JVSDs, community schools, STEM schools, and ESCs receive FTE Daily Summary Reports, which are Level 2 reports and can be found via the Data Collector.

The FTE Level 2 reports provide daily summaries of student FTE for various types of students. Three separate reports are generated.

- *(FTES-005) FTE Daily Summary Report – Students District is Educating* includes FTE summarized for students that are educated by the LEA receiving the report.
- *(FTES-006) FTE Daily Summary Report – Students Initially Funded at District* includes FTE summarized for students who are initially funded at the LEA receiving the report.
- *(FTES-007) FTE Daily Summary Report – Transfers* includes FTE summarized for students for whom funding is transferred either into or from the LEA receiving the report.

Within the reports, various result codes identify the specific funding situation for which the FTE is summarized. This data will be useful to districts in reconciling their FTE data with the FTE displayed on their School Finance Payment Reports.

If this report explanation—in concert with the EMIS Manual—does not answer your questions or help you to resolve your issues with the FTE Summary Reports, then the normal path to getting help with EMIS reporting should be followed. The first point of contact should be the EMIS coordinator, followed by the Information Technology Center, then the EMIS Helpdesk, and finally ODE EMIS directly.

PROCESS DESCRIPTION

Each row on the FTE Daily Summary Reports represents FTE that has been summarized based on elements such as the Disability Condition code, Grade Level code, initially funded IRN, and transferred to IRN. Each row has nine columns that represent dates on which the FTE was calculated. This allows districts to see how their FTE is increasing or decreasing over time. An additional column provides an average of their FTE over the past 30 calendar days.

Each row is also assigned an Error Severity code which is determined based on a comparison of the FTE that was last processed to the thirty-day average FTE.

REPORTS

Layout and Fields

As with other Level 2 reports, it is possible to view the entire report or portions of the report by Severity Code.

The FTE Daily Summary Reports include too many fields to present a sample in a single picture. Only the first columns appear in the tables below; however, all fields are listed out below the tables, with explanations or definitions provided as warranted.

Error Severity Code Determination

The error severity is determined by comparing the thirty-day average FTE to the FTE from the latest run. If the thirty-day average FTE is greater than 1.00 and the FTE from the latest run drops to zero, then the severity is Fatal (F). If the thirty-day average FTE is greater than 1.00 and the FTE from the latest run drops by 10% or more but is greater than zero, then the severity is Critical (C). If the thirty-day average FTE is greater than 1.00 and the FTE from the latest run drops more than 5%, but less than 10% then the severity is Warning (W). If the thirty-day average FTE is greater than zero and the FTE from the latest run increases by 20% or more, then the severity is Warning (W). Otherwise, the severity is Informational (I).

The detailed calculations for the Error Severity Codes are described below:

For RESULT_CODE FT0100, FT0110-FT0116, FT0170

- If THIRTY DAY AVERAGE >= 1.0 and LATEST RUN = 0 then ERR_SEV_CODE = ‘F’
- If THIRTY DAY AVERAGE >= 1.0 and LATEST RUN /THIRTY DAY AVERAGE <= 0.9 then ‘C’
- If THIRTY DAY AVERAGE >= 1.0 and LATEST RUN /THIRTY DAY AVERAGE <= 0.95 and LATEST RUN /THIRTY DAY AVERAGE > 0.9 then ‘W’
- If THIRTY DAY AVERAGE > 0 and LATEST RUN /THIRTY DAY AVERAGE >= 1.2 then ‘W’

For RESULT_CODE FT0180

- If THIRTY DAY AVERAGE <= -1.0 and CURRENT_CTE_FTE = 0 then set ERR_SEV_CODE = ‘F’
- If THIRTY DAY AVERAGE <= -1.0 and CURRENT_CTE_FTE/THIRTY DAY AVERAGE <= 0.9 then ‘C’
- If THIRTY DAY AVERAGE <= -1.0 and LATEST RUN/THIRTY DAY AVERAGE <= 0.95 and LATEST RUN/THIRTY DAY AVERAGE > 0.9 then ‘W’
- If THIRTY DAY AVERAGE < 0 and LATEST RUN/THIRTY DAY AVERAGE >= 1.2 then ‘W’

Districts will likely want to focus initially on rows with fatal and critical errors. These errors identify a significant decrease in FTE which could indicate that there may be an EMIS reporting issue.
