(ICAC-102) INDUSTRY CREDENTIAL CAREER FIELD POINTS REPORT

FUNCTION AND PURPOSE

The Industry Credential Career Field Points Report is designed to provide districts the summative Industry Credential point total by career field for currently enrolled students. At this time, all traditional districts, Joint Vocational School Districts (JVSDs), community schools, and Science, Technology, Engineering and Math (STEM) schools receive the Industry Credential Career Field Points Report, which is a Level 2 report that can be found in the Data Collector.

If this report explanation—in concert with the EMIS Manual—does not answer your questions or help you to resolve your issues with the Industry Credential Career Field Points Report, then the normal path to getting help with EMIS reporting should be followed. The first point of contact should be the EMIS coordinator, followed by the appropriate Information Technology Center (ITC), then the EMIS Helpdesk, and finally Ohio Department of Education EMIS directly.

PROCESS DESCRIPTION

Each row on the Industry Credential Career Field Point Report represents a career field in which a student has either obtained more than one (1) Industry Credential or earned three (3) or more Industry Credential points in the same career field. Districts should review the Industry Credential (GW) Student Assessment (FA) Record and revise if appropriate.

Each row has sixteen (16) columns that represent each Industry Credential reported by more than one district claiming payment for the assessment.
