5.2 General Data Characteristics

File Descriptions

This chapter presents the file descriptions for each of the EMIS records to be transferred to the designated Information Technology Center sites. Each file description includes:

- the data elements,
- their characteristics,
- field number,
- position in the file,
- field size, and
- most field values.

Also included are file descriptions which can be used for field validation.

These file descriptions will be used by individuals responsible for formatting the school district data. Persons responsible for this task may be a vendor, district personnel, designated data acquisition site staff, or the Ohio Department of Education staff involved in the creation or use of the EMIS data.

Picture Clause Symbols

Symbol	Meaning
X	Alphanumeric field
A	Alphabetic field
9	Numeric field
V	Indicates position of assumed decimal point; used only in numeric fields, does not count toward data item size.
S	Operational sign. Used only in numeric fields. All signed number fields must use a trailing separate character.

Formatting Rules and Notes

Unless otherwise stated, **alphanumeric fields** must be left justified and filled with trailing spaces.

Numeric fields must be right justified and filled with leading zeroes.

All signed numeric fields must contain a trailing separate sign character. The sign character immediately follows the numeric digits. The sign character must be either a "+" or "-" (ASCII values 44 and 46 respectively). For example, the picture S9(9)V99(s) represents 11 numeric digits followed by a sign field. This field would have a total size of 12 bytes.

For **date fields**, CCYYMMDD represents the required format for the date. For example, the value for May 2, 2006 is 20060502.

For **time fields** (shown as HHMM or HHMMMP) enter the hours, minutes and “A” for A.M. or “P” for P.M. For example, 8:00 in the morning is entered as 0800A; 6:00 in the evening is 0600P.

A field format of **Y/N** indicates that the field is entered as either “Y” or “N.”

Areas defined as **“Filler”** are blank areas to pad records to an appropriate size. These areas should be left blank (filled with spaces) and are reserved for use in the future.

Employee Name format (element on the Staff-Demographics file): Last name and appendage (if any) followed by a comma (,); then first and middle name or initial. Maiden name may also be specified in place of the middle name. The following are examples of valid formats for this element:

Smith, John E
Smith Sr., Mark A
Jones, Susan

Leaving Fields Unspecified

A record may have some fields unspecified. The software used at the data collection site will be capable of ignoring certain fields. If a field is filled entirely with commercial at-signs (@), the field will be ignored and will not be loaded into the district’s EMIS database.

This might be useful if the software system producing the record does not contain sufficient information to complete the entire record. In this case, the software system producing the detail record should fill all unknown fields with “@”.

NOTE: This does not imply that the data is optional. The fields will be provided from another source.

For example, a student attendance system may not contain information about in-school suspensions that is contained in a student discipline tracking system. The attendance system could produce a detail EMIS attendance record with the attendance and absence fields completed and the In-school Suspension field filled with at-signs (@). The discipline tracking system would likewise produce a record with in-school suspension fields completed and attendance fields filled with at-signs.

When these two files are loaded into the designated data acquisition site’s computer system, the fields containing at-signs will be ignored. Records with matching key values will be merged into a single record.

To work properly, the “key” fields for each record type must be properly specified. The “key” fields are ones that can be used to uniquely identify each record. These fields are identified in the table below. For example, the student ID must not contain at-signs.

Furthermore, the key fields from the various systems producing EMIS files must use the same values to identify records. In the above example, the attendance system and discipline tracking system must use matching student IDs to identify students.

EMIS Identifying Fields

The following table contains fields for each record type that are considered “key” fields. Key fields are those that can be used to uniquely identify each record. These fields are the minimum numbers of fields that must be specified for the record to be considered valid. Student software packages that use @ as a common protocol to indicate further use of a field should not use @ in any key field. Identifying fields cannot contain at-signs (@).

NOTE: The tables referred to above, does not imply that the data are optional for EMIS reporting. It is expected that the data will be supplied from another source.

The State Student ID (SSID) is required in the Student Demographic Record for all students and in the student Proficiency-Only Record for any student who completed high school courses after June 30, 2003. All other student ID’s are those supplied by the local student management software and will be replaced with the State Student ID during the aggregation process at the Information Technology Center Site. In the file layouts these other student ID’s are called EMIS Student IDs. This element is the district-determined number used by districts for student tracking.

For student, staff and financial records, the first 31, 31 and 35 positions respectively of each record are always required. The elements listed in the table below are in addition to the preliminary parts of each record.

Terms Used

Sort Type identifies the record type. I.e., CI (Staff Demo), CK (Staff Job), GQ (Student Program), GG (Gifted), etc. It is 2 characters in length. The sort type is critical and basically determines which type of data is on the record. The EMIS loading programs will use this to determine which file the records are to be loaded. For example, a GI record will be loaded into the Student Demographic record and the GI record layout is assumed for all of the fields being loaded.

The **record format indicator** is what is used to distinguish between versions of the file layouts. Every time a new field is added to the specific layout the record format indicator should be advanced to the next letter. This is how the State Software Development Team loading programs maintain a backwards compatibility with earlier file layouts.

5.2.2.5 OHIO NINTH-GRADE PROFICIENCY TESTING RECORD

Beginning in FY 2007, the only students which are eligible to take the 9th Grade Proficiency Tests are students who have completed all course requirements for graduation prior to September 15th, 2006. Any student who met course requirements after September 15th, 2006 is required to take the Ohio Graduation Test.

The Ninth-Grade Proficiency Tests are reported for all students enrolled during any test administration during the current school year **AND** by the district in which the student was most recently enrolled during the current school year. (In most cases this will be the district in which the student is enrolled in June.)

The reporting district(s) must submit a separate proficiency record per student, per test subject, for tested grade levels.

This record should also be used to report test results in the Yearend reporting period for those **enrolled** students that take the ninth grade proficiency test during the previous summer.

Summer graduates should be reported via the Proficiency ONLY Record during October reporting.

Please refer to Chapter 2 for more detailed reporting instructions.

5.3.3 CONTRACTOR STAFF EMPLOYMENT RECORD

The Contractor Staff Employment Record is an extension of the Staff Employment Record. This record is to be reported by the contractor for each contractor's staff member providing services or teaching a course. If a contractor's staff member is providing services or teaching a course to students from multiple districts, then one Contractor Staff Employment Record is required to be reported for each entity being served.

The term "contractor" refers to the entity with which the resident/educating district is contracting. A contractor may be an ESC, another school district, or a non-EMIS reporting entity. If the contractor is a non-EMIS reporting entity, do not use this record-see Appendix A for reporting options.

The contractor (either the ESC or another EMIS reporting entity) with which the resident/educating district contracts for a staff member to provide services and/or teach a course to students, is responsible for reporting a Staff Demographic Record, at least one Staff Employment Record, and at least one Contractor Employment Record. If multiple resident/educating districts are contracting with the ESC or another EMIS reporting entity for the same staff member in the same position to provide services or teach a course, then the contractor (the ESC or other EMIS reporting entity) is responsible to report a Contractor Staff Employment Record for each resident/educating district the staff member is serving in the same position.

Please refer to Chapter 3 and Appendix A for more detailed reporting instructions.
