

Change 1063 – CN310 Curriculum Code for Middle School CTE

VM Career Technical Education Middle Grade Course

Establishes a class as a middle grade Career-Technical Education class. Middle grade CTE courses are 30-120 hour introductory level courses linked to business, industry, and labor that ensure a seamless pathway from middle school to college and careers. CTE middle grade courses may be offered for any pathway with an approved CTE-26 on file. VM courses do not count towards a student's CTE concentrator status and students in VM courses are not subject to CTE technical testing. See the CTE Program Matrix for a complete list of subject codes that may be used in conjunction with the VM curriculum code.

CTE Program of Concentration Option Additions and Name Changes

Category	Program Code	Program Name
