

Update to 2019-2020 Report Card Information

The U.S. Department of Education has provided states the ability to seek one-year waivers from the Every Student Succeeds Act's (ESSA) testing and accountability requirements. The Ohio General Assembly subsequently passed emergency legislation canceling the spring administration of Ohio's State Tests and waiving report card requirements other than reporting of some limited, available data. The legislation also put in place a "Safe Harbor" period for many elements of the accountability system. Accordingly, the Ohio Department of Education sought and received a federal ESSA waiver for the 2019-2020 school year.

This technical document details how the measure or calculation works in a typical school year. Ohio School Report Cards, Dropout Prevention and Recovery report cards and Career-Technical Planning District report cards all have multiple measures that use assessment data that are not available or are substantially limited this year.

Please visit the [Report Card FAQ](#) website for more information about data availability for the 2019-2020 report cards.

Contact accountability@education.ohio.gov with additional questions.

2019-2020 Four-Year and Five-Year Graduation Rate Measures

Background

The Four-Year and Five-Year Graduation Rates are two of the ten graded measures on the report card. This measure is required by statute.

Ohio Revised Code Section 3302.01 (C)(1) (d) says:

(1) For the 2014-2015 school year and each school year thereafter, the department shall issue grades as described in division (E) of this section for each of the performance measures prescribed in division (C)(1) of this section . The graded measures are as follows:

(d) The four- and five-year adjusted cohort graduation rates;

Four-Year Graduation Rate

The four-year adjusted cohort (“on time”) graduation rate is calculated by dividing the number of students who graduate in four years or less with a regular or honors diploma by the number of students who form the *final adjusted cohort* for the graduating class. This final adjusted cohort includes students who are identified as first-time 9th graders four years earlier and is adjusted by:

- Adding any students who transfer into the cohort either later in the 9th grade or sometime in any of the next three years; and
- Subtracting any students who transfer out, emigrate to another country, or die during that same period. *Note that students reported as transferring to another Ohio public school by a sending district must be reported as having been admitted to a receiving public district or the student will be returned to the sending district’s cohort. In this document, these students are referred to as “reinstated transfers.”*

In order to include summer graduates in the graduation rate calculation, the four-year graduation rate is lagged by one year so the rate on the 2020 report card represents the Four-Year rate for the graduating class of 2019.

FY2019 Cohort Graduates: These are FY2016 First Time 9th Graders who are reported as having a *DIPLOMA DATE* and a *DIPLOMA TYPE* no later than the 2019 Graduate “G” reporting period, excluding students reported with Student Status = P, Q or T.

Grade placement is a local decision and students are placed in the appropriate graduation cohort based on the grade level reported in the first year that they are reported in any public school with a grade of nine (9) or higher. Cohort placement (also called Graduating Class placement) is done in early October of each school year to comply with federal reporting requirements. Students who enroll in an Ohio public school after the October deadline are assigned to their graduating class the following year. This will not affect cohort placement.

For example, if a student enrolls in on November 1 as a 9th grader, he will not be assigned to that year’s 9th grade cohort. Instead, he will be assigned to a graduating class based on the grade level reported at the beginning of the following school year. If this student is

2019-2020 Four-Year and Five-Year Graduation Rate Measures

advancing through high school at a normal pace, he will be reported with a grade of 10 in September of the following year and will be placed in the SAME graduating class as he otherwise would have been if he had come into the Ohio public school earlier in his 9th grade year.

The calculation uses two different elements, State Equivalent Grade Level and the Fiscal Year that Student Began Ninth Grade, to assign students to their correct graduating class. For students who were enrolled in an Ohio public school in the prior year, the calculation uses the State Equivalent Grade Level element to place the student in their correct graduating class. For example, if a student's State Equivalent Grade Level was 08 in the prior school year and 09 in the current school year, he will be placed in the cohort that is expected to graduate four years from now and that State Equivalent Grade Level code of 09 will be used to drive that cohort assignment.

On the other hand, if a student was not reported in the prior year, the Fiscal Year that Student Began Ninth Grade is used. The table below shows which graduating class is assigned based on when the district tells ODE that the student began ninth grade.

Fiscal year Started Ninth Grade Element	Graduating Class
2015	2018
2016	2019
2017	2020
2018	2021
2019	2022
2020	2023
2021	2024
2022	2025

The 2020 report card includes four-year graduation rate data for students in the graduating Class of 2019. This cohort includes all students who had data reported in the 2014-15 school year who also were reported with a grade of 9 during the 2015-2016 school year. The cohort also includes students who did not have prior year data where their Fiscal Year that Student Began Ninth Grade is 2016.

When calculating the graduation rate element, several other rules apply including:

- If a district has only one high school, the graduation rate for the high school may not be equal to the graduation rate for the district because some students may count in calculations only at the district level (please see the "Students Included in Calculations/WKC" document for further clarification).
- Graduation rates will only be calculated for a high school that includes students in grades 10-12, inclusive. If a building does not educate the entire 10-12 grade span then a graduation rate would not be calculated for that building. A graduation rate would be calculated for the district if the district includes grades 10 through 12.
- The graduation rate formula is consistent with the U.S. Department of Education's December 2008 guidance document regarding the adjusted cohort longitudinal graduation rate.

2019-2020 Four-Year and Five-Year Graduation Rate Measures

- Students from the 2019 cohort who do not receive a diploma prior to the start of the 2019-2020 school year are counted as non-graduates and are included in the denominator of the calculation regardless of the reason that they did not graduate. This includes:
 - Students who drop out during any of the four years that the cohort is in high school
 - Non-graduates who remain in school, but did not graduate for any reason (including students who remain for more than four years per an IEP, students in a program that takes longer than four years to complete, students who fail a required course and students who fail one or more parts of the OGT)
 - Reinstated transfers who were reported as transferring to another Ohio public school for whom no admission was ever reported by the receiving district.

Once a student is assigned to a graduation cohort, the cohort will not change regardless of the situation.

2019-20 Four-Year Graduation Rate Measure (Class of 2019 Reported on 2020 Report Card)	
Definition:	<p>Percentage of students in the 2019 cohort that received a regular or honors diploma during or before the end of the 2018-19 school year (INCLUDING summer 2019 graduates).</p> <p><u><i>FY2019 Cohort Graduates:</i></u> Are FY2016 9th Graders assigned to the 2019 cohort who are reported during or before the FY2019 Period G (“graduate”) with a <i>DIPLOMA DATE</i> and a <i>DIPLOMA TYPE</i> (including summer graduates).</p> <p>NOTES: If the district has only one high school, the “Graduation Rate” on the Building LRC may not be equal to the district level “Graduation Rate.”</p> <p>Graduation rates will be calculated for a high school that includes grades 10-12. If a building does not educate students in the entire 10-12 grade span then a graduation rate would NOT be calculated for that building. A graduation rate would be calculated for the district if the district includes grades 10 through 12.</p> <p><u><i>High School Dropouts:</i></u> Are the number of dropouts (WITHDRAWAL REASON = ‘71’, ‘72’, ‘73’, ‘74’, ‘75’, ‘76’, ‘77’, ‘79’) from each school year (2016-2019) for that graduating cohort.</p> <p><u><i>Students Reported in Error:</i></u> Are the number of students (WITHDRAWAL REASON = ‘81’) reported in error by the school or district from each school year (2016-2019) for that graduating cohort.</p> <p><u><i>Non-graduates:</i></u> Are students who remain in school at the end of four years who did not graduate for any reason including, but not limited to lack of credits, failure to pass the OGT, regular education students enrolled in a program that takes longer than four years to complete and special education students who remain in high school per their IEP.</p> <p><u><i>Transfers In:</i></u> These are students who transfer to an Ohio public school sometime during their high school years (Grades 9-12). When a student enters the public school system for the first time, grade placement is a local decision</p>

2019-2020 Four-Year and Five-Year Graduation Rate Measures

2019-20 Four-Year Graduation Rate Measure (Class of 2019 Reported on 2020 Report Card)							
	<p>and students are placed in the appropriate cohort based on the Fiscal Year that Student Began Ninth Grade element reporting in the year they transfer. Note that if a student transfers in after the first Friday in October, their State Equivalent Grade will be used and they will be assigned a cohort based on which grade they are in the first day of school of the following year.</p> <p><u>Reinstated Transfers:</u> Are students reported as transferring to another Ohio Public School (WITHDRAWAL REASON = '41') who subsequently are not reported as being admitted to any receiving public district.</p> <p><u>Transfers Out:</u> Are students in the FY2019 cohort who are reported between the 2015-2016 and 2018-2019 school years with a withdrawal code (WITHDRAWAL REASON = '40', '41', '42', '43', '45', '46') that indicates that the student transferred to some other school and is continuing with his or her education. ODE also removes students who become deceased (WITHDRAWAL REASON = '52') from the calculation. Note that students coded with a transfer code of 41 MUST be picked up by another school or district in order to be removed from withdrawing entity's graduation rate. Students who are not reported by some other public school or district become "reinstated transfers" which is defined above.</p>

Number of Students in the Four-Year Graduation Rate Cohort for Class of 2019	
	<p>AND</p> <p>Other Criteria for Reinstated Transfers (FY2016-FY2019)</p> <ul style="list-style-type: none"> • Have a <i>WITHDRAWAL REASON</i>= '41' who subsequently are not reported as being admitted to any receiving public district.
Data Source:	Reported by the district through EMIS in FY2016 any reporting period; FY2017 any reporting period; FY2018 any reporting period; FY2019 any reporting period; Graduate G for FY2019 or earlier and FY2020 first reporting period.

2019-2020 Four-Year and Five-Year Graduation Rate Measures

Five-Year Graduation Rate

The five-year adjusted cohort graduation rate is calculated by dividing the number of students who graduate in five years or less with a regular or honors diploma by the number of students who form the *final adjusted cohort* for the graduating class. This final adjusted cohort includes students who are identified as first-time 9th graders five years earlier and is adjusted by:

- Adding any students who transfer into the cohort either later in the 9th grade or sometime in any of the next three years; and
- Subtracting any students who transfer out, emigrate to another country, or die during that same period. Note that students reported as transferring to another Ohio public school by a sending district must be reported as having been admitted to a receiving public district or the student will be returned to the sending district's cohort. In this document, these students are referred to as **“reinstated transfers.”**

In order to include summer graduates in the graduation rate calculation, the five-year graduation rate is lagged by one year so the rate on the 2019 report card represents the rate for the graduating class of 2018.

2018 Cohort Graduates: Are students in the 2018 Graduating Cohort who are reported during or before the FY2019 G (“graduate”) reporting period with a *DIPLOMA DATE* and a *DIPLOMA TYPE*.

Grade placement is a local decision and students are placed in the appropriate graduation cohort based on the grade level reported in the first year that they are reported in any public school with a grade of nine (9) or higher. Cohort placement (also called Graduating Class placement) is done on October 1 of each school year to comply with federal reporting requirements. Students who enroll in an Ohio public school after the October 1 deadline are assigned to their graduating class the following year. This will not affect cohort placement as long as the student advances a grade level in the following year.

- If the district has only one high school, the “Graduation Rate” on the Building Accountability Report may not be equal to the “Graduation Rate” on the District Accountability Report.
- Graduation rates will only be calculated for a high school that includes students in grades 10-12, inclusive. If a building does not educate the entire 10-12 grade span then a graduation rate would not be calculated for that building. A graduation rate would be calculated for the district if the district includes grades 10 through 12.
- The graduation rate formula is consistent with the U.S. Department of Education’s December 2008 guidance document regarding the adjusted cohort longitudinal graduation rate.
- Students from the 2018 cohort who do not receive a diploma prior to the start of the 2019-2020 school year are counted as non-graduates and are included in the denominator of the calculation regardless of the reason that they did not graduate. This includes students who dropout during any of the five years that

2019-2020 Four-Year and Five-Year Graduation Rate Measures

the cohort is in high school, non-graduates who remain in school, but who do not graduate for any reason (including students who remain for more than five years per an IEP, students in a program that takes longer than five years to complete, students who failed a required course and students who failed one or more parts of the OGT) and reinstated transfers who were reported as transferring to another Ohio public school for whom no admission was ever reported by the receiving district.

- Once a student is assigned to a graduation cohort, the cohort will not change regardless of the situation.

2019-20 Five-Year Graduation Rate Measure (Class 2018 Reported on 2020 LRC)	
Definition:	<p>Percentage of students in the 2018 cohort that received a regular or honors diploma during or before the end of the 2018-19 school year (INCLUDING summer 2019 graduates).</p> <p><u>Graduates:</u> Are students assigned to the 2018 cohort who are reported during or before the FY2019 Period G (“graduate”) with a <i>DIPLOMA DATE</i> and a <i>DIPLOMA TYPE</i> (including summer graduates).</p> <p>NOTES: If the district has only one high school, the “Graduation Rate” on the Building LRC may not be equal to the district level “Graduation Rate.”</p> <p>Graduation rates will be calculated for a high school that includes grades 10-12. If a building does not educate students in the entire 10-12 grade span then a graduation rate would NOT be calculated for that building. A graduation rate would be calculated for the district if the district includes grades 10 through 12.</p> <p><u>High School Dropouts:</u> Are the number of dropouts (WITHDRAWAL REASON = ‘71’, ‘72’, ‘73’, ‘74’, ‘75’, ‘76’, ‘77’, ‘79’) from each school year (2015-2019) for that graduating cohort.</p> <p><u>Students Reported in Error:</u> Are the number of students (WITHDRAWAL REASON = ‘81’) reported in error by the school or district from each school year (2015-2019) for that graduating cohort.</p> <p><u>Non-graduates:</u> Are students who remain in school at the end of five years who did not graduate for any reason including, but not limited to lack of credits, failure to pass the OGT, regular education students enrolled in a program that takes longer than five years to complete and special education students who remain in high school per their IEP.</p> <p><u>Transfers In:</u> These are students who transfer to an Ohio public school sometime during their high school years (Grades 9-12). When a student enters the public school system for the first time, grade placement is a local decision and students are placed in the appropriate cohort based on the Fiscal Year that Student Began Ninth Grade element reporting in the year they transfer. Note that if a student transfers in after the first Friday in October, their State Equivalent Grade will be used and they will be assigned a cohort based on which grade they are in the first day of school of the following year.</p>

2019-2020 Four-Year and Five-Year Graduation Rate Measures

2019-20 Five-Year Graduation Rate Measure (Class 2018 Reported on 2020 LRC)	
	<p><u>Reinstated Transfers:</u> Are students reported as transferring to another Ohio Public School (WITHDRAWAL REASON = '41') who subsequently are not reported as being admitted to any receiving public district.</p> <p><u>Transfers Out:</u> Are students in the FY2018 cohort who are reported between the 2014-2015 and 2018-2019 school years with a withdrawal code (WITHDRAWAL REASON = '40', '41', '42', '43', '45', '46') that indicates that the student transferred to some other school and is continuing with his or her education. ODE also removes students who become deceased (WITHDRAWAL REASON = '52') from the calculation. Note that students coded with a transfer code of 41 MUST be picked up by another school or district in order to be removed from withdrawing entity's graduation rate. Students who are not reported by some other public school or district become "reinstated transfers" which is defined above.</p>

2019-2020 Four-Year and Five-Year Graduation Rate Measures

Five-Year Graduation Rate Measure - Letter Grade Assigned	
Definition:	This calculation shows which letter grade will be assigned to the schools and district for their Five-Year Graduation Rate Measure.
Calculation:	<p>Once the Five-Year Graduation Rate is calculated using the methodology described above, a letter grade is assigned based on the following scale:</p> <p>95% - 100% - "A" 90% - 94.9% - "B" 85% - 89.9% - "C" 80% - 84.9% - "D" 0% - 79.9% - "F"</p>
Data Elements:	N/A
Filter(s):	N/A
Data Source:	N/A

Number of High School Graduates Class of 2017-2018	
Definition:	<p>This is the numerator for the five-year graduation rate and includes the cumulative number of students in the 2018 cohort that received a regular or honors diploma during or before the 2018-19 school year (INCLUDING summer 2019 graduates).</p> <p><u>Graduates:</u> Are students assigned to the 2018 cohort who are reported during or before the FY2019 Period G ("graduate") with a <i>DIPLOMA DATE</i> and a <i>DIPLOMA TYPE</i> (including summer graduates).</p> <p>NOTES: If the district has only one high school, the "Graduation Rate" on the Building LRC may not be equal to the district level "Graduation Rate."</p> <p>Graduation rates will be calculated for a high school that includes grades 10-12. If a building does not educate students in the entire 10-12 grade span then a graduation rate would NOT be calculated for that building. A graduation rate would be calculated for the district if the district includes grades 10 through 12.</p>
Calculation:	A count is taken of the number of students in the 2018 cohort reported with a <i>DIPLOMA DATE</i> and <i>DIPLOMA TYPE</i> during or before the FY2019 Period G. The full academic year criterion does NOT apply to the graduation rate.
