- **Explain** how state overall rating on the report cards are calculated

WEIGHTING FOR FIVE COMPONENTS

ACHIEVEMENT COMPONENT RATING TO POINTS

Performance Index

The Performance Index measures the test results of every student, not just those who score proficient or higher. Schools and districts receive points on the index for every student who takes a test. The higher the performance level on the state tests, the more points awarded toward the index score. The index score is divided by the maximum possible score. Each year the maximum possible score is determined by the average of the highest 2% performance index scores in the state.
