Committee facilitator Kelly Gaier-Evans welcomed the committee members to the 10th State Committee on Computer Science meeting. Committee Chair Mike Duffey motioned to approve the June 1-2 meeting minutes. The committee members approved.

Ms. Gaier-Evans gave a brief overview of the July 6 agenda and recapped the previous work. The committee reviewed the K-8 course recommendations in the draft State of Ohio Computer Science Plan in a full-group discussion. Then the committee broke into two smaller groups to further discuss what changes should be made within the plan for K-8 and high school.

Ms. Gaier-Evans pulled the groups back together after 20 minutes. A speaker from each group shared the changes their group suggested, and another full-group discussion ensued. After the discussion, the committee did a sticky-note vote for high school course CS programming, high school course computer service and K-8 recommendations. This vote drove the afternoon's work.

The committee reconvened after an hour of lunch. The high school team led a discussion on the course codes and courses that should be used for graduation requirements. The committee reviewed the current course codes and made a yes and no vote on what will be included. After, Ms. Gaier-Evans guided the committee toward discussing surface thoughts. She gave guiding questions and broke the committee into two groups; one to review the Executive Summary through Next Steps and one to review the recommendations component within the report. Each group shared their discussion.

Ms. Gaier-Evans concluded the meeting and Mr. Duffey explained the next steps with the public comment period. Ms. Gaier-Evans adjourned the meeting.
