

# English Language Arts Vertical Alignment

## Writing Strand

### Introduction

Ohio's English Language Arts Learning Standards in the vertical format show the college and career readiness anchor standards (CCRA), organized by strand, with their corresponding grade-level standards. We call these *Vertical Alignments*. These vertical alignments allow you to see what the students should be learning in their grade level, but also in the grade level or levels above and below the student's grade level.

Vertical alignments can be helpful for instructional planning. For example, CCRA 8 in the Writing strand asks the student to gather information from multiple sources, judge the information for credibility and accuracy, and then use this information in writing without plagiarizing. This is the one of the expectations for students graduating from high school to show college or career readiness. To build to this level, the standards ask a student in grades K-5 to use information from personal experience or a source from the teacher to answer a question. In grades 6-12, students should be able to decide if the information they have gathered is credible and accurate to address the question. If a student struggles to do this, a teacher may go back in the vertical alignment to see if the student has mastered the standard in previous grade levels. Students would need to master gathering information skills before they would be able to master the skill of judging the information to determine if they should or should not use the facts, examples, or other support to answer the research question. The teacher can then differentiate, or tailor the lessons and supports to the students' needs, to help students reach the skills in the standard at their grade level.

The vertical alignments are also helpful for parents who want to follow the skills and concepts that their children should be mastering from one grade level to the next.
