

ADVANCED LEARNING OPPORTUNITIES IN MATHEMATICS PARENT / GUARDIAN OPT-OUT FORM

REQUIREMENTS UNDER LAW

Districts that offer advanced learning opportunities in mathematics are required by [state law](#) to offer advanced learning opportunities to every student who achieves an advanced level of skill on a mathematics achievement assessment or end-of-course examination. Advanced learning opportunities provide academic content or rigor that exceeds the local curriculum for the student's grade level. Parents or guardians of a student who qualifies may submit a written request for their student to opt out of the advanced learning opportunities or enrollment in an advanced course. When parents or guardians opt their student out, the district is not required to provide that student with advanced instruction.

STUDENT INFORMATION

Student Name: _____

School/District Name: _____

PARENT OR GUARDIAN

I have received written notice regarding the benefits to my student participating in advanced learning opportunities in mathematics, and I grant permission for my student to remain in regular grade-level or course instruction.
