Thinking like a Behavioral Scientist

Examine Factors That Led to Continuity and Change in Human and Group Behavior

- How can we identify the characteristics of a culture?
- How do people acquire their cultural beliefs and value systems?

Recognize the Interaction Between Individuals and Various Groups

- How do groups form in societies?
- How do groups, and individuals in those groups, influence each other?

Thinking like a Geographer

Create Geographic Representations

- How can we utilize and construct geographic representations to explain and analyze regional, environmental, and cultural characteristics?

Evaluate Human Environment Interaction

- How can we analyze and explain the cultural, physical, and environmental characteristics of places and regions and how this affects the life of the people who live there?

Analyze Human Population Movement and Patterns

- How can we explain how changes in transportation, communication, and technology influence the movement of people, goods, and ideas in various countries?

Analyze Global Interconnections

- How can we explain how global changes in population distribution patterns affect changes in land use in particular countries and regions?

Careers for a Historian

Archivists
