Specific Academic Ability (Math, Reading/Writing, and Science)

Grade: 9-11

High Quality Student Data

Grades & Content:

ELA	Math	Science
9-10	9-10	9-10

Assessment Overview

Overview for districts describing in detail the assessment, its use and how the vendor supports implementation of the assessment.

PreACT assessments are multiple-choice and provide students with an early measure of college and career readiness while serving as a practice opportunity for the ACT test.

PreACT assessments provide the following:

- **Early Indication of Progress and Ideas for Improvement:** detailed results and item response analysis identify specific areas to continue support for students' improvement based on unique needs.
- **Robust Reporting:** powerful data in both student and educator reports include PreACT scores and ACT score predictions that identify student skills and areas of opportunity. Districts can have strategic conversations using the comprehensive data reporting to facilitate a deeper understanding of student progress.
- **Practice with the ACT Test Experience:** students have a structured testing environment similar to what they will experience when taking the ACT.
- **Career and Navigation:** educators can guide students based on student responses to the Student Information Section and Interest Inventory.
- **Easy, Flexible, and Affordable Administration:** paper-based multiple-choice tests in English, Math, Reading, and Science can be administered on any date between September 1 and June 1.
