

Support Schools Tool - FY26 Survey Questions

Introduction

The purpose of the **Support Schools Tool** is to help schools that are identified for support by Ohio's federal accountability system (and the districts that contain them) monitor the implementation progress of their One Plans. The following language is taken directly from the Support Schools Tool survey that districts and schools will complete in the monitoring application which can be navigated to through the ED STEPS platform or an OHID account.

Tool Instructions

This tool exists to help district and school leadership teams reflect on and adjust the implementation of their One Plans. The tool also provides opportunities for relevant entities to provide feedback on the information submitted in the tool.

Suggestions: Printing the One Plan and bringing relevant data to the table prior to beginning the Support Schools Tool will help district and school teams with this process. This tool should be completed by an inclusive team.

While any district or school may utilize the Support Schools Tool to guide and document their One Plan progress, **CSI** and **ATSI** schools from **ED STEPS Cohort 1** must complete the tool, in addition to the districts that contain these schools. Schools that actively work with their local State Support Team (SST) are encouraged to reach out to their SST, along with their district or sponsor leadership, for support in utilizing this tool.

(During this process please do not upload any student or staff data that contains personally identifiable information.)
