

## GPA Calculation Chart for Alternative Pathway to Graduation

The purpose of this chart is to standardize Grade Point Averages (GPAs) statewide for consideration as part of the alternative pathway to graduation. Points are assigned to grades along a four-point scale, ranging from 0 to 4. A full-letter grade change is equal to one point. Pluses and minuses raise or lower a grade point by three-tenths of a point. Grades are not weighted by type of course taken.

<b>Letter Grade to Grade Point Conversion</b>			
<b><i>Letter grade</i></b>	<b><i>Grade point</i></b>	<b><i>Letter grade</i></b>	<b><i>Grade point</i></b>
A+	4.0	C+	2.3
A	4.0	C	2.0
A-	3.7	C-	1.7
B+	3.3	D+	1.3
B	3.0	D	1.0
B-	2.7	D-	0.7
		F	0

Only those courses within the subject area of the failed test should be considered. Courses are defined as being within the subject according to locally adopted courses of study. Additionally, any courses taken in the last four years in the subject should be included, unless they were retaken and the grade was replaced. In that case, the grade of record should count.

<b>Courses within Subject Area</b>					
<b><i>Course</i></b>	<b><i>Teacher's name</i></b>	<b><i>Number of credits</i></b>	<b><i>Letter grade</i></b>	<b><i>Grade point</i></b>	<b><i>Credit-points*</i></b>
<b>Total number of credits</b>			<b>Total credit-points</b>		

\*Credit-points are calculated by multiplying Number of Credits by Grade Points.

**To calculate Grade Point Average, divide total Credit-points by total number of credits.**

**Grade Point Average = \_\_\_\_\_**
